PIC Weekly

Becoming a World-Class Petrochemical Producer

PRefChem organised the inaugural Quality Day on 2 Feb 2023 at the Multi-Purpose Hall (MPH) in Pengerang Integrated Complex (PIC) with over 300 employees attending the session. The key objectives of the event were to promote ISO 9001 certification programme, officially launch PRefChem Quality Policy and provide product awareness to the employees.

Before the event began, PRefChem CEO Mr. Joost Emmen and the staff visited the product booth at the back of the hall. The booth showcased a wide range of products from the Refinery Complex, Steam Cracker Complex, and Petrochemical complex as well as the final application of polymer products and product stewardship too.

The event kicked off with the ISO 9001 Certification briefing by ISO 9001 Champion, Mr. Rakan Bilaus, and the Project Leader, Mr. Imizan A Bakar. The speakers then shared the background of ISO 9001 certification in PRefChem, an overview of the ISO 9001 standard, the scope of ISO 9001 certification for Pengerang Petrochemical Company Sdn Bhd (PPC) as well as the certification milestone which is targeted to be completed by the second quarter of 2024.

The event was then followed by a speech by Mr. Joost Emmen. He emphasised the importance of having an ISO 9001 certification to position PPC to become a leading world-class petrochemical producer. Being certified would instill confidence in customers that we have established a systematic process to meet their requirements, henceforth becoming their supplier of choice.

After his speech, Mr. Joost Emmen accompanied by MC members, ISO 9001 Champion, and the vice-champion were invited to the stage to officially launch the Quality Policy. The Policy is a fundamental demonstration of the management's commitment to meet customers' requirements as well as statutory and regulatory requirements, to provide necessary resources to meet the quality objective, and to ensure continual improvement of the quality management system.

He emphasized the importance of having an ISO 9001 certification to position PIC to become a leading world-class petrochemical producer. Being certified would instill confidence in customers that we have established a systematic process to meet their requirements, henceforth becoming their supplier of choice.

After the event ended, the staff were then invited to visit the product booth exhibition and participated in the contest. The participation from the audience was overwhelming as many employees were eager to learn about our production chain and its final application.

On 31 Jan 2023, PRPC participated in an exhibition at SJK(C) Mawai, Kota Tinggi, in a joint effort to promote PIC as THE Regional Petrochemical Park. This was in conjunction with the annual Majlis Anugerah Kualiti dan Inovasi Pejabat Pendidikan Daerah Kota Tinggi.

Impacting the Society Positively

Contributions by exhibitors would benefit Kota Tinggi's Educational District Office in their effort to boost students' performance around PIC. This is in line with one of our #ForPengerang pillars to invest in the locals' education on top of cementing our position as resolutely progressive by working in tandem with the authorities to achieve an equitable future for the company and the community.

Officiated by Cik Norlizah Noh, Chairperson of the Johor Education, Information and Communication Committee, the award ceremony saw 50 recipients from relevant officials and deserving educators in Kota Tinggi recognised for their tireless efforts in upholding the quality and innovation of the education in the district.

600 participants consisted of government officials and the general public were showcased the digital-focused and interactive exhibition prepared by SCSM, PRPC. The booth was curated with the objective to increase the awareness of PIC while emphasising our initiatives to impact society positively.

Also present were En Mohamad Fadil Ishak, Kota Tinggi Education District Officer, En Izzuddin A Ghani, General Manager of SCSM PRPC, En Ady Ahmad, Principal of SMK Tg Pengelih, En Zainurin, Principal of SK Bandar and Pn Wong Sai Choo, Principal of SJK(C) Mawai.

Pengerang Gas Solutions Sdn Bhd (PGSSB) was invited as a contributor to the overall exhibition as part of the collaborative efforts by operating companies (OPCs) in positioning PIC as THE Regional Petrochemical Park.

HSE Walkabout @ PRPC Water

On 13th Feb 2023, a HSE Walkabout led by HSE Assurance Manager Khadijah Ibrahim was conducted. A total of 11 participants consisted of the Assurance team, subject matter experts (SMEs) from HSE PRPC En Umar A Aziz (Principal Industrial Hygiene), and En Irwan Hamdan (TP Environment) from AB Aliran Venture Sdn Bhd. The objective of the walkabout was to inspect some areas which included the Booster Vessel/Chambers, Chemical Storages, SW Storages, Diesel Tanks, Standby Generators and the Dam.

Some of the findings were on the chemical risk assessment, general waste disposal, septic tank maintenance, signages for biological hazards (snake), buoy which were not available at site. To complete the walkabout, briefing on functional assurance for chemical & Scheduled Waste management was done and the promotion on Single Use Plastic (SUP) was shared by En Irwan Hamdan

Tazkirah

بسم الله الرحمن الرحيم

Hadis daripada Abu Hurairah R.A bahawa Rasulullah s.a.w bersabda;
"Sesiapa yang berniat untuk melakukan suatu kebaikan namun dia tidak melakukannya, ditulis juga untuknya satu kebaikan. Sesiapa yang berniat melakukan kebaikan lalu dia melakukannya, dituliskan untuknya sepuluh kebaikan sehingga tujuh ratus gandaan. Sebaliknya sesiapa yang berniat melakukan kejahatan namun dia tidak melakukannya, tidak akan ditulis sebarang kejahatan untuknya, jika dia melakukannya barulah ditulis (satu kejahatan untuknya)".

(Riwayat Muslim)

OE R2

Ready to Proceed

94 days to go IIA

PRPC has embarked on OE R2 Journey in Oct 2021 towards becoming a World Class and Empowered Organisation. OE R2 Transformation is essential to achieve the End Game in realising the PIC Vision to be THE Regional Petrochemical Park.

PRPC has gone through some challenges in realising OE R2's implementation journey. Despite these challenges, leaders and staffs forged ahead with full preparation for the upcoming OE R2 Initial Implementation Assessment (IIA).

We saw leaders coming together to relentlessly engage and drive OE R2 implementation. UOF, PePSB and SPW, Jetty and Logistics have officially launched its OE R2 role play on 9th and 13th Feb 2023. This is a critical milestone in OE R2 implementation that signifies the commencement of transition from the current practice towards the new work process based.

Head of Transformation Planning of OE R2 Pn Roliza Ismail said "The successful OFWP Role Play launchings demonstrated PPRC UF's leadership and staff commitment towards achieving 'Ready To Proceed'.

The IIA, which will be held in May, is a pre-requisite for PRPC before it moves to the next stage with full implementation of OE R2 Role Play. Together, let's make it happen PRPC!

Be Brilliant at Basics

PPE compliance is the basic form of HSE Compliances in PIC. Hence, a campaign was carried out to reiterate the basic compliance by the SPW, SPJ and Logistic teams. The "Be Brilliant at Basics" was organised together with their business partners (Swift Logistic, Swiss Log, Flexi Scale, HIMS and SPTS) and PRefChem as a stakeholder.

The objective of the program was to increase the compliance level of Personal Protective Equipment (PPE) usage and increase the understanding and knowledge of the use of PPE, decrease PPE violations and incidents, ensure and strengthen compliance of ZETO Rules and the implementation of the Balance of Consequences.

The campaign been officially inaugurated by the Head of Plant Haji Zahri B Zainal Abidin on 8th Feb 2023. During the campaign launching, all the Business Partners Management representatives showed their commitment by attending the event and signing the pledge. This also showed that the business partners are committed and strongly support all the programmes organised by the team.

The main event of campaign will be conducted in the whole month of February and continuity of compliance will be observed throughout the year. During the launching, a total of 150 personnel joined the session where the Head of Plant delivered a speech on the importance of PPE and the implementation of Balance of Consequences to all stakeholders involved in SPW and SPJ operation.
