PRPC Townhall: Let's Bounce Back Together

It was time to meet again in the PRPC Townhall 2023, this year with the theme of Self-Directed Empowered Organisation and the spirit of Let's Bounce Back Together. The theme was a timely reminder for staff to take ownership of their work and to be empowered to make decisions. This is particularly important in today's rapidly changing business landscape where adaptability and agility are key to success.

PRPC SVP & CEO En Kamal Bahrin Ahmad took the centre stage to address about 760 physical and live attendees on last year's performance as well as what to look forward to in 2023 in addition to how we managed to bounce back up, on stakeholders management which will see a change from activi ties-based to outcome-based, striving for a head start on Sustainability, getting a positive outcome with one hand tied the PETRONAS Organisational Culture Survey (POCS).

He began the address by recognising staff on their key achievements which amazed him last year and reflected on the recent Townhalls by PETRONAS President and CEO Datuk Tengku Taufik and Downstream EVP & CEO Datuk Sazali Hamzah on "Delivering Our Purpose" and "Focus. Simplify. Perform." En Kamal Bahrin further emphasized that the company's success relies on the collective effort of all staff, and that everyone has a role to play in contributing to the company's growth and sustainability.

The event was followed by a lively Forum discussion on Creditor's Reliability Test (CRT), Fixed Tariff and Sustainability, Caught Doing Good (CDG) as well as the Focused Storytelling (FST) sharing. Moderators Rafiq Ramlee and Rhuee Rosle added to interactive discussion with questions that were nearer to the hearts of the staff which were answered by the panelists.

One of the key issues discussed at length during the Forum discussion was the Fixed Tariff. En Kamaruddin Kamid acknowledged that those have been contentious issues, and the company is working towards finding a solution that is fair and equitable for all stakeholders. The discussion also mentioned on how FT will enable us to have more control on our financials as well as expected behaviours in dealing and managing PRefChem's service request.

The Caught Doing Good (CDG) and Focused Storytelling (FST) sharings provided an opportunity for staff to share their success stories and best practices with their colleagues. This serves as a platform for staff to learn from each other and to celebrate their successes together.

Finally, the Focused Recognitions were also given out, with En Kamal Bahrin expressing his gratitude towards staff who have gone above and beyond in their work, and who have made a positive impact on the company and the community. This initiative serves as a reminder for all staff to continue striving for excellence and to make a positive impact in their work.

Overall, the PRPC Townhall 2023 was a great success, with En Kamal Bahrin and the Leadership Team demonstrating their commitment to transparency and open communication with staff. The Self-Directed Empowered Organisation theme was a powerful reminder for staff to take ownership of their work and to be empowered to make decisions, and the discussions during the Forum highlighted the importance of balancing various priorities for the success and sustainability of the company

Engaging with PIC neighbours

With the aim to captivate the hearts of the local Muslim communities in Pengerang, PIC continues to support the local communities in all engagements by strengthening warm ties with the people.

The "Program Bersama Komuniti" is aimed to contribute to the spiritual aspects by organising activities based on the local Muslims' religious beliefs to pray for a safe start-up and operations of PIC.

Together with BAKIP, the "Program Bersama Komuniti", which began in November 2022, has seen contributions amounting to nearly RM60,000, supporting more than 200 beneficiaries across seven communities around PIC.

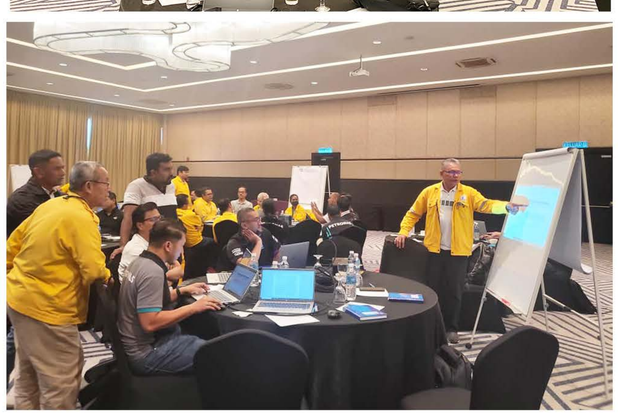
The programme series with the local Muslim communities in Pengerang covered seven mosques located in villages around PIC, including Masjid Thoriq Ibnu Zaid at KD Sultan Ismail.

What made it more meaningful is that Koperasi Jaya Teluk Ramunia (KOJAYA) was appointed to distribute food and beverages and also provide food aid supplies for 200 beneficiaries in supporting local businesses.

The programme wrapped up on 9 March 2023 at Masjid Al-Hijrah Taman Bayu Damai and saw 140 people from Taman Bayu Damai receiving contribution and food aid totalling RM28,000, in addition to the mosque receiving RM2,000.

Also present were Pengerang Municipal Council (MPP) member for Taman Bayu Damai area Encik Aminuddin Doll who also represented ADUN Tanjung Surat YB Tuan Aznan Tamin, Ketua Kampung Taman Bayu Damai Encik Ismail Jono, Masjid Al-Hijrah Taman Bayu Damai Imam Tuan Haji Rahim Padimin, PRPC Senior Manager (Stakeholder Management) Encik M Khairuddin Suradi and BAKIP Deputy Chairman Encik Mutapha Kamel Abd Rahman.

Collaboration Drives Innovation



In preparation for the upcoming PRPC UF's Utilities Test Protocol (UTP) and PRefChem's Creditors Reliability Test (CRT), ARISE 2.0 and Operation Assurance Department recently organised ARISE 2.0 Operate Safely Solutioning Workshop on 14 February 2023 at Four Points by Sheraton Desaru to tackle complex challenges facing PRPC UF. The workshop brought together key stakeholders from PRPC, PRPC UF and ARISE 2.0 TPs and SMEs, to collaborate and generate new ideas and find solutions on identified issues.

Leading up to the workshop, we worked closely with the Asset Owner to identify the key areas to be discussed during the workshop. Three key areas were identified, Piping & Facility Integrity programme, issues related to Effluent Treatment Plant (ETP) and spare part management. We also developed a comprehensive agenda that included a mix of presentations, breakout sessions, and group discussions to facilitate collaboration and idea-sharing.

The workshop was a tremendous success, with almost 40 participants joining the workshop, generating dozens of new ideas and solutions for the challenge at hand. Participants were encouraged to think outside the box and challenge conventional thinking, resulting in a wide range of innovative proposals.

One of the key takeaways from the workshop was the importance of cross-department collaboration in driving innovation. By bringing together stakeholders from different parts of our organisation, we were able to leverage diverse perspectives and expertise to generate new insights and solutions.

Since the workshop, several of the proposed solutions have been planned and implemented, resulting in significant progression on the solutioning of the identified issues. In addition, the workshop has helped to foster a culture of innovation and collaboration within our organization, with participants continuing to build on the ideas generated and continue working together in ensuring the execution of the solution to be completed on time prior to the UTP and CRT.

In conclusion, the solutioning workshop was a resounding success, generating new ideas and solutions, fostering cross-functional collaboration, and driving innovation and growth within our organisation, with the same objective to successfully pass the UTP and CRT. We look forward to building on the momentum generated by the workshop and continuing to push the boundaries of what is possible in our industry.

Tazkirah

بسم الله الرحمن الرحيم

Firman Allah dalam surah al- `Araf ayat 31

"Dan makan dan minumlah kamu, dan jangan berlebih-lebihan. Sesungguhnya Dia tidak suka orang yang berlebih-lebihan"
