

## Copper Bundle Assemblies

AFL's Copper Bundle Assemblies are a pre-terminated copper cable solution, designed to reduce installation time and clean up in the field. These assemblies are factory tested and pre-loaded into patch plates for use with AFL's 1RU Velocity patch panels.

The Copper Bundle Assemblies are available in both Cat6 and Cat6A, in unshielded and shielded† screen types.

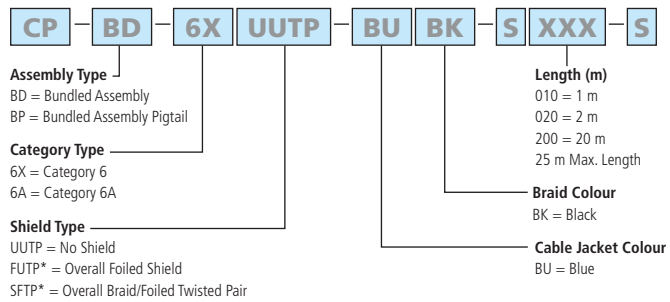

### Features

- Cat6 and Cat6A cabling.
- Unshielded and shielded cable and jacks.
- Pre-terminated and tested.
- Pre-loaded into patch plates.

### Applications

- 1000Base-T Gigabit Ethernet.
- 10GBase-T Gigabit Ethernet†
- Cross connects.
- Consolidation points.

### Ordering Information

\*F/UTP and S/FTP only available on Cat6A category cables

**Note:** For non-standard colours and configurations, please contact AFL for further details. MOQs may apply.
