

DOSSERT®

Type CB6R-50 Fusible Crab Connector 6 Outlet for 500 MCM Cable

A 6 outlet fusible crab connector for use with 500 MCM cables. Each outlet is provided with an independent fusible link which is connected to a common junction within the connector. A shell encases all of the fusible linkages and center junction to provide separate arcing cavities for each fusible linkage. A molded insulation covers the shell consisting of Myflex P-40 over which is placed a neoprene coating to increase aging life as well as oil resistance.
