

Participating Site Indirect Cost Rate Policy

The American College of Radiology (ACR), sponsor of the New IDEAS Study: Imaging Dementia-Evidence for Amyloid Scanning, has determined a maximum 25% indirect, or overhead, rate to amplify the direct cost funding available to the participating study site. Total reimbursement dollars per case, assuming submission of all case report forms, is capped at \$500. No additional funding is available should the actual overhead rate at a participating study site exceed the 25% indirect rate.
