
ACR 2019 DIGEST OF COUNCIL ACTIONS

Be it resolved that the ACR supports and encourages the use of core privileging methodology for physician privileging and re-privileging in the performance of imaging guided procedures by Diagnostic Radiologists and Interventional Radiologists, and

Be it further resolved that should procedural experience numbers be used for privileging and re-privileging, the numbers should be inclusive of a global compilation of an individual radiologist's imaging guided procedural experience, applicable to the spectrum of the core privileges, and

Be it further resolved that a core privileging statement be included in present & future relevant ACR imaging guided procedural practice parameter qualification sections, and

Be it further resolved that the ACR will prepare and regularly update a library of core privileging templates based on a compilation of institutional and national organizational core privileging documents provided as a resource for ACR members to use in their individual privileging and re-privileging environments.
