

For all cases, a hanging protocol has been created.

Series on the 1st page have been Zoomed and the Window Level has been optimized.

- 2D T2WI if 3D T2WI not available
- In some cases this include all the b-values. You may need to scroll through the images to see the high-b value images
- In some cases this includes all the time points of DCE. You may need to scroll through the images to reach the early arterial phase
- Axial T1WI delayed post-contrast if T1WI pre-contrast is not available
