

Dear Student,

Radiology-TEACHES was created to provide education about evidence-based clinical decision support and appropriate utilization of imaging. The foundation of the program is the [ACR Appropriateness Use Criteria \(ACR AUC\)](#). The ACR Appropriateness Use Criteria® (AUC) are evidence-based guidelines to assist referring physicians and other providers in making the most appropriate imaging or treatment decision for a specific clinical condition. Employing these guidelines helps providers enhance quality of care and contribute to the most efficacious use of radiology. By answering questions and consulting the ACR AUC you will also become familiar with one of the most widely used tools available to provide value-based patient care.

- Complete the education by clicking the links below for your assigned modules.
- A form will open and once submitted, the module will launch automatically.
- You must complete the education (approximately ½ hr.) in one sitting. If you exit the module, you will need to restart the module from the beginning.
- At the end of the module, you must complete the survey and submit to obtain the Certificate of Completion which will be emailed. Make sure to save the email and / certificate because it cannot be reproduced.

[The links to your assigned modules are available here.](#)
