- Penn State Health Neurology - Hershey, PA
- Cleveland Clinic - Cleveland, OH
- University of Arkansas for Medical Sciences, Reynolds Institute - Little Rock, AR
- Cleveland Clinic Nevada - Las Vegas, NV

Operations Updates

March

- The [ALZ-NET Portal](#) is now live for new case registrations. The Portal was designed to streamline user workflows by providing a one-stop solution for registering patients, managing site and staff information, submitting imaging data, and more. Review the [Portal Training](#). Please direct all questions or IT-related issues to alz-net@acr.org.

April

- The ALZ-NET Imaging Network is Now Live! Imaging Facilities can now upload brain scans for your patients when they partner with ALZ-NET. [Here is how it works.](#)
- Complete the [Imaging Network Intake Form](#) to let us know which imaging facilities should [Join the Network](#). This includes internal radiology departments!

May

- Advarra IRB Continuing Review (CR) Due by May 4th. All sites that received IRB approval, regardless of their date of initial approval, must submit a CR to Advarra IRB 30 days prior to the expiration date to ensure no lapse in coverage. [Submit my Site's Continuing Review.](#)

Register for the ALZ-NET Meeting AAIC 2025

Date: July 26th 9a.m-5p.m (Reception to follow)
Location: Toronto, Canada

This invite-only, in-person event is open to anyone involved in your site's ALZ-NET operations, including investigators, coordinators, and support staff. This meeting will provide a comprehensive overview of ALZ-NET updates, opportunities for professional learning, discussions on operational strategies, and insights into real-world implementation of new treatments in Alzheimer's care. [Register here.](#)

Tips and Tricks

1. Site Administrators - Confirm your Staff List in the [ALZ-NET Portal](#) is up-to-date to ensure an efficient workflow at your site. Prescribing clinicians must be added to staff list in order to show up as an option in the case registration form.
2. Download the latest version of the [Baseline](#) and [Follow-up Case Report Forms](#) (Last updated: April 2025).

Resources for Sites

Share your participation in ALZ-NET with your community! Request the ALZ-NET Logo Toolkit or request material approval from ALZ-NET. All marketing materials must be approved by ALZ-NET prior to use. Email alz-net@acr.org for all requests. Please read the [ALZ-NET Advertising Policy.](#)

ALZ-NET Site Spotlight

BAMF Health, Grand Rapids, Michigan

What does being a part of ALZ-NET mean to you?

Participating in ALZ-NET represents a significant commitment by BAMF Health to advance Alzheimer's disease research and treatment. By contributing real-world clinical and safety data, we aim to enhance understanding of novel therapies and improve patient outcomes. This collaboration aligns with our mission to integrate cutting-edge diagnostics and treatments, offering hope to patients and families affected by Alzheimer's disease.

What was the challenge you overcame when implementing ALZ-NET at your site?

Implementing ALZ-NET posed challenges, particularly in integrating its data collection protocols with our existing processes. Ensuring compliance with ALZ-NET's specific assessments required detailed planning and staff training by the BAMF Health research team. By leveraging the great resources provided by ALZ-NET and fostering open communication with their team, we successfully navigated these challenges.

How does your site stay organized in ALZ-NET to keep up with data submission timelines?

Our site stays organized in keeping up with data submission timelines by appointing clear ownership of this responsibility to a few staff members (one dedicated to clinical data entry and one dedicated to imaging data upload). Additionally, all members of our research team are willing to lend a helping hand and contingency plans have been set up to provide assistance to our primary personnel in case they are unexpectedly out or busy with other tasks to ensure our deadlines are still met.

BAMF Health ALZ-NET Team

What advice do you have for other sites to help ALZ-NET operations go smoothly?

For sites looking to streamline ALZ-NET operations, we recommend detailed staff education on ALZ-NET protocols and utilizing the comprehensive resources provided by the ALZ-NET team. Establishing clear communication channels with ALZ-NET coordinators facilitated prompt resolution of questions, ensuring smooth integration and operation.

How has it been enrolling patients in your clinic so far?

Patient enrollment has just begun but has also been encouraging. Many individuals and families are eager to participate, recognizing the potential benefits of new therapies and a feeling of giving back to the AD research community. Our comprehensive approach, combining advanced imaging technology and FDA-approved treatments, has facilitated seamless coordination of care, enhancing patient satisfaction and engagement.

Support for Sites

The ALZ-NET Operations Team at the American College of Radiology is available for network support, including protocol training, at any point during your participation in ALZ-NET. Office Hours are hosted twice every week on [Zoom](#). No appointment needed Tuesdays 12-2p EST, Wednesdays 2-4p EST.
