The Honorable Charles E. Schumer
Senate Minority Leader
322 Hart Senate Office Building
Washington, DC 20510

The Honorable Hakeem Jeffries
House Minority Leader
2267 Rayburn House Office Building
Washington, DC 20515

Dear Majority Leader Thune, Minority Leader Schumer, Speaker Johnson, and Minority Leader Jeffries:

We, the undersigned organizations, all committed to improving outcomes for individuals with sickle cell disease (SCD), strongly urge you and your colleagues to adopt the *Sickle Cell Disease Comprehensive Care Act* (S. 721/H.R. 5178) as part of an end-of-year legislative package. Led by Senators Tim Scott and Cory Booker and Representatives Neal Dunn, MD, and Danny Davis, this bipartisan, bicameral legislation would appreciably improve care for Medicaid beneficiaries living with SCD, the most common inherited red blood cell disorder in the United States.

According to the Centers for Disease Control and Prevention (CDC), SCD affects one out of every 365 Black or African American births and one out of every 16,300 Hispanic American births, affecting an estimated 100,000 people. Individuals with SCD are living longer but, unfortunately, many receive uncoordinated, inconsistent care, leading to poor clinical outcomes, avoidable complications, low quality of life, and increased costs to the healthcare system. Additionally, individuals with SCD suffer from acute pain episodes and chronic pain and may be affected by an array of other organ complications, which can cause disability or even death. A Centers for Medicare & Medicaid Services (CMS) report found that approximately 50% of individuals living with SCD in the United States are covered by Medicaid.

The *Sickle Cell Disease Comprehensive Care Act* authorizes state Medicaid programs to submit a state plan amendment to establish SCD health homes to deliver coordinated and comprehensive care. The health home model is a proven care delivery model in Medicaid that has been widely used by states to improve quality, enhance care, and reduce unnecessary costs. Health homes for SCD will help to alleviate the many challenges and disparities in care that individuals with SCD have faced for far too long. This bill ensures a multi-faceted approach to care, ensuring SCD patients have access to coordinated clinical, mental health, and ancillary services to address their physical, mental, and social needs.

By building on existing programs for qualified Medicaid enrollees, the *Sickle Cell Disease Comprehensive Care Act* will reach more people living with SCD by allowing any state the opportunity to establish a health home with SCD as the sole qualifying condition. This health home eligibility expansion will also benefit people living with SCD who are transitioning from pediatric to adult care, where studies demonstrate there are often significant challenges maintaining continuity of care.

Congress has an opportunity – and an urgent responsibility – to transform care for Medicaid beneficiaries living with SCD. By establishing SCD as a single qualifying condition for health homes, this legislation will fundamentally change how care is delivered, improving access to comprehensive, coordinated care, reducing preventable complications and costly hospitalizations, and improving quality of life for individuals who too often been overlooked by our health care system. With the end of the 119th Congress rapidly approaching, we cannot let this opportunity slip away. We strongly urge you to prioritize passage of the Sickle Cell Disease Comprehensive Care Act before the end of the year and deliver meaningful, long-overdue improvements in care for people living with SCD.

Thank you.
