Ship Returns To

Pacific Design Technologies
6300 Lindmar Drive
Goleta, CA 93117

P.O.#	PDT NC# and Supplier RMA# if applicable	AMETEK-PDT Part Number	Serial Number (if applicable)	Quantity	Description of rework performed or note if parts were replaced

NC Return Shipper Instructions

To ensure smooth processing of returned materials, please follow these steps carefully:

1. **Provide Detailed Part Information**: include the P.O. number, PDT NC number and/or Supplier RMA number, Part Number, Serial number (if applicable), Quantity and Description of the rework performed (or note if parts were replaced).

2. **Package Parts Properly:** each part must be individually wrapped as applicable. Use protective packaging to prevent damage during shipping or handling.

3. **Separate reworked parts from new production parts:** if you are shipping reworked parts together with new production parts, clearly label and separate/ tag the parts to avoid confusion.

Include the Completed NC Return Shipper: attach the filled-out NC Return Shipper to the shipment paperwork (e.g., certifications, CoC). Alternatively, you may email the completed NC Return Shipper to your AMETEK-PDT contact (Buyer or Planner) as mentioned on the P.O. This ensures quick identification of reworked parts, speeds up processing in our receiving department, prevents delays, and helps us close NCs faster for prompt payment.
