

MAINTENANCE CONTRACT

PREVENTION THAT PAYS OFF

With a maintenance contract, you choose a proactive solution that ensures the long-term reliable operation of your machine. Regular, professionally performed maintenance allows potential risks to be identified at an early stage, minimizing unplanned downtime and making costs more predictable. Benefit from a clearly structured service concept that combines convenience, cost transparency, and top quality – for maximum efficiency and safety in your daily production operations.

For further information or the preparation of a quotation, our service department will be happy to assist you:

Your benefits at a glance:

- **Prevention** Regular maintenance reduces downtime and helps prevent costly repairs.
- **Convenience** We handle the complete planning and coordination of all maintenance activities – tailored to your needs and with no additional effort required from you.
- **Cost certainty** Three maintenance levels with clearly defined prices provide full cost transparency over the entire 3-year term.
- **Cost advantage** Benefit from savings of over 18% compared to standard conditions for labor, travel time, and travel expenses.
- **Expertise** All maintenance is carried out exclusively by qualified Kern service technicians.
- **Reliability** A maintenance contract ensures stable and efficient operation of your Kern machine.
- **Warranty** For the Kern Micro HD, you receive a warranty on the axis system for the entire contract period – up to a maximum machine age of 10 years.
- **Value retention** Long-term preservation of machine value through professional care.
- **Original quality** Only tested original manufacturer parts are used.
- **Guarantee** All service work comes with a 6-month warranty.
- **Certification** Our services meet the highest quality and environmental standards in accordance with ISO 9001 and ISO 14001.
