

CoDaq

New Software for Astrum

Unlock The Future Of Modern Materials Analysis

Astrum CoDaq software offers the ultimate user experience for modern industrial applications, available as an upgrade for existing Astrum and Astrum ES users.

CoDaq fits seamlessly into your workflow with modern design and enhanced control features:

- Source autotune
- Multi-language display – English, Simplified Chinese and Japanese
- Intuitive workflow-based user interface
- Automated detector calibration
- Temperature controlled cryo-cooling

Launching in 2025, NuQuant Data Analysis software will be available to all CoDaq users for no additional cost. NuQuant takes an intelligent approach to data analysis, reducing data processing times and improving functionality.
