

# SmartTank ST40 Propane

## Small Tank Distribution. Big Tank Margins.

SkyBitz Small Tank LPG Monitoring Solution is now within the SmartTank Platform

The SmartTank ST40 monitor solution and SkyBitz data portal is the perfect solution for propane. Cost-effective and streamlined through one application, propane marketers and distributors gain maximum efficiency for propane deliveries, with real-time data that takes the guesswork out of forecasting. Deliver product to the tanks that need it, saving you labor and fleet costs while improving your overall customer experience.

SkyBitz combines rugged hardware, a reliable cellular network, and a secure web portal for total visibility across all of your smaller propane tanks. Designed with the impending 3G sunset in mind, the SmartTank ST40 is future-proof, offering 4G LTE cellular communications with 3G fallback where LTE is not available. Convert your small propane distribution approach into a more profitable business using data intelligence and fast, scalable tank monitoring from SkyBitz.

**Fast Installation** for large-scale deployment requirements

**4G LTE** with 3G Fallback & multi-carrier compatibility

**5+ year battery life**

**SmartTank** robust **analytics**

Designed & tested to **IP-X8 Submersible Standard**

Multiple **mounting options** including brackets, straps, and lock system

**Over-the-air configurable updates** eliminate manual servicing
