

A MODERN LOOK THAT'S EASY ON THE BUDGET

Whether you're replacing, remodeling or building new, Andersen® 100 Series products offer many advantages over vinyl at a good value. They're made with innovative Fibrex® composite material which is 2X stronger and more durable than vinyl. They're also energy-efficient, environmentally responsible and available in a variety of rich, dark colors with finishes that are made to last*, making them a better choice for your home.

- Fibrex material retains its stability and rigidity in all climates, so weathertight seals stay weathertight
- Fibrex material blocks thermal transfer nearly 700X times better than aluminum, helping to reduce heating and cooling bills
- The finish on 100 Series products offers superior scratch resistance and won't fade, flake, blister or peel*
- 100 Series products can withstand temperatures up to 150°F, even in dark colors, meaning they won't warp due to sun exposure
- Virtually maintenance-free premium matte finish inside and out
- Insert windows available in custom sizes for easy replacement

ENVIRONMENTALLY RESPONSIBLE

Fibrex composite material is composed of 40% reclaimed wood fiber by weight.

*Visit andersenwindows.com/warranty for details.

**When 100 Series products were tested against five leading competitors' painted vinyl window products.
