

AGL

AFRICA GLOBAL LOGISTICS

An integrated and well-managed supply chain, serving healthcare in Africa

HEALTHCARE

AN INTEGRATED AND WELL-MANAGED SUPPLY CHAIN

AGL provides comprehensive logistics solutions, combining efficiency and cost-effectiveness through a personalized and innovative approach. As a logistics healthcare specialist, we offer tailor-made services based on GDP-certified platforms, cold chain expertise, and real-time traceability tools. Thanks to our secure corridors connecting global hubs to African markets and continuous operational monitoring, we ensure continuity, compliance, and performance of critical flows from the first to the last mile.

OUR VALUE PROPOSITION

At AGL, we support the transformation of healthcare supply chains in Africa by ensuring certified, traceable logistics solutions that comply with international standards.

Our expertise covers the full range of needs across the sector:

Pharmaceutical and biotechnology companies
Generic pharmaceuticals & medical device manufacturers

Distributors and wholesalers
Health authorities, multilateral agencies, NGOs

UNDERSTANDING YOUR LOGISTICS CHALLENGES

With a population expected to exceed 1.6 billion by 2030 and rapidly increasing healthcare needs, Africa is becoming a key focus for global health. Supply chains must evolve to keep pace with this transformation.

- **Strengthening the cold chain and last-mile coverage**
- **Combating counterfeiting through traceability**
- **Simplify and digitalize pan-African logistics flows**

Challenges	Impacts	AGL's Response
Cold chain	Batch losses, risks for patients	Infrastructure / GDP IoT Solutions
Flow visibility	Overstocks, shortages	Control tower / Real-time traceability
Counterfeiting	Threats to public health security	Secured flows / Regulatory compliance
Delays in access to healthcare	Project delays and inefficiency	Express transport / Strategic hubs
Customs blockages	Unexpected costs, delays	Compliance support / Local expertise Bonded storage

INTEGRATED LOGISTICS SOLUTIONS

MULTIMODAL TRANSPORT

- Air
- Ocean
- Road
- Rail
- Dedicated charter

VALUE-ADDED SERVICES

- Packaging
- Regulatory labeling
- Postponement / late-stage customization
- Order preparation

COLD CHAIN

Air ULDs and refrigerated sea containers, with real-time temperature monitoring across critical ranges: -25 °C, +2 °C to +8 °C, +15 °C to +25 °C

SECURE DELIVERY

For last-mile distribution, including remote or hard-to-reach areas, through adapted multimodal solutions (road, river, rail, motorbikes).

PLATFORMS & WAREHOUSES

GDP-certified, temperature-controlled, with management of withdrawals, recalls, and quarantines

ENSURE THE INTEGRITY AND EFFICIENCY OF HEALTHCARE PRODUCTS

AGL's offering is built on a strong operational and quality foundation:

GDP-certified infrastructures, aligned with WHO-GDP and ISO 9001, under a harmonized Quality Management System (QMS)

Strict cold chain control and end-to-end traceability enabled by IoT solutions

Active anti-counterfeiting processes: secured infrastructures and flows, reinforced documentation management

Expert teams trained in pharmaceutical and healthcare logistics best practices

Unique geographic coverage with integrated hubs and secured corridors, enabling optimized intra-Africa distribution

Tailored last-mile solutions, deployed with health authorities and NGOs

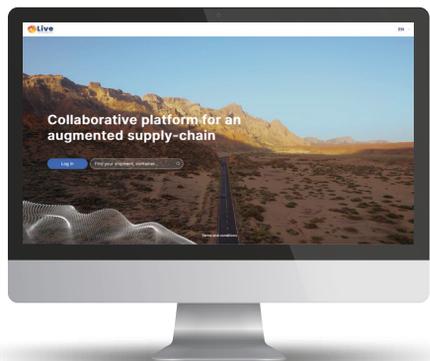

Centralized monitoring of critical operations 24/7 via regional control towers

PROVIDING A GLOBAL VISION

A collaborative platform designed to provide you with end-to-end visibility across your supply chain.

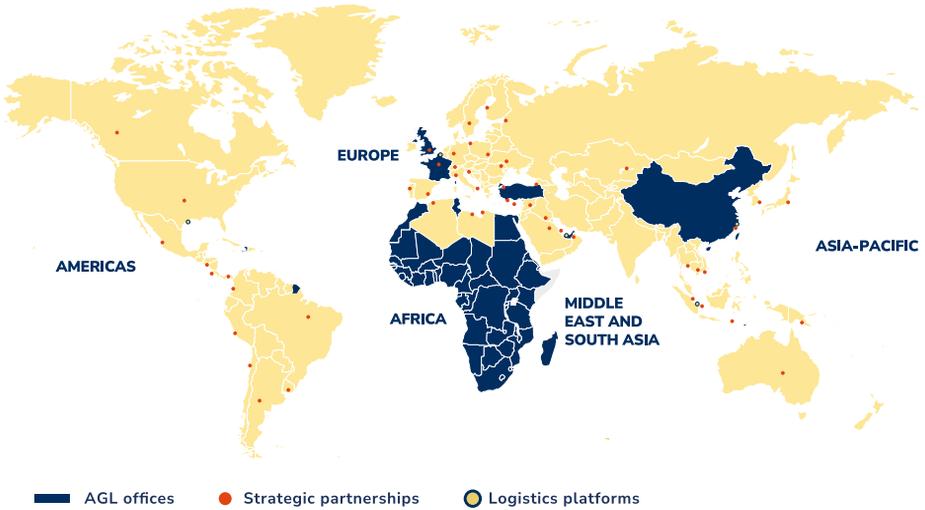

- Real-time visibility
- Predictive insights
- Simplified document management
- Analytics and reporting
- Seamless communication

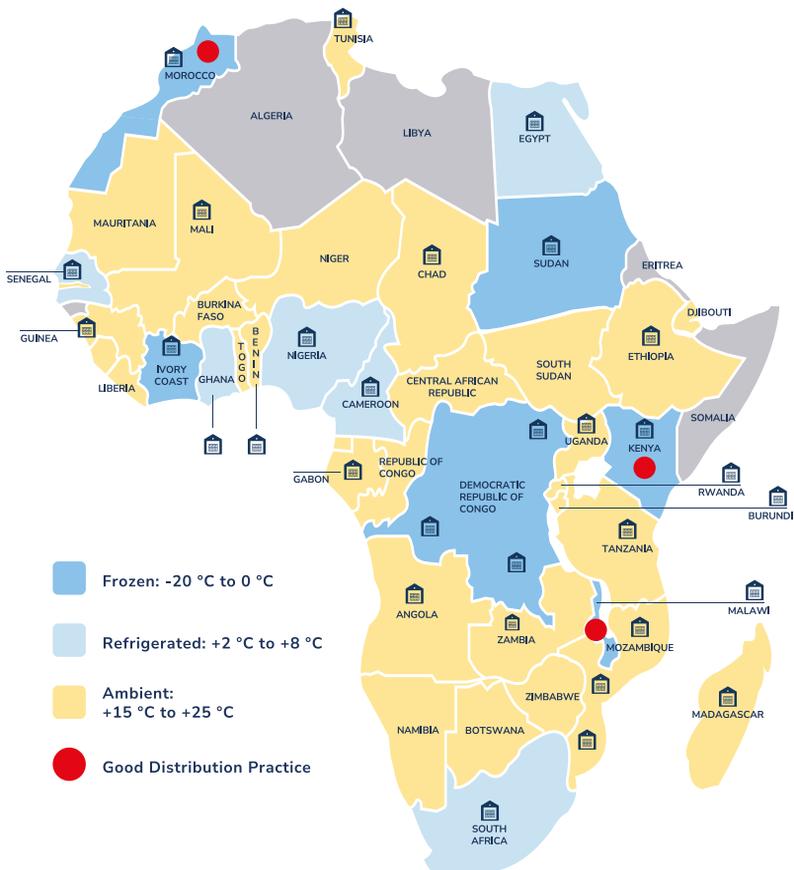

OUR NETWORK

International logistics network

To deliver world-class healthcare logistics, AGL relies on an international network of interconnected hubs across Africa and beyond.

Our capabilities across the African continent

OUR 2024 LOGISTICS KEY FIGURES

 **247**
CFS sites / freight warehouses
(900,000 sqm)
