

Drive logistics for Africa's digital rise

TELECOM &
TECHNOLOGY

AN INTEGRATED SUPPLY CHAIN

AGL offers a comprehensive range of logistics solutions designed to strengthen the operational performance of its customers and support their competitiveness. As a major player in the development of telecommunications in Africa, AGL coordinates all telecom and technological flows - from network equipment and infrastructure to final distribution.

AT THE HEART OF YOUR LOGISTICS

The African telecoms and technology market is booming, driven by increasing connectivity and the emergence of new use cases. This dynamic is accompanied by challenges related to the diversity of infrastructures, uneven storage capacities and the complexity of distribution operations.

To support this growth, AGL deploys reliable logistics solutions adapted to the requirements of these industries:

Equipment Manufacturers (OEMs)

Tower operators

Fiber optic players

Mobile network operators

Consumer technology products

By relying on an agile and controlled supply chain, we optimize flows, strengthen operational efficiency and accelerate time to market.

A GLOBAL LOGISTICS APPROACH

AGL deploys its range of services within an integrated, fluid and controlled supply chain, offering visibility, operational performance and service continuity to support the deployment of networks and technologies.

INBOUND LOGISTICS

- Order and supplier management
- Transport multimodal
- Value-added services: packaging, light assembly, quality control

DYNAMIC TRACEABILITY

- Real-time flow management
- Proactive alert management
- Performance Analysis

OUTBOUND LOGISTICS & SPARE PARTS

- Optimized warehouse and regular inventories
- Dangerous goods management (incl. lithium batteries) according to enhanced safety standards
- Out-of-gauge transport & project logistics
- Dealer supply & last mile delivery
- Returns logistics (maintenance, repair, recycling)

Customs Focus — AGL Expertise

- Close relationship with customs authorities
- Automation of declarations via digital tools
- Management and optimization of customs procedures: compliance, declarations, economic regimes, costs related to duties and taxes
- Mastery of sensitive formalities (inspections, certifications, high-risk or high-value goods)
- Smooth processing of imports and exports, from pre-clearance to final availability

AN INTEGRATED AND EXPERT SYSTEM

AGL's expertise in telecoms and technology is based on:

A network of specialists and experienced project managers.

Interconnected hubs covering the entire continent and beyond.

Strategically positioned assets in West, Central and East Africa, and effective corridor management to serve landlocked areas.

Strict procedures to ensure regulatory compliance.

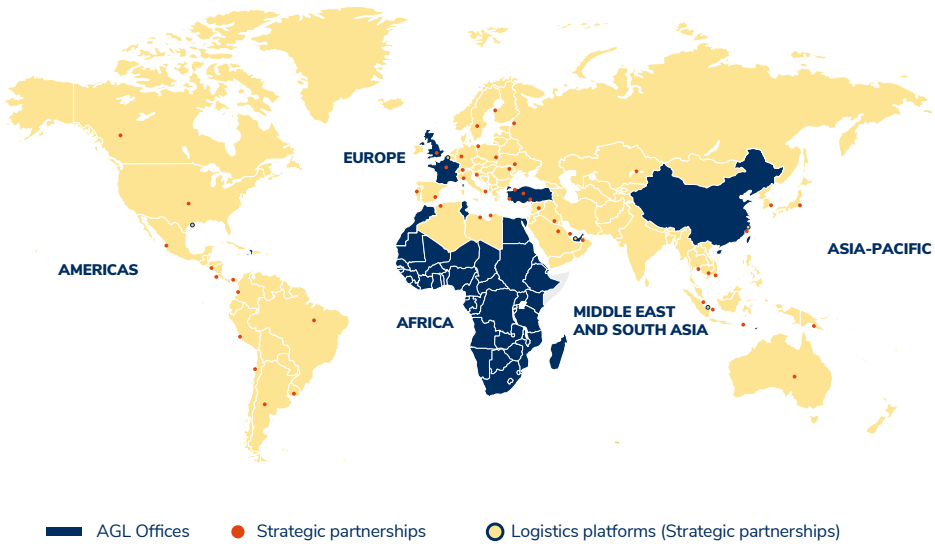

The  **Live** platform that centralizes flow monitoring, control and ensures complete traceability through IoT solutions.

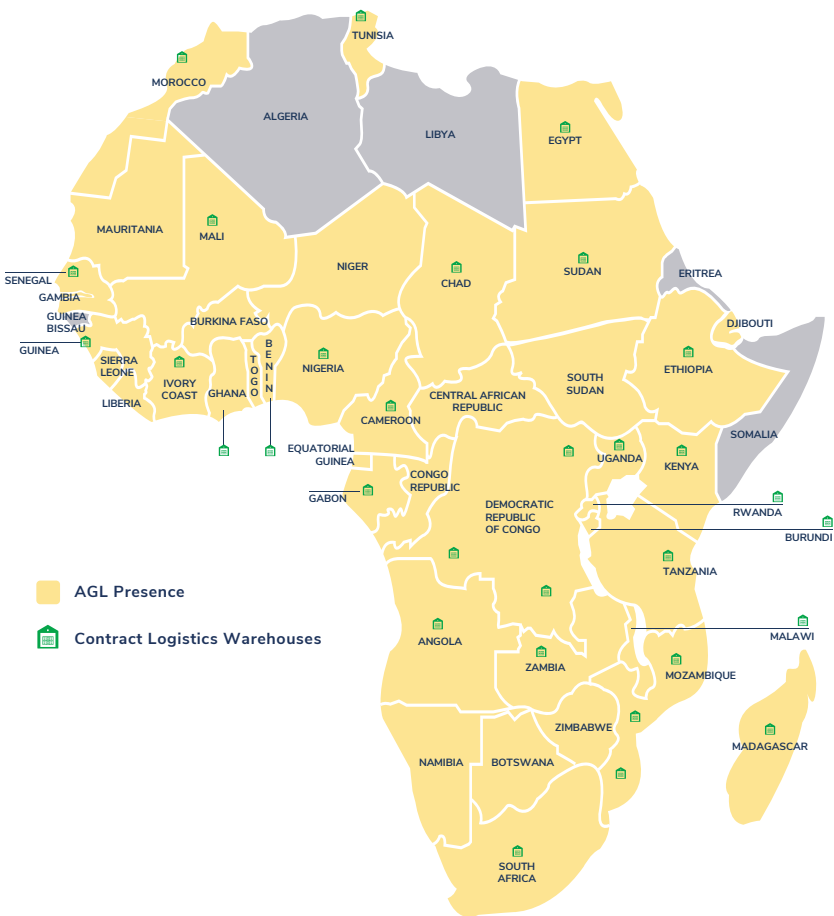

OUR NETWORK

International logistics network

To conduct its logistics operations, Africa Global Logistics relies on a network of interconnected hubs across the continent and beyond.
