

# INFORMATION SECURITY POLICY

As a leader in the provision of integrated logistics services, including port operations, rail operations, international transport, customs and regulatory compliance, logistics and supply chain for various sectors, the success of **Africa Global Logistics («AGL »)** company is based on the prioritization of Information Security in the performance of our activities.

In a context marked by the intensification of digital risks and the continuous transformation of our activities, The Group Executive Management reaffirms a total and sustainable commitment to the implementation of an Information Security Management System («ISMS») in compliance with the ISO/IEC 27001 :2022 standard. The initial scope of the ISMS covers the design, development, testing, deployment, maintenance and security of the port operations billing system. In the long term, the objective is to extend the certification to all AGL's activities, in a logic of continuous improvement.

Our Information Security commitments are as follows:

Develop a best-in-class security program aligned with international cybersecurity standards and built on a risk-based approach

Protect the AGL Group from threats by applying security-by-design principles to prevent incidents

Continuously test, validate, and enhance the information security framework

Ensure compliance with applicable legal, regulatory, contractual, and internal requirements

Strengthen the resilience and availability of the AGL Group's services

To achieve these objectives, our actions are based on the following principles:

- Allocate the human, technical, and financial resources required to implement and continually improve the ISMS;
- Foster a security-focused organizational culture across all levels;
- Integrate security into core business processes, ensuring operations are conducted securely and proportionately to the identified risks;
- Ensure incidents are managed effectively to enable timely detection, response, and recovery.

**This is critical to the success of our business. Each manager exercises his or her leadership to implement this policy within the scope of activity for which he or she is responsible.**
