Subject RBA Membership Commitment

Dear stakeholders,

ASML is a focused supplier of holistic lithography solutions to all of the world's major chipmakers. At ASML, we believe digital technologies can have a positive impact on the world – supporting society to make progress and addressing environmental and social challenges. At the same time, we recognize that new technology comes with challenges and are committed to conducting business in a caring and accountable manner.

Since 2011, ASML has been a member of the Responsible Business Alliance (“RBA”), the world's largest industry coalition dedicated to responsible business conduct in global supply chains. We fully support the vision and goals of the RBA as we believe collaboration with our peers, suppliers, customers and other stakeholders is key to creating better social, economic and environmental outcomes for all.

We have adopted the RBA Code of Conduct (“RBA Code”) and commit to comply with its provisions in our own operations, progressively implementing the RBA approach and tools in the spirit of the industry's common goals for promoting safe working conditions, worker rights, environmental responsibility, responsible sourcing of minerals, and business ethics.

We also require suppliers to comply with the RBA Code and cascade this requirement to their suppliers, and encourage them to develop and implement sustainability strategies, policies and processes. As such, we commit to progressively apply the RBA Code to our first tier suppliers, to monitor its application to the best of our ability, and to encourage and support our suppliers to do the same.

On behalf of ASML and in support of our RBA membership,

Yours sincerely,

Christophe Fouquet
Chief Executive Officer
