Investor key messages

- Global megatrends in the electronics industry, supported by a highly profitable and fiercely innovative ecosystem, are expected to continue to fuel growth across the semiconductor market
- Growth in semiconductor end markets and increasing lithography intensity are driving demand for our products and services
- We plan to ship a record number of systems in 2022 but supply chain constrains result in delayed starts and drive more fast shipments
- ASML's comprehensive product portfolio is aligned with our customers' roadmaps, delivering cost effective solutions in support of all applications from leading edge to mature nodes
- Based on different market scenarios as presented during our Investor Day in September 2021, we presented an opportunity to reach annual revenue in 2025 between approximately €24 billion and €30 billion, with a gross margin between approximately 54% and 56%
- As presented at our Investor Day in September 2021 we see significant growth opportunities beyond 2025 and we expect our systems and Installed Base Management¹ could provide an annual revenue growth rate of around 11% for the period 2020-2030²
- ASML and its supply chain partners are actively adding and improving capacity to meet current and future customer demand. Based on market developments we are looking at feasibility of further increasing our capacity beyond what we presented during our September 2021 Investor Day
- In light of the demand and our plans to increase capacity, we expect to revisit our scenarios for 2025 and growth opportunities beyond, which we plan to communicate during our Investor Day on 11 November 2022
- We are continuously striving to improve our performance on ESG Sustainability KPIs and are upgrading our ESG Sustainability strategy to accelerate progress
- We expect to continue to return significant amounts of cash to our shareholders through a combination of growing dividends and share buybacks
