Elemental Toxicity: Case Reports and the Role of Laboratory Testing

Speaker: Paul J. Jannetto, Ph.D., DABCC, FADLM, M.T. (ASCP)
Laboratory Director and Professor in the Department of Laboratory Medicine and Pathology at the Mayo Clinic

Learning Objectives:

1. Recognize and correlate the physical, clinical laboratory, and anatomic findings related to occupational, environmental and/or intentional toxic element exposure.
2. Identify and correctly interpret the appropriate laboratory tests which should be used to detect and/or monitor exposure for several toxic elements.
3. List appropriate treatment strategies for heavy metal toxicity.

Registration:

Virtual and In-person attendance welcomed!
