

ADLM GREATER CHICAGOLAND
SECTION PRESENTS

FYI ON LDTs

A LIFECYCLE OVERVIEW FROM DEVELOPMENT TO GO-LIVE

MARCH 26, 2025

2:00PM CST

Virtual

Join the Greater Chicagoland Local Section for a virtual meeting to hear from Michelle Campbell, MS, MT (ASCP) SC, about Laboratory-Developed Tests (LDTs).

RSVP [at this link](#) (or) by email end of March 24th, 2025 to Vishnu Samara at vsamara@bsd.uchicago.edu to receive log-in information to join the meeting.

ACCENT credits pending for 1.0 hours

Identify the key stages in the lifecycle of laboratory-developed tests (LDTs), from initial design through “going live” in the clinical laboratory.

Describe the process of developing, validating, and implementing an LDT in a clinical laboratory setting.

Understand the current regulatory landscape for LDTs and how it impacts test development and use in clinical practice.

Analyze real-world examples of LDTs to better understand practical challenges and solution in test development.

Discuss strategies for navigating the complexities of LDT implementation and ensuring quality and compliance in laboratory testing.
