

PT201: Contents

Preface	xi
Lesson 1. Working with Pro Tools HD Hardware Systems	1
Pro Tools System Basics	2
Components of Pro Tools HD Hardware Systems	2
Pro Tools HD Audio Interfaces	5
Understanding the Pro Tools Mixer	6
HD Native Technology	6
Floating Point Processing	7
Optimizing Pro Tools HD Hardware Systems	8
Hardware Setup Configurations	8
Setting Pro Tools Playback Engine Options	11
Viewing System Usage	14
Review/Discussion Questions	17
Exercise 1. Optimizing System Usage	18
Lesson 2. Customizing Pro Tools	25
The I/O Setup Dialog Box	26
Controls in I/O Setup	27
I/O Setup Options	27
Active and Inactive Paths	28
Creating and Editing Paths	28
Importing and Exporting I/O Settings	31
Pro Tools HD Native Hardware Low Latency Monitoring	33
Configuring Low Latency Monitoring in I/O Setup	33
Toggling Low Latency Monitoring On/Off in a Pro Tools Session	33
Working with Window Configurations	34
What are Window Configurations?	34
Creating a Window Configuration	34
Using the Window Configuration List	35
Settings Included in Window Configurations	35
Recalling Window Configurations	36
Updating Window Configurations	36
Storing Window Configurations in Memory Locations	36
Making Track Assignments	37
Identical Assignments (Recap)	37
Cascading Assignments	38
Pro Tools Metering and Display Options	38
Track Metering Options	38
Gain Reduction and Send Level Display Options	40
EQ Curve Display	41

Customizing Pro Tools through Preferences.....	41
Display Preferences.....	42
Operation Preferences.....	43
Metering Preferences	44
Review/Discussion Questions	46
Exercise 2. Configuring Pro Tools Ultimate.....	48
Lesson 3. Session Configuration and Track Management.....	57
Voice Allocation.....	58
Track Priority	58
Changing the Priority of Tracks.....	58
Deactivating Tracks	59
Disk Allocation.....	60
Changing Disk Allocation.....	60
Selecting Disk Allocation Options for New Tracks	61
Reallocating Tracks	62
Scrolling, Navigation, and Display Options	62
Edit Window Scrolling Options	62
Navigation and Playback Techniques.....	63
Scrolling to a Track in the Mix and Edit Windows	64
Applying Custom Colors to Tracks and Clips	65
Applying Marker Colors.....	65
Applying Opacity Levels to Track Colors.....	66
Status Indicators.....	67
Data Online Indicators.....	67
Delay Compensation Indicator	67
Sync Status Indicators	67
Duplicating Tracks	68
Using the Duplicate Tracks Function	68
Using the Commit Tracks Function	69
Sharing Tracks for Collaboration	72
Exporting Tracks for Editing or Additional Recording	72
Using Cloud Collaboration to Share Tracks.....	74
Using Track Bounce to Export Tracks as Audio Files.....	76
Using Track Presets.....	77
Review/Discussion Questions	79
Exercise 3. Navigating and Color Coding the Session.....	81
Lesson 4. Session Management.....	87
Managing Media with Workspace Browsers.....	88
Working with Sound Libraries	88
Working with Volumes.....	89
Working with Session or Project Media	89
Working with Track Presets.....	90
Working with Catalogs	90
Working with User Locations.....	91

Using Workspace Browsers	92
Searching Items	92
Workspace Browser Pop-Up Menu	95
Workspace Right-Click Menu	95
Customizing the Workspace Browser Display	96
Column Data	99
Indexing Volumes	100
Tagging Files	101
Task Manager Overview	102
Task Manager Columns and Displays.....	103
Pausing and Canceling Tasks	103
Failed Tasks.....	104
Pausing Tasks During Playback.....	104
Sessions with Missing Files.....	104
Opening Sessions with Missing Files.....	105
Relinking Missing Files in an Open Session	105
Find All Candidates vs. Find Links	106
Review/Discussion Questions	110
Exercise 4. Managing Session Media.....	113
Lesson 5. Selection Techniques	121
Creating Selections.....	122
Timeline Selections	122
Edit Selections	123
Working with Timeline and Edit Selections.....	124
Additional Selection Techniques	126
Selecting Left or Right of the Cursor.....	128
Linking Track and Edit Selections	129
Nudging and Shifting.....	130
Nudging Audio Clips.....	130
Nudging Edit Selections.....	131
Trimming with Nudge	132
Nudging a Clip’s Contents.....	132
Using the Shift Command.....	133
Auditioning Selections	134
Shuttle Mode with the Scrubber	134
Changing How the Scrubber Tool Affects Selections.....	135
Making Selections with the Scrubber Tool	135
Auditioning the Start and End of a Selection	136
Pre-Roll Audition and Post-Roll Audition.....	136
Auditioning with Commands Keyboard Focus Mode Shortcuts.....	136
Storing Selections in Memory Locations	138
Memory Location Properties.....	138
Working with Selection-Based Memory Locations	139
Review/Discussion Questions	142
Exercise 5. Working with Selections	144

Lesson 6. Editing Techniques	151
Alternate Tools and Tool Functions.....	152
Alternate Zoomer Tool Functions	152
Alternate Trim Tool Functions.....	153
Alternate Selector Tool Functions	156
Alternate Grabber Tool Functions	156
Smart Tool Functions (Recap).....	158
Clip Editing Techniques	160
Using Strip Silence.....	160
Configuring Auto Fades (Pro Tools Ultimate Only).....	162
Applying Batch Fades.....	162
Using Fade Presets.....	164
Adjusting Fade Boundaries.....	164
Clip Alignment Techniques.....	165
Creating Sync Points	165
Spotting to Sync Points.....	166
Aligning a Clip's Start (Snap to Head).....	166
Aligning a Clip's End (Snap to Tail).....	167
Aligning a Clip's Sync Point (Snap to Sync Point).....	168
Snapping Clips to Previous and Next Clips	168
Commands Keyboard Focus Mode	169
Enabling Commands Keyboard Focus	169
Commands Keyboard Focus Shortcuts	169
Nudging with Commands Keyboard Focus.....	170
Review/Discussion Questions	172
Exercise 6. Editing Session Media.....	174
Lesson 7. Clip-Based Processing.....	181
Clip Gain Basics.....	182
Static Versus Dynamic Clip Gain.....	182
Clip Gain versus Automation.....	182
Clip Gain Display Options	182
Editing Clip Gain	183
Using the Clip Gain Fader	183
Using Edit Tools and Functions.....	184
Advanced Clip Gain Functions.....	188
Converting Between Clip Gain and Volume Automation.....	189
Coalescing Between Clip Gain and Automation.....	190
Bypassing Clip Gain	191
Rendering Clip Gain	191
Using Clip Effects (Pro Tools Ultimate Only).....	192
Displaying Clip Effects	192
Applying Clip Effects.....	192
Identifying Clips Containing Clip Effects.....	194
Removing and Rendering Clip Effects	194
Review/Discussion Questions	196

Exercise 7. Working with Clip Gain	198
Lesson 8. Automation Functions.....	203
Pro Tools Ultimate Automation Modes	204
Automation Mode Functions.....	204
Touch/Latch Mode Scenario	204
Working with Automation	205
Enabling Automation	205
Viewing Automation while Writing.....	206
Viewing Multiple Automation Playlist Graphs	206
Resizing Automation Lanes	208
Automating Plug-Ins.....	208
Automation Preferences	210
Using AutoMatch Functions.....	211
AutoMatch Time	211
Global AutoMatch.....	211
Channel AutoMatch	212
Individual Parameter AutoMatch	212
Writing Automation over Long Sections.....	213
Manual Write Buttons	213
Write on Stop Buttons.....	214
Editing Automation	215
Toggling Automation Follows Edit.....	215
Special Cut, Copy, Paste, and Clear Commands	216
Trimming Automation with the Trim Tool	217
Extending Automation Values Later or Earlier	219
Suspending Automation.....	220
Globally Suspending Automation.....	220
Suspending Automation on Tracks	220
Suspending Individual Automation Parameters	221
Review/Discussion Questions	222
Exercise 8. Automating a Mix	224
Lesson 9. Mixing and Plug-In Processing	231
Common Mixing Settings	232
Solo Modes: SIP versus AFL/PFL	232
Solo Button Behaviors	233
Mixing Preferences	234
Basic Submixing	235
Bus Routing.....	235
Bus Interrogation	236
Plug-In Linking.....	237
Using Multi-Mono Plug-Ins	237
Working with Individual Plug-In Channels.....	237
Linking Channel Subsets	238
Relinking All Channels.....	238

Working with Plug-In Settings	239
Recalling Settings with the Plug-In Librarian Menu.....	239
Using the Plug-In Settings Menu.....	240
Plug-In Settings Storage Locations	240
Saving Plug-In Settings.....	241
Importing, Copying, and Pasting Plug-In Settings.....	242
Deleting Plug-In Settings	243
Selecting and Navigating Plug-In Presets	243
Side Chain Processing	245
Using Key Input Filters.....	246
Using Side-Chain Processing.....	246
Processing-Induced Delays	247
Showing Sample Delay	248
Automatic Delay Compensation	248
Review/Discussion Questions	251
Exercise 9. Submixing and Processing Tracks	253
Lesson 10. Advanced Mixing and Finishing Techniques.....	259
Group Attributes.....	260
Global Attributes	261
Modifying Attributes.....	261
Group Attribute Presets.....	262
Working with Groups.....	263
Enabling and Disabling Groups	263
Selecting Members of a Group (Recap).....	263
Showing/Hiding Members of a Group	263
Suspending and Isolating Group Functions.....	264
VCA Master Tracks	265
Creating a VCA-Controlled Group.....	265
VCA Track Controls	267
VCA Level Meter.....	268
Creating a Final Mix	268
Mixdown Options	268
Routing Tracks to Multiple Outputs.....	268
Mixdown Techniques	269
Bounce to Disk.....	269
Recording Using an Internal Mix Bus (Internal Layback).....	269
Recording to an External Stereo Device (External Layback).....	271
Mixdown through an External Console	272
Outputting Stems as Stereo Mixes (Stem Layback).....	273
Converting High Sample Rate Sessions	276
Sample Rate Reduction Workflow	277
Bit-Depth Reduction Workflow	277
Review/Discussion Questions	278
Exercise 10. Final Mixdown	280
Index	287
