

VE210 S6L v5.5: Contents

Introduction.....	xv
About This Course.....	xv
Prerequisites	xv
Course Objectives	xvi
Conventions and Symbols Used in this Book.....	xvi
Menu and Key Commands	xvi
Symbols and Icons.....	xvi
Downloading the Media Files.....	xvii
The Avid Learning Partner Program.....	xvii
Curriculum and Certification Levels	xvii
Avid Certified. Real Skills, Proven.	xviii
How Can I Learn More?	xviii
LESSON 1: Advanced VENUE S6L Systems	1
Introduction	2
Connecting a Shared Stage I/O Configuration.....	2
Required Connections for Stage I/O Sharing.....	2
Using Master and Slave E6Ls in Shared I/O Configurations.....	4
Assigning Ownership of Output Slots.....	6
Managing S6L–E6L Connections in Shared I/O Configurations.....	7
Managing E6L–Stage 64 Connections in Shared I/O Configurations	8
Show File Compatibility	8
Synchronizing with Word Clock.....	8
Syncing S6L to External Word Clock Devices	9
Syncing S6L to External Word Clock in an I/O Sharing Configuration.....	9
Synchronizing AES Digital Audio Inputs (SRC).....	10
Working with DSI-192 Digital Inputs.....	10
DNT-192 Dante Option Card.....	12
Input and Output.....	12
Control and Other Capabilities	12
MADI Option Card.....	13
MADI Card Capabilities and Features	13
Synchronizing MADI Devices	14
Using MADI.....	14
Assignable Mode	14
Pro Tools Input Mode.....	14
Enabling Redundant Outputs.....	15
Using MADI for Hardware Inserts	15
Hardware Inserts.....	16
Using Stage 64 MADI Outs.....	16
Configuring Stage 64 MADI Outs	16

Review/Discussion Questions.....	18
Exercise 1: Configuring an I/O Sharing Set-Up	19
Getting Started.....	20
Connecting Hardware Components.....	20
Powering Up the System.....	21
Assign Ownership of Stage Racks I/O.....	22
Finishing Up.....	22
LESSON 2: Advanced Console Workflows	23
Introduction.....	24
Working with Mains and VCAs.....	24
Working with Mains.....	24
Adjusting Mains Using the Flex Channels.....	24
Adjusting Mains from the Channel Strips.....	25
VCAs vs. Groups	28
Working with VCAs.....	28
Banking VCAs.....	29
Channel Strips Show VCA Contribution.....	30
Turning Channel VCA Indication On and Off	30
Spill Mode for Outputs.....	31
User Layouts.....	31
Layouts View.....	32
Assigning Channels to a User Layout.....	33
Banking the User Layout.....	37
Working with User Layout Presets	38
Layouts, Snapshots and Show Files	39
Using Mains in a User Layout	39
Assigning Custom CHANNEL Parameters	40
Clearing CHANNEL Assignments	40
Bank Safing Channels.....	41
Bank Safing Using the Channel Safe Switches/Button.....	41
Bank Safing Using the Channel Knob Module (CKM).....	42
Bank Safing Using the Channel Menu.....	43
Special Cases Affecting Bank Safe.....	44
Type Text Search.....	45
Channel Numbers and Names	45
Review/Discussion Questions.....	46

Exercise 2: Using Custom Layouts	47
Getting Started	48
Setting up Your First Layout.....	48
Saving a Layouts Preset.....	49
Using Layout Presets to Create More Layouts.....	50
Finishing Up.....	51
LESSON 3: Advanced Plug-In Management	53
Introduction.....	54
Automatic Delay Compensation.....	54
Pickoffs	54
Input Channel Pickoff Point.....	54
Delay Compensation	54
Delay Compensation for Double-Bussed Channels	55
Automatic Delay Compensation Alignment for Double-Bussed Channels.....	55
Plug-In Latency and Processing Delay.....	56
Viewing Plug-In Latency.....	56
Manual Delay Compensation for Inputs.....	56
Plug-In DSP Usage.....	58
Routing Channel Direct Outs to Plug-Ins.....	58
Side-Chain Routing.....	60
Side-Chain Routing using Plug-Ins.....	60
Plug-Ins in Snapshots.....	60
Plug-In Presets and Snapshots	61
Plug-In Levels.....	61
Tap Tempo for Plug-ins	61
Using Tap Tempo.....	62
Enable Plug-in Tempo Sync and Start Tapping.....	62
Review/Discussion Questions.....	63
Exercise 3: Working with Automatic Delay Compensation.....	65
Getting Started	66
Assign Drum Inputs to Groups.....	66
Create a Stereo Smack! Compressor Plug-in.....	67
Enabling the Delay Compensation.....	67
Create a Blank Input Channel for Group Time Alignment.....	67
Mixing Your Show with ADC Applied.....	68
Finishing Up.....	69

LESSON 4: Introduction to Snapshots	71
Introduction.....	72
Snapshots Page Overview	73
Main, User Aux Scope, and Recall Safe Tabs	73
Snapshots List.....	73
Snapshot Command Buttons.....	76
Snapshot Scope Controls.....	76
Channel Scope Controls	77
Scoping Channels and Parameters.....	77
Snapshot Data Types and Parameters.....	80
Creating Snapshots.....	81
Creating New Snapshots	81
Naming Snapshots.....	81
Adding Notes to Snapshots	82
Hierarchical Snapshots (Parent and Child Snapshots)	82
Designating Snapshots as Parent or Child	82
Collapsing and Expanding Parent/Child Views.....	85
Managing and Editing Hierarchical Snapshots.....	85
Momentary Snapshots.....	86
Creating Momentary Snapshots.....	86
Recalling Momentary Snapshots	87
Editing Momentary Snapshots	87
Snapshot Groups	88
Assigning Snapshots to Groups.....	88
Editing Grouped Snapshots	89
Recalling Snapshots.....	89
Targeting Snapshots.....	89
Snapshot Status Display.....	91
Managing Snapshots	91
Storing Snapshots.....	91
Locking Snapshots.....	92
Clearing Snapshots	94
Duplicating Snapshots	94
Deleting Snapshots	94
Moving Snapshots.....	94
Disabling Snapshots.....	94
Importing Snapshots.....	94
Undoing Snapshot Commands	95
Preview Mode	95
Using Preview Mode.....	96
Undo and Preview Mode.....	97
Available and Unavailable Functions in Preview Mode	97
Review/Discussion Questions	101

Exercise 4: Using Basic Snapshots.....	103
Getting Started	104
Creating Snapshots.....	104
Creating Child Snapshots.....	105
Creating a Momentary Snapshot.....	106
Using Preview to Check Your Work	106
Finishing Up.....	107
LESSON 5: Advanced Snapshots	109
Introduction	110
SnapshotOptions	110
Center Last Recalled Snapshot.....	110
Confirm Snapshot Recall.....	110
Enable Strip Control on Snapshots Tab	110
Crossfade Time	111
Pre Settings.....	112
Classifying Aux Sends	112
Recall Safe.....	112
Recall Safe Displays and Controls	113
Using Recall Safe	115
Using Scope Sets.....	117
User Aux Scope	119
User Aux Scope Example.....	119
Using the User Aux Scope Grid.....	120
Using Aux User Presets	121
User Aux Scope Displays and Controls.....	122
Automation Safing Channels	124
Automation Safing Using the Channel Safe Switches/Button.....	124
Automation Safing Using the Channel Knob Module (CKM).....	125
Automation Safing Using the Channel Menu	126
Making Changes to Snapshots.....	127
Using Edit Mode.....	127
Using Update Mode	128
Undoing Snapshot Commands.....	129
Disabling Snapshots.....	129
Adding Plug-In Data to Snapshots	130
Adding Plug-Ins to Snapshots.....	130
Removing a Plug-In from Snapshots.....	131
Updating a Plug-In Across Snapshots	131
Adding Tempo Data to Snapshots.....	132
Adding Pro Tools Markers Using Snapshots.....	133
Using MIDI Data with Snapshots.....	134
Adding MIDI Data to Snapshots.....	134

Viewing MIDI Messages in Hexadecimal Format	136
Safing MIDI Message Output	136
Remote Control of Snapshot Recall Using MIDI	136
Using MIDI Bank Select and Program Change to Recall Snapshots.....	137
Triggering of External Devices on Snapshot Recall using MIDI	138
Time Code and Snapshots.....	139
Automating Recall of Snapshots with Time Code.....	139
Generating MIDI Time Code	139
Slaving to External Time Code.....	140
Snapshot Time Code Display	141
Assigning Time Code Values to Snapshots.....	141
Sorting Snapshots by Time Code Value	142
Enabling Snapshots for Automated Recall.....	142
Chasing TimeCode	142
Review/Discussion Questions	143
Exercise 5: Modifying Your Snapshots	145
Getting Started.....	146
Using Edit Mode.....	146
Adding Plug-In Data to Snapshots.....	147
Setting Snapshot Crossfade Time.....	148
Finishing Up.....	148
LESSON 6: Advanced Routing.....	149
Introduction.....	150
Hardware Inserts.....	150
Connecting External Hardware	150
Using MADI-192 MADI Option Card IO for Hardware Inserts.....	150
Assigning Hardware Inserts to Channels.....	151
Reassigning Hardware Inserts	152
Activating and Bypassing Hardware Inserts	153
Setting the Hardware Insert Location.....	154
Matrix Mixers.....	154
Matrix Mixers Overview	155
Configuring the Matrix Outputs for Mono or Stereo.....	156
Configuring the Matrix Outputs in the Patchbay	156
Assigning Input Sources to Matrix Mixers	156
Linking and Unlinking Adjacent Matrix Inputs	157
Resetting Matrix Mixer Input Parameters	158
Clearing Matrix Mixer Input Assignments	159
Copying Matrix Mixer Input Settings.....	159

Adjusting Matrix Mixer Input Controls.....	160
Adjusting Matrix Mixer Input Level.....	160
Spill Mode for Matrix Mixers.....	161
Delay Compensation with Matrix Mixers	162
Adjusting Matrix Mixer Output Controls.....	162
Accessing Matrix Mixer Output Processing on the External Screen.....	162
Snapshot Data and Parameters for Matrix Mixers	163
Review/Discussion Questions.....	164
Exercise 6: Setting Up a Matrix Mix for Broadcast.....	165
Getting Started	166
Setting up the Show File.....	166
Setting up the Matrix.....	167
Mixing the Front of House Inputs.....	168
Mixing the Broadcast Inputs.....	168
Finishing Up.....	169
LESSON 7: Monitor Mixing with the S6L.....	171
Introduction	172
Working with Aux Sends.....	172
Adjusting Aux Sends in Channel Control Mode.....	173
Selecting Aux Pre-Fader Pickoff Points	175
Adjusting Stereo Sends in Channel Control Mode.....	176
Adjusting Aux Sends in Channel Strip Mode	177
Adjusting Aux Sends on Faders (Sends on Faders Mode).....	177
Enabling Sends on Faders.....	178
Accessing Aux Sends on Faders	178
Adjusting Stereo Sends in Send on Faders Mode	179
Flipping Parameters to Faders (Flip to Faders Mode)	180
Adjusting Aux Sends on the External Screen.....	181
Copying Assignments Between Aux's.....	182
Classifying Auxes for Snapshots.....	182
Soloing and the Monitor Buses	182
Configuring the Monitor Buses and Solo Options.....	183
Selecting a Solo Mode	183
Sends on Faders Follow AFL.....	184
AFL Follows Sends on Fader.....	184
Select Follows Solo.....	184
Auto Cancel and Input Priority	185
Sending the Mains Mix to Monitors	185
Trimming Solo Bus Level.....	185
Delaying a Monitor Bus.....	186
Adjusting Monitor Buses.....	186

Routing Channels to the Monitor Buses	186
Adjusting Monitor Bus Level.....	187
Routing the Monitor Bus to Outputs and Plug-Ins.....	188
Soloing Channels	188
Momentary, Latching and X-OR Switch Operation	189
Soloing Single Channels.....	189
Soloing Multiple Channels.....	190
Toggling the Solo Status of Multiple Channels	190
Soloing VCAs.....	191
Clearing Solos.....	191
Solo Safing Channels.....	191
Using the Headphone Outputs	192
Configuring the Headphones Outputs.....	192
Adjusting Headphone Level	193
Talkback.....	193
Routing Talkback to Output Buses.....	193
Activating Talkback Input and Setting Level.....	194
Setting Talkback Dim Level.....	194
Routing a Talkback Mic to an Input Channel	194
Muting and Mute Groups.....	195
Muting Individual Channels.....	195
Mute Groups	197
Assigning Channels to Mute Groups.....	197
Toggling Mute Groups On/Off.....	199
Using the MTS.....	200
Explicit and Implicit Channel Mute with Mute Groups and VCAs.....	200
Snapshot Data and Parameters for Mute	201
Review/Discussion Questions	202
Exercise 7: Monitor Mixing for a Band.....	203
Getting Started.....	204
Setting up Aux's for a Monitor Mix.....	204
Mixing your Monitor Mixes.....	205
Setting Up Mute Groups	206
Using Mute Groups.....	206
Finishing Up.....	207
LESSON 8: Advanced VENUE S6L with Pro Tools.....	209
Introduction.....	210
Working with Pro Tools in Shared I/O Configurations.....	210
Setting Output Levels to Pro Tools for Recording.....	210
Using Assignable I/O	210
Performing Virtual Soundchecks in Shared Input Configurations.....	211

Enabling Direct Digital Splits.....	211
Output Levels for Digital Splits	212
Using Pro Tools Assignable I/O	212
Using Assignable Outputs for Recording.....	213
Using Assignable Inputs for Playback.....	216
Using InputMode.....	217
Adjusting Input Gain in Input Mode	217
Snapshot PRE Settings and Virtual Soundcheck Inputs.....	217
Snapshot PRE Settings in Input Mode.....	218
Pro Tools Playback Considerations.....	218
Using MADI with Pro Tools.....	221
Pro Tools Input Mode.....	221
Redundant Outputs	222
Enabling Virtual Soundcheck Recording.....	222
Performing a Virtual Soundcheck with MADI	223
Review/Discussion Questions.....	225
Exercise 8: Using Assignable I/O with Pro Tools.....	227
Getting Started	228
Assigning Direct Outputs.....	228
Creating a Session from VENUE using Directs.....	229
Using Virtual Soundcheck with Assignable Inputs.....	229
Finishing Up.....	230
LESSON 9: Events	231
Introduction.....	232
Events.....	232
Events Overview.....	233
Event List.....	234
Triggers.....	235
Actions.....	236
GPI I/O Status Display.....	237
Creating Events.....	237
Adding an Event.....	237
Managing Events in the Event List.....	238
Creating Triggers.....	240
Adding Triggers to an Event	240
Editing Trigger Type and Properties.....	241
Managing Triggers in the Triggers List	241
Channel X/Y Function Switches	243
Creating Actions.....	244
Adding Actions to an Event	244
Editing an Action Type and Properties.....	244
Testing Events.....	245

Resetting Events.....	246
Snapshots and Events.....	246
Snapshot Modes and Event Status.....	247
Avoid Feedback Loops	247
Default Events	248
Review/Discussion Questions.....	249
Exercise 9: Using Events	251
Getting Started.....	252
Creating Events.....	252
Finishing Up.....	253
