What do you like to do for fun? I like to spend time with family, love on my puppy “Ms. Bella”, , return things- I have buyers’ remorse, and I sing.

Why did I pick this program? BUMC's PGY2 Oncology program really stood out to me because of the diversity of oncology experiences. What excites me most is the opportunity for both inpatient and outpatient training, along with the chance to learn from experienced board certified preceptors. I was immediately drawn to the opportunity to work closely with interdisciplinary teams managing high-acuity cases within a large academic medical center. I knew then that the opportunities afforded to me would be endless! I also value that the program places a strong emphasis on leadership, preceptorship, and teaching, all of which align with my own interests.
