INFLUENZA VACCINE CONSENT AND IMMUNIZATION RECORD

SCREENING QUESTIONS: If you answer "yes" to any of the questions, you may not be eligible for flu vaccine today.				Yes	No
1. Have you ever been diagnosed with severe muscle pains and paralysis (Guillain-Barre Syndrome) within 6 weeks after receiving a flu vaccine?					
2. Have you received a bone marrow transplant within the past 6 months?					
3. Have you had a serious allergic reaction to any vaccine including previous flu vaccines?					
4. Are you allergic to Thimerosal? If yes, you may still receive your influenza vaccination from a single-dose syringe. <i>Flu vaccines in multi-dose vials contain thimerosal to safeguard against contamination of the vial. Most single-dose vials and pre-filled syringes of the flu shot and the nasal spray flu vaccine do not contain a preservative because they are intended to be used once.</i>					
5. Have you already received a flu vaccination this season?					
PATIENT INFORMATION:					
Last Name:		First Name:		Middle Initial:	
				Date of Birth:	
If under 18:					
Parent/Guardian Name:			Preferred Phone Number:		Relation to Patient:
