# Baxi residential solutions

Your complete guide

BAXI

# Boilers and beyond

We deliver customised heating and hot water solutions, uniting technologies from across our comprehensive range, to make things easier for you.

Here at Baxi, we've been at the forefront of heating and hot water innovation since 1866, and are now home to a wide portfolio of trusted and established brands – creating seamless, integrated heating and hot water solutions for homes nationwide.

#### Comprehensive and flexible solutions

We know that every residential installation is different, and one size never fits all – particularly when it comes to tackling the net-zero challenge. That's why we go way beyond just boilers, offering a complete range of solutions, for homes of all kinds:

**Boilers** – reliable, efficient and easy-to-install models, with flexible outputs to suit any home.

**Cylinders** – streamlined, robust and delivering rapid flow rates and recovery times across multiple outlets.

**Air source heat pumps** – ultra-efficient, future-ready, and available with dedicated cylinders and accessories.

**Complementary products** – flexible flues, convenient heating controls and efficiency boosting accessories.

All supported by industry-leading technical advice and hands-on installer training.

# **Boilers**

Whether Natural Gas, LPG or electric; or Combi, System or Heat-only, we have a range, model and output suitable for all residential heating installations.

Our comprehensive boiler range offers complete reliability, efficiency and cost-effectiveness for any application – whether you're installing a brand-new heating system in a small apartment, or upgrading an existing system in a large multi-bathroom home. We also have a wide range of accessories that make our boilers more efficient and easier to maintain.

#### **Compatible with:**

Baxi 600 Heat boiler

Wall mounting bracket

Top flue adaptor

Power lead

Copper pipe tail

Literature and fittings pack

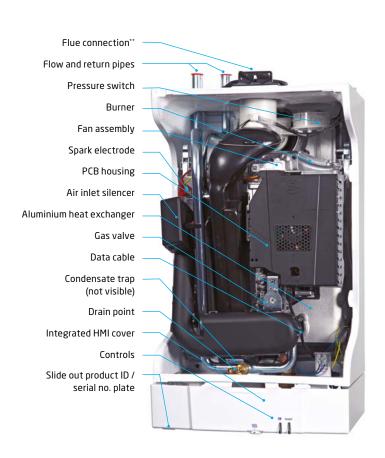

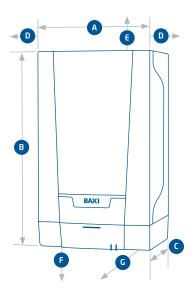

Gas 22mm

#### What's inside:

" To be replaced by flue connector if flueing from top

#### **Dimensions:**

| Product dimensions             | mm   |
|--------------------------------|--|
| A Width                        | 370  |
| <b>B</b> Height                | 625<br>(790mm if using<br>flue elbow)            |
| <b>C</b> Depth                 | 270  |
| Service clearances             |  |
| <b>D</b> Side                  | 5*   |
| <b>E</b> Upper                 | 190 <sup>*</sup><br>(35mm if using<br>rear flue) |
| F Lower                        | 120*<br>(35mm in 300mm<br>deep wall cupboard)    |
| <b>G</b> Front - for operation | 5 <sup>*</sup>                                   |
| Front - for servicing          | 500 <sup>*</sup>                                 |

<sup>\*</sup> These are minimum recommended dimensions, greater clearance will aid installation and maintenance

### **Baxi 800 Heat**

The Baxi 800 Heat includes a compact Adey MagnaClean Micro2 system filter to protect the boiler. The boiler has no need for a pump overrun or permanent live and has a lift weight from just 17.4kg.

No pump overrun or permanent live required

SCAN ME

#### **Electric boilers**

# **Amptec S**

Efficient electric system boiler suitable for both radiator and underfloor systems. Designed to reduce unnecessary external works with all key heating system components built within the unit and can be used in conjunction with a Solar PV battery to help the user with running costs.

4-18kW outputs

Digital and analogue pressure gauge

Uses right amount of fuel to meet the set central heating temperatures

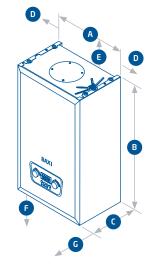

Solar PV battery compatibility

#### **Electric boilers**

# **Amptec**

Slimline electric flow boiler designed to heat radiators or underfloor heating in smaller spaces like flats, garages and loft conversions, as well as high-rise, multi-occupancy dwellings. Perfect for homes off the mains gas network or for refurbishing old properties with flue restrictions.

4-12kW outputs

99.8% efficient

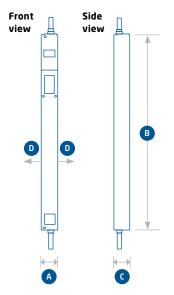

Slimline design perfect for limited space

# **Cylinders**

Our comprehensive range of Baxi and Megaflo cylinders are the perfect fit for homes of all kinds. Created by hot water experts Heatrae Sadia, our cylinders deliver a level of quality and performance you can rely on

#### **Baxi range**

Baxi's streamlined, floor-mounted Indirect and Direct hot water cylinders can be installed quickly and easily, even in small spaces. With exceptionally fast recovery times thanks to the coil-in-coil heat exchanger, Baxi cylinders are sure to deliver reliable hot water across multiple outlets, without the need for shower numps or tanks.

#### Megaflo range

With a complete range of powerful yet efficient cylinder options designed around modern lifestyles, the Megaflo range is the obvious choice for both homes and commercial buildings. Each floor-mounted unit is simple to install, even in the smallest of spaces, with fast heat recovery and exceptional flow rates, even at low pressures.

#### Hot water cylinders

# **Baxi Direct**

The Baxi Direct offers the same reliable performance and efficiencies as our Indirect models. It's available in a range of volumes between 125 and 300 litres to suit all house sizes and hot water needs.

125 to 300 litre volumes

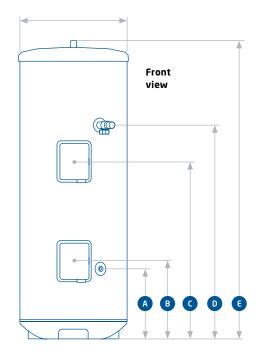

50mm injected foam insulation

## **Megaflo Eco SystemFit**

Our Megaflo Eco SystemFit goes one step further than our standard Megaflo Eco by adding factory-fitted plumbing and wiring, making it ready for installation with a heat only boiler – not only reducing installation time but also providing a consistently neater appearance.

125-300 litres volumes

Pre-plumbed and pre-wired for fast installation

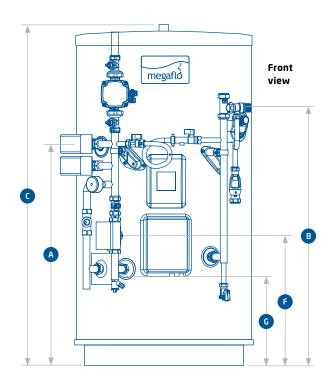

Deliver up to 76 litres per minute of hot water at 3 bar pressure

## **Megaflo Eco Solar Indirect**

The Megaflo Eco Solar Indirect provides an abundance of hot water for fast-filling baths and invigorating powerful showers without the need for pumps or tanks, whilst keeping running costs to a minimum by harnessing the sun's energy when used in conjunction with a solar thermal plate collector or an evacuated tube package.

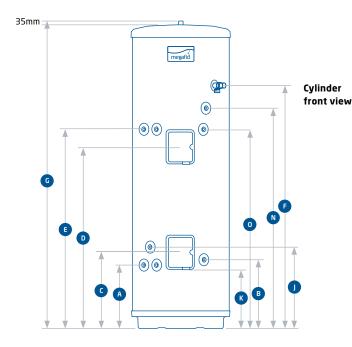

60mm injected foam insulation

Deliver up to 76 litres per minute of hot water at 3 bar pressure

## **Megaflo Eco Solar Direct**

The Megaflo Eco Solar Direct provides an abundance of hot water for fast-filling baths and invigorating powerful showers without the need for pumps or tanks, whilst keeping running costs to a minimum by harnessing the sun's energy when used in conjunction with a solar thermal plate collector or an evacuated tube package.

# **Solutions training**

Our advanced training ensures you have the additional skills and knowledge that you need to deliver the next generation of heating and hot water solutions. Enabling you to work smarter, more efficiently and more profitably, taking you and your business to the next level.

Find a course today at baxi.co.uk/training

# Air source heat pumps

Air source heat pumps (ASHPs) are an ultra-efficient alternative to conventional residential heating. They work by taking heat from the air, converting it into usable heat in the home.

Our ASHPs are available individually or with Baxi ASHP hot water cylinders, a range of accessories and smart controls – to offer a complete, packaged solution. A full solution also means a range of services to help and support you, from the system design throughout the installation and commissioning, to the after sales services.

### **Baxi offers:**

Training to become a Baxi Heat Pump Installer (BHPI)

Option to use a MCS umbrella service with our partner, Abode

The help and support of Baxi's nationwide fleet of service engineers

Being a phone call away from our Technical Support

### Did you know?

We offer free on-site commissioning support for your first commission, as part of our ASHP training.

### Air source heat pumps

### **Baxi HP40 ASHP**

The Baxi HP40 Monobloc Air Source Heat Pump will deliver reliable, energy-efficient performance. Available individually or with our Baxi Air Source Heat Pump Cylinders, we have everything you need to provide a complete solution.

Up to 5 years enhanced warranty\*

4-13kW outputs all single phases with optional triple phase for larger outputs

Up to 65°C flow temperature

Excellent SCOP: up to 5.03%

# Air Source Heat Pump commissioning

We're here to help you commission your air source heat pump installation to ensure optimum performance, efficiency and energy savings can be achieved. Our highly trained service engineers can be booked for a site visit to commission your air source heat pump and handover to your customer. We offer on-site assisted commissioning for new installations, as part of our ASHP training.

### Warranty

An enhanced product warranty

### Quality

Reassurance of installation and setup configuration

#### Performance

Longevity and optimised performance of the equipment

### Air source heat pumps

# **Baxi ASHP Cylinder**

The Baxi ASHP Cylinder powers rapid-heating. An efficient cylinder with high surface area heat exchanger and built-in back-up immersion heaters designed specifically for Baxi Air Source Heat Pumps.

210, 250 and 300 litre volumes

Corrosion resistant stainless steel build

Delivers up to 76 litres per minute of hot water

<sup>\*</sup> Condensation is not allowed

### **Compatible with:**

For **product codes**, please refer to the compatibility table on page 62

For more information on our comprehensive range of accessories, visit www.baxi.co.uk/accessories

### **Baxi Easy-Flue**

Our internal fit telescopic flue can be installed either at height or at ground level, quickly and safely by one person from inside the property, reducing the need for ladders.

Built in flue elbow fits directly onto the top of the boiler

60/100 and oversize weather seal provided as standard

Short (300mm-470mm) and long (420mm-690mm) options available

### **Complementary products**

### **Multifit IFOS**

Our In Flue Outdoor Sensors meet weather compensation requirements for Boiler Plus. Options available for every Combi and System boiler.

Accurate temperature sensing

Quick and easy to install

Suitable for both horizontal and vertical flues

### Baxi Easy-Flue and Multifit IFOS compatible with:

For **product codes**, please refer to the compatibility table on page 62

### **Flue solutions**

Our Multifit flue kits now feature secure positive screw fixings for all connections, ensuring reliable installation every time. Designed to make your job easier, they come in a variety of lengths to minimise on-site cutting. With a choice of terminal colours to seamlessly match existing rainwater systems and UV-stable construction for long-lasting durability, our flues combine practicality with premium performance.

|  | Flue type             | Group A (60/100mm)  |
|--|-----------------------|---|
| Maximum permissible equivalent flue  | Horizontal concentric | 10m   |
| lengths for Baxi Combi, System boilers   | Vertical concentric   | 10m   |
| Maximum permissible equivalent flue  | Horizontal concentric | 6m  |
| lengths for Baxi Heat only boilers   | Vertical concentric   | 6m  |
| Where in-line bends are required in a flue system, the overall length must be reduced by the following amounts | Concentric pipes      | 135° bend (0.5m bend reduction)<br>93° bend (1m bend reduction) |

#### Terminal position with minimum distance (mm)

| A <sup>1</sup> | Directly below an opening, air brick, opening windows etc | 300 |
|----------------|---|-----|
| B <sup>1</sup> | Above an opening, air brick, opening window etc           | 300 |
| C <sup>1</sup> | Horizontally to an opening, air brick, opening window etc | 300 |
| D²             | Below gutters, soil pipes or drain pipes                  | 25  |
| E²             | Below eaves   | 25  |
| F²             | Below balconies or car port roof                          | 25  |
| G <sup>2</sup> | From a vertical drain pipe or soil pipe                   | 25  |
| H²             | From an internal or external corner                       | 25  |
| ı              | Above ground, roof or balcony level                       | 300 |
| J              | From a surface or boundary line facing a terminal         | 600 |
|                |   |     |

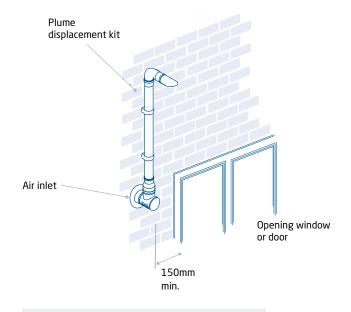

- In addition, the terminal should be no nearer than 150mm to an opening in the building fabric formed for the purpose of accommodating a built-in element such as a window frame.
- Only ONE 25mm clearance is allowed per installation. If one of the dimensions D, E, F, G or H is 25mm then the remainder MUST be as B.S.5440-1.

### Terminal position with minimum distance (mm)

| From a terminal facing a terminal (Horizontal flue)                | 1,200   |
|--|---|
| From a terminal facing a terminal (Vertical flue)                  | 600   |
| From an opening in a carport (e.g. door, window) into the dwelling | 1,200   |
| Vertically from a terminal on the same wall                        | 1,500   |
| Horizontally from a terminal on the same wall                      | 300   |
| From adjacent wall to flue (vertical only)                         | 300   |
| From an adjacent opening window (vertical only)                    | 1,000   |
| Adjacent to windows or openings on pitched and flat roofs          | 600   |
| Below windows or openings on pitched roofs                         | 2,000   |
|  | From a terminal facing a terminal (Vertical flue)  From an opening in a carport (e.g. door, window) into the dwelling  Vertically from a terminal on the same wall  Horizontally from a terminal on the same wall  From adjacent wall to flue (vertical only)  From an adjacent opening window (vertical only)  Adjacent to windows or openings on pitched and flat roofs |

**NOTE**: The distance from a fanned draught appliance terminal installed parallel to a boundary may not be less than 300mm in accordance with the diagram.

**IMPORTANT**: If fitting a Plume Displacement Flue Kit, the air inlet must be a minimum of 150mm from any opening windows or doors.
