BOILERS AND BEYOND

BAXI

United We Heat

Baxi is bringing the heating community together, by uniting a wide portfolio of trusted residential and commercial brands to create seamless, integrated heating and hot water solutions. Whether big or small, complex or straightforward, we tailor our solutions for every type of residential and commercial building.

COMMERCIAL

Residential and commercial heating and hot water solutions

Building towards the future of heat

We believe that transforming how our properties are heated, will play a huge role in the journey towards net zero – but there's no single solution to this challenge. That's why our focus is on a mix of technologies to suit a range of needs.

Individual brands united for all your needs

Unifying our diverse portfolio of efficient boilers, cylinders and accessories provides you with a complete heating and hot water solution, all from one place.

Next-generation technology, now

We're fully-committed to being carbon neutral in everything we do by 2030.

That includes phasing out of carbon intensive technologies of the past, whilst pushing forward with future ready solutions such as air source heat pumps and heat networks.

Industry-leading expertise at our heart

Baxi has been at the forefront of heating and hot water innovation since 1866. This puts us in a perfect position to deliver the service you need, every time. From technical advice and hands-on training, to support from our nationwide network of engineers.

Innovative, low-carbon solutions for today and tomorrow

We know that every building project is different, and one size never fits all – particularly when it comes to tackling the challenge of decarbonisation. That's why we create tailored solutions for homes and businesses of all kinds, by combining technologies from across our portfolio in any way that suits.

Boilers

Whether Natural Gas, LPG or electric; or Combi, System or Heat-only, we have a range, model and output suitable for all residential heating installations.

To find out more, go to the Boilers section on page 6.

Hot water cylinders

Our range of cylinders are designed and manufactured by our hot water storage experts Heatrae Sadia to the very highest quality.

To find out more, go to the Hot water cylinders section on page 18.

Air source heat pumps

The HP40 Monobloc ASHP is the perfect choice for reliable, energy efficient heating and hot water. Our HP40 can also be integrated with our Baxi Air Source Heat Pump Cylinder, buffer vessels and smart controls.

To find out more, go to the Air source heat pumps section on page 26.

Complementary products

Baxi's suite of accessories includes efficiency-boosting add-ons, flexible flues, heating controls and a broad range of other ancillary products, all designed to complete a residential heating system.

To find out more, go to the Complementary products section on page 30.

Advanced training from the experts in heating and hot water

Our trainers are solutions experts who have many years of technical knowledge and practical know-how to share, and they're some of the very best in their field. Their valuable, real-world experience is at the heart of every one of our courses.

Working out of one of our purpose-designed facilities, training is focused on perfecting your practical skills, with 80% of the session devoted to getting your hands on equipment and learning about those all-important details that are so invaluable to know.

To find out more, go to the Training section on page 38.

Boilers

Our comprehensive boiler range offers complete reliability, efficiency and cost-effectiveness for any application – whether you're installing a brand-new heating system in a small apartment, or upgrading an existing system in a large multi-bathroom home. We also have a wide range of accessories that make our boilers more efficient and easier to maintain.

All Baxi residential boilers are rated 'A' for efficiency - and are easy to install, service and maintain.

Baxi 600 and 800 Combi 2

These compact and lightweight boiler ranges boast great performance backed by a reassuring warranty.

Parts and labour warranties:

- **7 years*** for Baxi 600 Combi 2
- **10 years*** for Baxi 800 Combi 2

24kW to 36kW outputs
(Natural Gas or LPG manual conversion).

External analogue pressure
gauge for ease of topping up
central heating pressure.

Dynamic range rating automatically
matching central heating load through
self-modulation.

Preheated and siphonic condensate
trap to help prevent freezing in winter.

Reliable brass and stainless steel
components for peace of mind.

Our electric flow boilers

Electric flow boilers are a powerful modern solution for low-carbon residential heating, and are a great alternative for homes with flue restrictions or no mains gas supply.

Did you know, over 2 million homes in Britain today are without a mains gas supply?

Amptec S

Efficient electric System boiler suitable for both radiator and underfloor systems. Designed to reduce unnecessary external works with all key heating system components built within the unit and can be used in conjunction with a Solar PV battery to help the user with running costs.

2 years' parts and labour warranty.*

4kW to 18kW outputs.

Fault codes displayed for simple diagnostics.

Works with most standard radiator and underfloor heating systems.

Ease of installation with system components built into product.

Digital and analogue pressure gauge.

Scan here for more information.

* Terms and conditions apply. Visit baxi.co.uk/terms

Looking for boiler training?

To find out about our hands-on training courses, delivered at our nationwide training centres, go to page 38.

Electromax

All-in-one electric flow boiler and 180 litre direct cylinder system, designed for small homes off mains gas. The Electromax is factory-tested for reliability, quality and safety, and is delivered pre-plumbed for a quick installation.

2 years warranty as standard, with 10 years' warranty for the cylinder.*

6kW or 9kW outputs.

99.8% efficient.

One-hour booster can heat 57 litres of water.

Flue-free, so no need for a gas safety certificate.

Scan here for more information.

* Terms and conditions apply. Visit baxi.co.uk/terms

How about air source heat pumps?

Baxi's ASHPs are a future-ready solution for homes. Find out more on page 26.

Amptec

Slimline electric flow boiler designed to heat radiators or underfloor heating in smaller spaces like flats, garages and loft conversions, as well as high-rise, multi-occupancy dwellings. Perfect for homes off the mains gas network or for refurbishing old properties with flue restrictions.

2 years' parts and labour warranty.*

4kW to 12kW outputs.

99.8% efficient.

Works with most standard radiator and thermostatic systems.

Slimline design, perfect for areas with limited space.

Long-life solid-state technology.

Compatible with selected **Cylinders**, excluding MegaFlo Solar and Solar PV Ready

Hot water cylinders

Built to deliver fast, reliable and efficient hot water across multiple outlets, our comprehensive range of Baxi and Megaflo cylinders are the perfect fit for homes of all kinds. Created by hot water experts Heatrae Sadia, our cylinders deliver a level of quality and performance you can rely on.

Our cylinder product range is available through all leading merchants.

Baxi Direct and Indirect cylinders

Baxi's streamlined, floor-mounted Indirect and Direct hot water cylinders can be installed quickly and easily, even in small spaces. With exceptionally fast recovery times thanks to the coil-in-coil heat exchanger, Baxi cylinders are sure to deliver reliable hot water across multiple outlets, without the need for shower pumps or tanks.

2 years' warranty as standard, with 15 years' warranty on the inner stainless-steel tank*.

125 litre to 300 litre volumes.

Delivers up to 76 litres per minute at 3 bar pressure.

50mm injected foam insulation increases heat retention and efficiency.

High-strength duplex stainless steel construction.

Corrosion-resistant components.

Need a boiler to go with your cylinder?

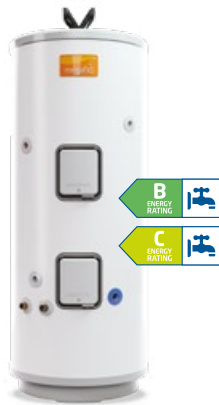

Find out about our range of reliable and efficient System and Heat-only boilers on page 10.

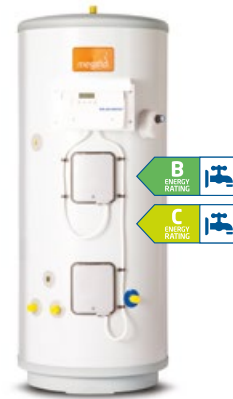

Megaflo Eco - Direct and Indirect

- 60mm injected foam insulation increases heat retention and efficiency.
- Robust and safe handle offers improved manoeuvrability.
- Direct models feature a unique L-shaped immersion heater and long-life titanium electric heating elements.

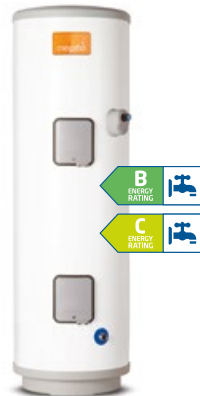

Megaflo Eco Solar PV Ready

- Cylinder integrates with rooftop PV panels.
- Fully-wired Solar iBoost control for easy installation.
- High-performance insulation reduces heat loss for better energy efficiency.

Megaflo Eco Slimline - Direct and Indirect

- A taller and slimmer version of the Megaflo Eco.
- Features longer-life titanium elements (direct models) or Superloy elements (indirect models).
- High-performance insulation and insulated T&P valve reduces heat loss for better energy efficiency.

Megaflo Eco SystemFit and SystemReady

- SystemFit models designed to be installed with a Heat-only boiler.
- SystemReady models designed to be installed with a System boiler.
- Pre-plumbed and pre-wired for super-fast installation.
- 60mm insulation and insulated T&P valve to improve SAP performance.

Air source heat pumps

Air source heat pumps (ASHPs) are an ultra-efficient alternative to conventional residential heating. They work by taking heat from the air, converting it into usable heat in the home. Our ASHPs are available individually or with Baxi ASHP hot water cylinders, a range of accessories and smart controls – to offer a complete, packaged solution.

We offer in-depth ASHP training, including on-site assisted commissioning for new installations. Find out more on page 42.

Baxi HP40 ASHP

A single self-contained outdoor ASHP unit that's easy to install and compatible with our Baxi ASHP hot water cylinder range.

Up to 5 years' enhanced warranty.*

4kW to 13kW outputs.

Up to 65°C flow temperature.

Seasonal Coefficient of Performance (SCOP) of up to 5.03%.

Easily-accessible internal components for servicing and maintenance.

Built-in outdoor temperature sensor, integrated water pump and expansion vessel.

Quiet in operation – sound power from 55 dB(A).

Compatible with:
Baxi uSense 2 Smart Room Thermostat

See page 33

Scan here for more information.

* Terms and conditions apply. Visit baxi.co.uk/terms

Want to get rewarded?

Did you know, you can now earn reward points for registering ASHPs? Find out more at baxiworks.co.uk

Baxi ASHP Cylinder

Rapid-heating, efficient cylinders with high surface area heat exchanger and built-in back-up immersion heaters designed specifically for Baxi Air Source Heat Pumps.

10 years' parts and labour warranty.*

Available in 210, 250 or 300 litre volumes.

Corrosion-resistant stainless steel build.

Delivers up to 76 litres per minute of hot water at 3 bar pressure.

Large coil-in-coil heat exchanger for fast recovery times.

Injected foam insulation gives optimum heat retention and energy efficiency.

Immersion Heater Relay Kit included.

Scan here for more information.

* Terms and conditions apply. Visit baxi.co.uk/terms

Looking for air source heat pump training?

Our in-depth courses will help you become a Baxi Heat Pump Installer. Find out more on page 42.

Complementary products

Baxi's suite of accessories are designed to complete a residential heating system. Each accessory is easy to install, whatever its function – whether boosting performance, improving user experience, aligning with legislative requirements or reducing costs.

Options include efficiency-boosting add-ons, flexible flues and heating controls.

Baxi Easy-Flue

Our internal telescopic flue and elbow kit can be installed quickly and safely by one person from inside the property, reducing the need for ladders.

Built-in flue elbow fits directly onto the top of the boiler.

Perfect for installations at height or even at ground level.

Short (300mm – 470mm) and long (420mm – 690mm) options available.

60/100 and oversize weather seal provided as standard.

Compatible with:
**Baxi 400, 600
and 800 Combi 2**

Baxi Customer Support

Everything you need in a heating
and hot water service

Installer training

Our advanced training ensures you have the additional skills and knowledge that you need to deliver the next generation of heating and hot water solutions. Enabling you to work smarter, more efficiently and more profitably, taking you and your business to the next level.

"Just wanted to say a huge thanks for the training day... The training guys were fantastic! I have always fitted your products but this has just proven what a fabulous company Baxi is. I will continue recommending your boilers to all my customers! Thanks so much!"

J S Pinder
Plumbing and Heating
Sheffield

Why training?

Baxi has built a reputation of being one of the most respected manufacturers of heating and hot water solutions by continuously setting and raising standards. We're always searching for new and better ways to support heating engineers, and to bridge the skills gaps associated with future technologies.

Practical, hands-on courses

Covering all the skills you need to provide the latest heating and hot water solutions efficiently.

Delivered by experts

Our trainers are solutions experts with years of practical industry experience and technical know-how to pass on.

CIPHE

Our flagship training centres in Warwick, Dartford and Warrington have been awarded CIPHE Approved Training Centre (ATC) status, the first boiler manufacturer to receive this status.

To find out more
or book a course,
contact your Area
Sales Manager or visit
baxi.co.uk/training

Nationwide training centres

Our courses are delivered at our local training centres across the UK. So, wherever you are, you don't have to travel far to improve your skills.

Looking for air source heat pump training?

Turn the page to find out about our ASHP courses.

ASHP training

Our in-depth and flexible air source heat pump training courses are carried out by qualified experts at our training centres nationwide, where our experienced trainers will help you get comfortable with the Baxi ASHP range.

Baxi ASHP training

Introduction to ASHPs (1-day)

Covering:

- How a heat pump works
- Our ASHP product range
- Installation considerations
- Hands-on experience in real-world situations
- Legislation updates – including the Boiler Upgrade Scheme (BUS) scheme and Microgeneration Certification Scheme (MCS).

BPEC Domestic ASHP Systems (3-day)

Covering:

- ASHP installation – meeting the requirement of the National Occupational Standards and industry working groups
- A nationally recognised qualification that can be used to gain entry to the MCS
- The principles of design, installation, commissioning and servicing of ASHP systems.

BPEC Low Temperature Hot Water Heating Systems (2-day)

- Provides learners with knowledge of low temperature hot water heating systems and builds on previous experience within the plumbing and heating sectors.
- Covers the essential knowledge and understanding that is required by an experienced plumbing and heating specialist.
- Explores the methodologies and calculations required to Design Energy Efficient Low Temperature Hot Water Heating Systems.

For more information,
contact your Area
Sales Manager or
register your interest at
baxi.co.uk/training

Baxi Heat Pump Installer Training (2-day)

For heating professionals looking to install Baxi ASHPs.

- **Module 1 - Design and application:**
Understand how accurate design can deliver the best outcome and different applications to suit your customer's needs. (1 day)
- **Module 2 - Installation and commissioning:**
Learn all about Baxi heat pumps, installation requirements and how to set the system up for the best results. Covering commissioning and fault finding. (1 day)

On the completion of the course installers will be able to book an assisted commissioning visit to sign-off their first installation.

Becoming a Baxi Heat Pump Installer

As an accredited heat pump installer:

- You'll become comfortable with designing, installing, commissioning and servicing our ASHP range
- You'll be able to directly commission Baxi ASHP products and provide your customers with the enhanced warranty
- You'll be able to register your product and earn points for rewards on Baxi Works – find out more on page 34.
