

Find the perfect fit

Choose HP40 for a versatile and cost-effective solution

Choose HP60 for maximum sustainability and high temperature capability

R32 synthetic refrigerant

Refrigerant type

R290 natural refrigerant

675

Global Warming Potential (GWP)

3

Flexible siting options with fewer installation constraints

Siting requirements

Greater outdoor clearance and stricter siting requirements

Mid temperature efficient refrigerant, capable of up to 65°C flow temperature

Efficiency & performance

High temperature extremely efficient refrigerant, capable of 75°C at -10°C outside

Strong SCOP of up to 5.03

SCOP

Excellent SCOP of up to 5.34

Additional immersion back-up may be needed in extreme temperatures

Legionella cycle

Achieves legionella cycles, even at -10°C

BAXI
