<b>Section 15</b> - Remuneration policy (Art. 450 CRR)	102
<b>Section 16</b> - Leverage (Art. 451 CRR)	114
<b>Section 17</b> - Use of credit risk mitigation techniques (Art. 453 CRR)	120
<b>Section 18</b> - Liquidity risk	122
<b>Certification by the Financial Reporting Officer</b>	131
<b>Certification compliant with Article 431 (3) of the CRR (Regulation (EU) No. 575/2013 as updated) on disclosure requirements pursuant to Part Eight of the CRR</b>	132

## Introduction

The Basel Committee Accords (“Basel 3”) aimed at strengthening banks' capacity to absorb shocks from financial and economic tensions, improving risk management and governance and strengthening banks' transparency and reporting, entered into force in European Union law on January 1, 2014.

This being said, at Community level, the contents of “Basel 3” were adopted with two distinct pieces of legislation:

- ▶ Regulation (EU) No. 575/2013 dated June 26, 2013 (“CRR”) - Part eight “Disclosure by institutions” (Arts. 431 - 455) and Part ten, Title I, Chapter 3, “Transitional provisions for disclosure of own funds” (Art. 492) - which governs Pillar I prudential supervision mechanisms and public disclosure rules (Pillar III);
- ▶ Directive 2013/36/EU of June 26, 2013 (“CRD IV”), which concerns, inter alia, conditions for access to banking, freedom of establishment and freedom to provide services, the prudential supervision process and additional capital reserves.

The above-mentioned European regulation became applicable in the Italian legal system on the basis of Bank of Italy Circular No. 285 “*Supervisory Provisions for Banks*” of December 17, 2013 as subsequently amended, which implements the provisions of the CRR and the CRD IV.

With the publication of Regulation (EU) No. 876/2019, (CRR2), the EBA introduced a series of significant amendments to the regulatory framework, applicable as of June 28, 2021. These changes, regarding in particular Part Eight of the CRR, aim to standardize the periodic disclosure to be provided to the market.

In Implementing Regulation (EU) No. 637/2021, operators were provided with instructions for mapping between the information to be published starting from the reference date of June 30, 2021 and what is set forth in supervisory reporting. In accordance with the CRR2 Regulation, banks publish the required information at least on an annual basis, and the Core Metrics on a semi-annual basis. It is also required to publish on a half-yearly basis the disclosure of exposures subject to the measures applied in response to the Covid-19 crisis as established by the Bank of Italy in application of the EBA Guidelines (EBA/GL/2020/07). Credit institutions are responsible for evaluating the need to provide the required information more frequently, in light of the relevant characteristics of their activity and elements susceptible to rapid changes. The guidelines specify minimum content consistent with the significance of the reporting institution, particularly with reference to capital requirements, the breakdown and adequacy of capital, the leverage ratio, risk exposure and the general characteristics of systems in place to identify, measure and manage such risks.

### The approach based on three “Pillars” was maintained.

Specifically:

- ▶ **Pillar I** defines the system of capital requirements that banks are required to meet to deal with typical banking risks: credit risk (which also includes counterparty risk), market risk and operational risk. This aspect has been strengthened by introducing a definition of higher quality capital and requiring additional capital conservation buffers, with the inclusion of rules on liquidity risk management, for both the short term (Liquidity Coverage Ratio - LCR) and the long term (Net Stable Funding Ratio - NSFR), and the introduction of a limit on leverage;
- ▶ **Pillar II** requires banks to set up strategies, control processes and tools for determining, in addition to Pillar I risks, the adequacy of current and future capital. It is the Supervisory Authority's responsibility to verify the reliability and accuracy of the results generated and, where necessary, to take appropriate corrective action. The BFF Group annually submits the “ICAAP/ILAAP Report” to the Bank of Italy, as an autonomous assessment of current and future capital adequacy and the liquidity risk governance and management system in relation to the risks assumed and company strategies;

- ▶ **Pillar III** establishes specific periodic disclosure obligations concerning capital adequacy, risk exposure and the general features of the related systems for the identification, measurement and management of such risks. This aspect has also been revised to introduce increased transparency requirements and more detailed information on the breakdown of regulatory capital and on how the Banking Group calculates its capital ratios.

Based on Article 433 of the CRR, banks publish the public disclosures required by EU regulations at least on an annual basis and on a half-yearly basis the Principal Metrics, together with the balance sheet documents and disclosures on exposures subject to the measures applied in response to the Covid-19 crisis as required by the Bank of Italy in application of the EBA Guidelines (EBA/GL/2020/07).

To this end, the Board of Directors of BFF Bank has approved a dedicated procedure named "Procedure for Disclosure to the Public (Pillar III)".

Pursuant to this procedure, the disclosure to the public should be:

- ▶ approved by the Board of Directors before it is made public;
- ▶ published on the website [www.bffgroup.com](http://www.bffgroup.com) (Section: : <https://investor.bff.com/it/pillar-iii>) at least once a year and semi-annually with regard to the Principal Metrics and the disclosure of exposures subject to the measures applied in response to the Covid-19 Crisis, by the deadlines set for the publication of the financial statements, and therefore within 30 days of the date of approval of the financial statements by the Shareholders' Meeting.

The BFF Bank Banking Group (also "BFF Banking Group" or the "Group") is the largest specialized finance operator in Italy, as well as one of the leaders in Europe in the management and non-recourse disposal of trade receivables due from Public Administrations, and in the area of securities services and payment services. The Group is active in Italy, Croatia, France, Greece and Portugal through BFF Bank, in Spain through BFF Finance Iberia S.A.U. ("BFF Finance Iberia") and in Poland, the Czech Republic and Slovakia through BFF Polska S.A. ("BFF Polska") and its associates (the "BFF Polska Group").

BFF Bank meets the obligation of disclosure to the public for the BFF Banking Group and drafts this document on a consolidated basis based on the above-mentioned regulatory provisions. In line with the provisions of the CRR.

Please note that:

- ▶ Information on the risks to which the Group is exposed and on risk management and control policies is also provided in Part E of the Notes to the Consolidated financial statements at December 31, 2022;
- ▶ Information relating to Own funds and banking capital ratios, relating to the Group, is also published in Part F of the Notes to the 2022 Consolidated financial statements;
- ▶ Information on governance is also provided in the "Report on Corporate Governance and Ownership Structure" published in the "Governance" section of the Group website [www.bff.com](http://www.bff.com);
- ▶ Information regarding the Group's remuneration and incentive policies is also provided in the "Report on Remuneration" published in the "Governance" section of the Banking Group website;
- ▶ With reference to the best practices identified by the EBA in the Report "on assessment of Institutions' Pillar 3 Disclosure" (EBA/Rep/2020/09) and the Bank of Italy in the Supervisory expectations on climate-related and environmental risks (April 2022), the disclosure in terms of financial sustainability and ESG risks (environmental, social and governance risks) is provided, on the basis of regulations in force, in the Sustainability section on the Group's website [www.bff.com](http://www.bff.com).

The Disclosure to the Public (Pillar III) is also subject to the certification of the Financial Reporting Officer pursuant to Article 154-bis of Legislative Decree 58/98 (Consolidation Law on Finance, or "TUF").

This document is broken down into 18 sections, which provide qualitative and quantitative information referring to the date of December 31, 2021. The paragraphs for which there is no informational content are not published.

All amounts are stated in thousands of euros, when not specified otherwise.

The summary statement of the sections required by the reference regulation is laid out below, with an indication of the relevant information published in this document.

## Section 1

### Risk management objectives and policies (Art. 435 CRR)

#### Qualitative disclosure

##### Introduction

BFF Banking Group has adopted suitable corporate governance tools and adequate management and control mechanisms to mitigate the risks to which it is exposed.

These measures are part of the governance of the organization and of the internal control system, aimed at ensuring management practices grounded in efficiency, effectiveness and fairness, covering every type of business risk, consistent with the characteristics, dimensions and complexity of the business activities carried out by the Group.

With this in mind, the Group formalized its risk management policies and periodically reviews them to ensure their effectiveness over time. It constantly monitors the functioning of the risk management and control processes.

Such policies define:

- ▶ The governance of risks and the responsibilities of the Organizational Units involved in the management process;
- ▶ The mapping of the risks to which the Group is exposed, the measuring and stress testing methods, and the information flows that summarize the monitoring activities;
- ▶ The annual assessment process on the adequacy of internal capital and the adequacy of the liquidity risk governance and management system;
- ▶ The activities for the assessment of prospective capital and liquidity adequacy, associated with the strategic planning process.

The corporate governance bodies of BFF Bank S.p.A. - as BFF Banking Group's Parent Company - define the risk governance and management model at Group level, taking into account the specific types of operations and the related risk profiles characterizing all of the Group's entities, with the aim of creating an integrated and consistent risk management policy. Within this framework, the Parent's corporate governance bodies perform the activities entrusted to them not only with regard to their specific business activities, but also taking into account the Group's operations as a whole and the risks to which it is exposed, and involving, as appropriate, the governance bodies of the subsidiaries in the decisions concerning risk management procedures and policies.

At the Group level, the Risk Management Function cooperates in the process of defining and implementing the risk governance policies through an adequate risk management process. The Function Head is not involved in the operating activities he or she has to monitor, and his or her tasks and responsibilities are governed by specific Internal Regulations.

##### The internal control system

The CEO is responsible for the Banking Group's Internal Control system.

Pursuant to the provisions of the Supervisory Authority, the organizational framework of the Group's internal control system is based on the following control levels:

- ▶ **First-level controls** (line controls) aim to ensure that transactions are carried out correctly, and are performed by the same operating structures that execute the transactions, also with the support of IT procedures and constant monitoring by the heads of such operating structures.
- ▶ Second-level controls aim to ensure the correct implementation of the risk management process and compliance with the regulatory framework, including the risk of money laundering and terrorist financing. The functions responsible for such controls are distinct from business functions and contribute to the definition of risk governance policies and the risk management process and are entrusted to the Risk Management Function and to the Compliance and Anti-Money Laundering Function. The Risk Management Function and the Compliance and AML Function - organizationally and functionally autonomous and distinct - report to the Chief Executive Officer and are independent of the internal audit function, as it performs audits on them. The duties and respective responsibilities are governed within the pertinent internal regulations of the functions.
- ▶ **Third-level controls** and **internal audit** activities are instead carried out by the Group's Internal Audit Function, reporting directly to the Board of Directors.

### Focus on Control Functions

#### **Risk Management**

In terms of second-level controls, the Function ensures the consistency of the risk measurement and control systems with the processes and methodologies of company activities by coordinating with the relevant company structures; oversees the realization of the process for determining adequacy of capital and liquidity risk governance and management systems ("ICAAP/ILAAP"); monitors the controls over the management of risks, in order to define methods to measure those risks; assists corporate bodies in designing the Risk Appetite Framework (RAF); verifies that the limits assigned to the various operating functions are being observed; and checks that the operations of the individual areas are consistent with the assigned risk and return objectives.

At Group level, the Risk Management Function is responsible for:

- ▶ Cooperating with the corporate governance bodies in defining the overall risk management system and the entire reference framework relating to the assumption and control of Group risks (Risk Appetite Framework);
- ▶ Ensuring that the Parent and each Group Company has an adequate risk management system, consistent with the Group's strategy and policy and with the Supervisory Provisions;
- ▶ Providing a proper assessment of the capital absorbed, also under stress conditions, and of the related present and prospective capital adequacy, by defining processes and procedures to meet every type of present and future risk, taking into account strategies and context changes;
- ▶ Overseeing the implementation of the Risk Management Process, as defined in the Group risk management policy, and ascertaining that it is being complied with;
- ▶ Monitoring the adequacy and effectiveness of the actions taken to resolve weaknesses found in the risk management system;
- ▶ Submitting periodic reports to the corporate bodies on the activities carried out and providing them with consulting on risk management issues;
- ▶ Handling the measurement of risks, including market risks, underlying relationships with related parties, verifying compliance with the limits assigned to the various Company Structures, checking the consistency of the operations of each unit with the levels of risk propensity defined in the RAF.

The Risk Management Function is also responsible for the overall vision of all risks assumed by the Group and includes the specific skillsets relating to the management of the various types of risk, ensuring the promotion of a company-wide risk culture. In particular, the Risk Management Function:

- ▶ Is responsible for defining and updating the methodologies and tools for the identification, measurement, assessment, control, management and mitigation of the Pillar I and Pillar II Risks to which the Group Companies are exposed;
- ▶ Is involved in the definition of the RAF, the risk governance policies and the various phases of the Risk Management Process as well as the establishment of operational limits on the assumption of the various types of risk. In this regard, it also has the duty of proposing the quantitative and qualitative parameters necessary to define the RAF, which also refer to stress scenarios and, in the case of changes in the bank's internal and external operating context, the adjustment of such parameters;
- ▶ Defines and enacts the annual activity plan and informs the Parent Company's Board of Directors on an annual basis about the performance of its activities;
- ▶ Monitors the effective risk assumed by the Group Companies on an ongoing basis and its consistency with risk targets, as well as respect for the operating limits on the assumption of the various types of risk, as a result optimizing capital allocation processes;
- ▶ Handles the updating of the "Contingency Funding Plan" and oversees the monitoring of the relative contingency indicators;
- ▶ Verifies the adequacy of the RAF and the operating limits defined therein, as well as the adequacy of the Risk Management Process;
- ▶ Defines shared metrics for the assessment and control of operational risks consistent with the RAF, coordinating with the Compliance and AML Function and with the ICT O.U.;
- ▶ Defines methods for the assessment and control of reputational risks, coordinating with the Compliance & AML Function and with the Company Structures that are most exposed;
- ▶ Supports the corporate bodies in the assessment of strategic risk, monitoring the significant variables;
- ▶ Ensures the consistency of the risk measurement and control systems with the processes and methodologies for the assessment of company activities by coordinating with the relevant Company Structures;
- ▶ Develops, applies and ensures the application of indicators capable of identifying anomalies and inefficiencies in risk measurement and control systems;
- ▶ Analyses risks linked to new products and services and those deriving from entry into new operating and market segments, assuming different risk scenarios and evaluating the bank's capacity to ensure effective risk management. It may ask for changes to be made to specific products or services to be screened beforehand by the corporate bodies in compliance with the new product approval process;
- ▶ Monitors portfolio diversification at Group level, in order to avoid excessive exposure concentration;
- ▶ Monitors operating limits and large exposures;
- ▶ Develops preventive opinions on the consistency with the RAF of Major Operations (MO), possibly by acquiring the opinion of other Functions, O.U.s and/or Departments involved in the Risk Management Process, depending on the nature of the transaction;
- ▶ If the RAF is violated, including operating limits, it evaluates the relative reasons and the effects on the company situation, also in terms of costs, informs the operating units involved as well as the corporate bodies and proposes corrective measures. Ensures that the body with strategic supervision functions is informed in the case of serious violations; the Risk Management Function plays an active role in ensuring that the recommended measures are adopted by the functions concerned and brought to the awareness of the Corporate Bodies;

- ▶ Monitors the adequacy and effectiveness of the actions taken to resolve weaknesses found in the Risk Management Process;
- ▶ Performs second-level controls on the guarantees acquired to secure credit exposures;
- ▶ Evaluates the consistency of the classification of performing and non-performing loans;
- ▶ Calculates value adjustments on the Group's performing loans consistent with the approaches defined by IFRS 9;
- ▶ Evaluates the consistency of generic and specific value adjustments applied by the Group and the adequacy of the debt collection process;
- ▶ Proposes to the CEO the definition of the qualitative and quantitative Stage Allocation criteria and monitors them;
- ▶ Performs a performance analysis to evaluate the qualitative evolution of the credit risk of each Group portfolio in line with IFRS 9 criteria;
- ▶ Oversees and contributes to the development, as the second-level control function - and therefore separate from the operating units - of the process of determining the internal funds transfer pricing system, in line with the requirements of the Supervisory Provisions in force and taking into account the specific operational characteristics of the Group;
- ▶ Prepares adequate information flows for the corporate bodies and the other Company Control Functions of the Parent Company; in particular, the Manager of the Risk Management Function informs the Manager of the Internal Audit Function of the weaknesses that may be of interest for audit activities;
- ▶ Verifies, within the scope of controls on the Depository Bank, the consistency over time of the methodologies and policy adopted for measuring financial instruments and performs spot checks on the correct use of pricing models, the classification of illiquid/unlisted securities and their proper valuation, ex post with respect to the definitive NAV valuation;
- ▶ Monitors liquidity risk, also performing, inter alia, the calculation of the LCR - Liquidity Coverage Ratio and NSFR - Net Stable Funding Ratio liquidity indicators, and the internal Minimum Cumulative Balance indicator.

Furthermore, as already mentioned, the Risk Management Function is responsible for managing the internal capital adequacy assessment process (ICAAP) and the internal liquidity adequacy assessment process (ILAAP) and acts as the planning, guidance and coordination structure for such processes. In this context, the Risk Management Function is responsible for:

- ▶ Identifying the risks (and the relative sources) to be subjected to assessment on the basis of an analysis of the regulatory context, the reference market, operations and the business lines;
- ▶ Observing the effective risk assumed by the Group on an ongoing basis and its consistency with risk targets, as well as respect for the operating limits on the assumption of the various types of risk;
- ▶ Verifying that the risk measurement and control systems are subjected to periodic backtesting, that an appropriate number of scenarios are analyzed and that conservative assumptions are used on dependencies and correlations; in risk measurement, generally taking into account model risk and any uncertainty in the evaluation of certain types of financial instruments;
- ▶ Identifying and documenting the differences between regulatory methodologies and the methodologies used for Pillar II Risks, any time they are developed/revised;
- ▶ Defining and applying valuation stress test methodologies, at least annually, on the robustness and effectiveness of the stress testing program and the need to update it;
- ▶ Measuring Internal Capital against each risk and determining total Internal Capital;
- ▶ Generating the reporting to be sent to the Organizational Units involved in the process;

- ▶ Reconciling total capital with Own Funds, identifying, amongst the capital elements deemed appropriate for the coverage of total Internal Capital, the items linked to Own Funds;
- ▶ Identifying and documenting the composition of total capital available against the total Internal Capital requirements and verifying the relative coverage;
- ▶ Preparing the documentation relating to the methodologies and models used, for the purpose of internal approval by the Parent Company's Board of Directors;
- ▶ Drafting the ICAAP/ILAAP Report;
- ▶ Performing the self-assessment within the ICAAP/ILAAP Report;
- ▶ Monitoring the activities planned and the realization timing relating to the areas for improvement identified during the ICAAP/ILAAP self-assessment and is also responsible for their full implementation.

Lastly, within the scope of the Recovery Plan, the Risk Management Function is responsible for:

- ▶ Preparing the definition and updating of the overall recovery framework structure and the Recovery Plan, with the support of the O.U.s involved in various bases;
- ▶ Handling the phase of proposing the definition of the Recovery Plan, with reference to:
  - Recovery indicators and the relative calibration thresholds to be included in the Recovery Plan;
  - Recovery scenarios (definition of quantitative and qualitative metrics);
  - Evaluation of the capital and liquidity impacts of the recovery options to be included in the Recovery Plan, in coordination with the Parent Company's Finance and Administration Department;
- ▶ Coordinating the operating phases for the preparation and formalization of the Recovery Plan;
- ▶ Interacting with the Competent Authority on the matter, particularly with regard to any requests for clarification or additional information;
- ▶ Monitoring recovery indicators;
- ▶ Supporting the CEO or another Managing Director on the Board of Directors in the verification and monitoring of the proper management of the state of crisis.

### **Compliance and Anti-Money Laundering (AML)**

Also within the scope of second-level controls, the function supervises, according to a risk-based approach, the management of the risk of non-compliance with regulations, with regard to all the activities falling within the regulatory framework for the Bank and the Group - also through its reference persons/local functions at its branches and/or subsidiaries - continuously verifying whether internal processes and procedures are adequate in preventing such risk and identifying the relevant risks to which the Bank and the subsidiaries are exposed; it guarantees an overall and integrated vision of the risks of non-compliance to which the Bank and the Subsidiaries are exposed, ensuring adequate disclosure to the relevant Corporate Bodies. Furthermore, this function has the task of preventing and combating money laundering and terrorist financing, also by continuously identifying the applicable rules in this area, also verifying the consistency of processes with the objective of ensuring that the Bank and the Group conform to the law on anti-money laundering and counter-terrorist financing. It is also responsible for the second-level controls required by the relevant regulations. At Group level, the Compliance and AML Function is responsible for:

- ▶ Identifying on an ongoing basis the rules applicable to the Group and evaluating and measuring their impact on company processes and procedures, identifying the company functions and structures concerned and informing them in that regard;
- ▶ Ensuring the mitigation of compliance risk, in order not to incur legal or administrative sanctions, significant financial losses or reputational damage as a result of violations of mandatory provisions (laws, regulations) or internal regulations (e.g., bylaws, codes of conduct, corporate governance codes);

- ▶ Identifying the compliance risks deriving from the introduction of new regulations, preventively evaluating their potential impact on processes and procedures; monitoring the adoption of organizational adaptations (structures, processes and procedures) required to prevent compliance risk and verify their effectiveness;
- ▶ Collaborating in the definition of policies and procedures for mitigating legal and reputational risks linked to the failure to comply with internal and external regulations and, when necessary, identifying suitable improvements and/or corrections, and verifying their adequacy and proper application;
- ▶ Verifying the existence and reliability, on an ongoing basis, of suitable procedures and systems for ensuring respect for all legal obligations and those laid out by internal regulations;
- ▶ Providing consulting and assistance to the corporate bodies on all matters in which compliance risk plays a role;
- ▶ Collaborating in personnel training activities;
- ▶ Spreading a corporate culture inspired by principles of integrity, fairness and regulatory compliance;
- ▶ Supporting company structures for the definition of compliance risk assessment methodologies.

### **Internal Audit Function**

The Internal Audit function carries out independent controls for the Parent Company, the foreign branches and the other Group companies with which servicing agreements are in place that govern the provision of the audit service. Moreover, the Parent Company's Internal Audit Function performs management and coordination with respect to the Internal Audit Function of the subsidiary BFF Polska S.A., whose head functionally reports to the Head of the Group function.

The Function regulation approved by the Board of Directors specifies that the Internal Audit Function, within the third-level controls, evaluates the overall functioning of the internal control system and brings to the attention of the corporate bodies any possible improvements, with particular reference to the RAF (Risk Appetite Framework), the process for the management of risks and the tools for their measurement and control.

The Head of the Internal Audit function has the necessary autonomy and is independent of the operating structures, in compliance with Bank of Italy's regulation on Internal Controls, the Corporate Governance Code and internal regulations. He presents a long-term audit plan to the corporate bodies which includes the compulsory activities established by reference regulations (remuneration and incentive policies and practices, ICCAP, ILAAP, ICT, etc.) as well as the actions identified according to a risk-based approach; the audit plan is subject to annual review. Actual reporting on audit activities generally takes place on a quarterly basis.

### **Other control functions and bodies**

Lastly, under the provisions and terms of the law, the **Financial Reporting Officer** evaluates the effectiveness of the oversight being provided by the Internal Control System with regard to Financial Reporting Risk. In particular, it performs assessments and monitoring at a Group level, evaluating the adequacy of the coverage of the potential risk by performing adequacy and effectiveness tests on key controls on an ongoing basis, identifying possible points of improvement in the Internal Control System in the accounting area. In this context, the Financial Reporting Officer and the Chief Executive Officer of the Parent Company together certify the following aspects through specific reports attached to the annual and consolidated financial statements, and interim reporting: the suitability of the accounting procedures used in preparing the annual, consolidated and interim financial statements; compliance of documentation with applicable international accounting standards endorsed by the European Union; whether accounting books and records are suitable for providing a true and fair view of the financial position, financial performance and cash flows of the Group on a consolidated level and of the individual subsidiaries included under the scope of the consolidation; and the reliability of content, in relation to specific aspects, of the Director's report on operations and interim reporting.

The Bank also has an Organization, Management and Control Model pursuant to Legislative Decree No. 231/2001, consisting of a General Part and Special Parts that lay out the activities, controls and reporting mechanisms for each organizational unit/company body, including the foreign branches, with a collegial **Supervisory Body** that oversees its adequacy through periodic audit activities.

Updates to the Model are approved during the year by the Board of Directors following a process of analyzing the most recently introduced types of offense as well as to take into account organizational developments within the Bank.

The Spanish subsidiary BFF Finance Iberia, S.A. adopted its own Organizational Model in accordance with Article 31-*bis* of the Spanish Penal Code, similar in its structure to the Bank's Model, and an independent, single-person Supervisory Body.

For the Polish subsidiary BFF Polska S.A., in compliance with local regulations, specific "anti-corruption" guidelines have been adopted, with the identification of a specific single-person body responsible for them, represented by BFF Polska S.A.'s local Compliance & AML Function.

The foreign branches apply their own Protocol approved by the Parent Company's Board of Directors, which also takes into account local regulations.

The Group's Code of Ethics is the document defining the set of ethical values embraced by Group activities, respect for which makes it possible, among other things, to prevent the criminal offenses enumerated in Legislative Decree No. 231/01.

Furthermore, the Parent Company and the subsidiaries have a whistleblowing process in place formalized in a dedicated procedure approved by the competent bodies.

The management policies adopted for each category of risk of the Banking Group, described in more detail in the relative sections, are set forth below.

## CREDIT RISK

The main activity of the Banking Group is factoring, which is governed, in Italy, by the Italian Civil Code (Book IV - Title I, Chapter V, Articles 1260-1267) and Law No. 52 of February 21, 1991 and subsequent amendments, and which consists of a plurality of financial services that can be structured in various ways, mainly through the sale of trade receivables. The Group mainly offers non-recourse factoring services with debtors belonging to the public administration, in addition to other lending products always with a focus on the Public Administration. From March 2021, with the integration of DEPObank, the Group began to provide credit as an instrumental activity in addition to specific treasury activities (managed through the granting of operating limits) and securities services (mainly managed through the granting of account overdraft facilities).

Moreover, for the purpose of diversifying its business and its geographical presence, the Banking Group operates in Eastern European countries through the BFF Polska Group and its subsidiaries (BFF MF, BFF CZ, BFF CEE, Medico Fund, Municipal Fund), which mostly provide financial services to companies operating in the healthcare sector and to Public Administration agencies and their suppliers in the countries in which they operate.

## Credit risk management policies

### 1. Organizational aspects

The assessment of a transaction, for the different products offered by the Banking Group, is conducted through the analysis of a number of factors, ranging from the degree of risk fragmentation to the characteristics of the commercial relationship underlying the credit quality and the customer's/debtor's ability to repay.

The guidelines and procedures to monitor and control credit risk are set forth in the current "Credit Regulation," approved by the Board of Directors on June 30, 2021, and by the "Credit Regulation" of subsidiaries. A further organizational measure tackling credit risk is provided by the internal regulation for monitoring credit quality, which describes the credit control process on the debtor and is an integral part of the aforementioned "Credit Regulation".

Credit risk is therefore monitored at various levels within the framework of the multiple operating processes.

### 2. Management, measurement and control systems

The management, measurement and control system relating to credit risk has been created to ensure control over the main types of risks belonging to the credit risk category.

For this purpose, it must be noted that the core business carried out by the Group primarily consists, as mentioned above, of (i) the purchase of receivables on a non-recourse<sup>1</sup> basis due from debtors belonging to Public Administration agencies and (ii) lending to public counterparties.

Based on the above, in particular, credit risk is linked to the possibility that an unexpected change in the creditworthiness of a counterparty to which the Company is exposed may generate a corresponding decrease in the value of the credit position. It can be broken down as follows:

- ▶ Credit risk in the strict sense: the risk of default of counterparties to which the Group is exposed, which is fairly limited considering the nature of the Group's counterparties, the majority of which are not subject to bankruptcy proceedings or other procedures that could undermine their substantial solvency;
- ▶ Dilution risk: the risk that the amounts owed by the assigned debtor are reduced due to allowances or offsets arising from returns and/or disputes concerning the quality of the product or service or any other issue;
- ▶ Factorability risk: the risk related to the nature and characteristics of the commercial relationship subject to factoring/sale, affecting the ability of the trade receivable sold to self-liquidate (e.g., risk of direct payments from the debtor to the potentially insolvent assignor);
- ▶ Risk of late payment: the risk of a delay in the collection times of the receivables sold compared to those expected by the Group.

1) For the classification of factoring transactions as "non-recourse" and "recourse", irrespective of the contractual form, any transaction carried out with the full transfer to the Group of the risks and rewards connected with the assets subject to the transaction is considered "non-recourse", pursuant to IAS 39 and the new IFRS 9 ("derecognition").  
On the other hand, transactions that do not result in the above-mentioned transfer of risks and rewards to the Group are considered "recourse".

In light of the risks detailed above, the Group has internal regulations that describe the phases that industry regulations identify as components of the credit process:

- ▶ Background check;
- ▶ Decision;
- ▶ Disbursement;
- ▶ Monitoring and review;
- ▶ Dispute.

Non-recourse factoring by its very nature represents the service that is most exposed to credit risk. For this reason, the background check for the credit line application is carried out highly accurately on the basis of what is set forth in the Credit Regulation, the Credit Line Granting and Review Methodologies and Criteria, the non-recourse customer screening procedure and the entity and borrower screening procedure. Furthermore, after the first loan is granted, both customers and borrowers are reviewed at least every year to evaluate their creditworthiness and are also monitored on an ongoing basis.

The Group also marginally offers the following two types of services: “receivables management only” and “recourse factoring”.

In the “loans and receivables management only” service, credit risk is considerably reduced because it is limited to the Group’s exposure to the customer for payment of the agreed fees and commissions, that is, the reimbursement of legal fees incurred.

Recourse factoring is a residual activity for BFF Banking Group.

With reference to the granting of credit to counterparties using the custodian bank service, credit risk is very low, as it is mainly concentrated on bank counterparties, asset management companies and Funds.

With regard to the allocation of operating limits and/or “intermediation” caps, there is no specific request from customers and the assessment is initiated at the initiative of the Finance and Treasury OU or the relevant organizational units.

As part of the management of counterparties providing retail intermediation services, specific operating limits have been established, aimed at monitoring and controlling the operations of these entities. In some cases, guarantees have been requested to mitigate the risk assumed for these activities. Exposure to the customers’ credit risk is constantly monitored. The credit quality of public sector entities is analyzed within the framework of the risk of delay in repaying liabilities.

With specific reference to BFF Polska S.A., it should be noted that the company operates in Poland, and also in Slovakia and the Czech Republic through its subsidiaries.

BFF Polska S.A. mainly operates in three sectors:

- ▶ Financing the working capital of suppliers to the Public Administration;
- ▶ Financing current and future trade receivables in the public and healthcare sector;
- ▶ Direct financing for parties in the public and healthcare sector.

Also with regard to the specific types of investment by BFF Polska S.A. and its subsidiaries, Group credit risk management aims at building a robust and balanced financial asset portfolio to reduce to a minimum the risk of impaired exposures and at the same time generate the expected profit margin and loan portfolio value. As a general rule, the Banking Group’s customers have a suitable credit standing and, if necessary, adequate guarantees are requested to mitigate the risk of financial losses arising from customers’ non-performance.

Exposure to the customers' credit risk is constantly monitored. The credit quality of public sector entities is analyzed within the framework of the risk of delay in repaying liabilities.

The assessment of credit risk is part of an overall analysis of the adequacy of the Group's capital in relation to the risks connected with lending.

With this in mind, the Group uses the "standardized" approach to measure credit risk, as governed by Regulation (EU) No. 575/2013 (CRR) and adopted by the Bank of Italy Circular No. 285 "*Supervisory provisions for banks*" and Circular No. 286 "*Instructions for the preparation of supervisory reporting by banks and securities intermediaries*", both dated December 17, 2013, and subsequent amendments. This approach involves the classification of exposures into different classes ("portfolios"), depending on the type of counterparty, and the application of diversified weighting ratios, set forth in detail in Section 4 of this document, to each portfolio.

Furthermore, the credit risk management process abides by external regulations (CRR, Bank of Italy Circulars No. 285 "*Supervisory provisions for banks*" and No. 286 "*Instructions for the preparation of supervisory reporting by banks and securities intermediaries*" and subsequent amendments) regarding risk concentration.

Specifically:

- ▶ "Large exposure" means any risk position equal to or greater than 10% of the eligible capital, as defined in CRR II (equal to Tier 1 capital);
- ▶ As a banking group, the Group is required to limit each risk position to within the limit of 25% of the eligible capital, as defined in the CRR II (equal to Tier 1 capital), at both individual and consolidated level.

Considering the fact that the Group's exposure consists almost entirely of receivables purchased on a non-recourse basis and due from individual Public Administration entities and government securities, portfolio risk is considered limited, since the derecognition of receivables entails the allocation of the exposure to a higher number of counterparties (i.e., the assigned debtors), which, in the case of certain exposures, receive preferential treatment in terms of weighting for large exposures.

Finally, in accordance with Bank of Italy Circular no. 139 of 11 February 1991, as subsequently amended, "*Risk center. Instructions for credit intermediaries*", the Bank reports monthly to the Risk Center, providing information on the dynamics of the debtor's financial debt over time and on the ratio granted/used (which expresses the company's financial commitment and the margins of indebtedness to the system). This compliance also allows the visibility of the financial position of the subjects reported by the Bank, in order to better monitor the performance of the receivable.

### 3. Credit quality assessment

The Group performs an impairment test on the loan portfolio, aimed at identifying any impairment of its assets, in line with the provisions of the applicable standards and the prudential criteria required by supervisory regulations and the internal policies adopted by BFF Banking Group.

This assessment is based on the distinction between these two categories of exposures:

- ▶ *Exposures subject to generic adjustments ("collective impairment");*
- ▶ *Exposures subject to specific adjustments.*

Note that IFRS 9 entered into force on January 1, 2018. This standard replaces the concept of incurred losses, envisaged by IAS 39, with that of expected credit losses.

The approach adopted by the Group is based on a prospective model that may require the recognition of expected credit losses over the lifetime of the exposure on the basis of supportable information that is available without undue cost or effort and includes historical, current and forward-looking data. In this context, an approach based on the use of credit risk parameters (Probability of Default – PD, Loss Given Default – LGD, Exposure at Default – EAD) has been adopted, redefined based on a multi-period perspective.

More specifically, according to IFRS 9, impairment of receivables is recognized in three stages, each with different methods for calculating the losses to be recorded.

As for Stage 1, expected credit losses are measured over a 12-month period. As for Stage 2 (including financial assets whose credit risk increased significantly since initial recognition), expected credit losses are measured over the full lifetime of the instrument (lifetime expected losses). Stage 3 includes all financial assets that show objective impairment at the reporting date (non-performing exposures).

Additional information on credit risk is provided in section 7.

#### 4. Securitization transactions

At December 31, 2022, BFF Banking Group had no securitization transactions outstanding.

## COUNTERPARTY RISK

Counterparty risk represents a particular type of credit risk, characterized by the fact that the exposure, owing to the financial nature of the contract executed between the parties, is uncertain and can change over time in relation to the evolution of the underlying market factors.

For BFF, counterparty risk can be generated by repurchase agreements and derivatives. Counterparty risk is measured using the original exposure method.

## MARKET RISK

Market risk relates to positions held for trading, that is, positions intentionally held for sale in the short term, acquired in order to take advantage of purchase and sale price differences, or other changes in prices or interest rates.

The regulation identifies and regulates the treatment of the various types of market risk in reference to the regulatory trading portfolio. The Group measures market risk using the “Standardized” approach.

## INTEREST RATE RISK

For assessing the interest rate risk potentially linked to fluctuations in interest rates, the Group has adopted the method used to determine internal capital set forth in the 32nd update of Bank of Italy Circular No. 285/2013, including the adoption of the stress scenarios laid out in the EBA Guidelines (EBA/GL/2018/02). This method is applied based on the annual changes in interest rates on a daily basis, recorded during an observation period of six years, considering alternatively the 1st percentile (decrease) or the 99th percentile (increase), as laid out in Circular 285. Internal capital is determined by the worst-case result obtained between the two 1st/99th percentile scenarios.

The Bank also measures the exposure to interest rate risk using additional interest rate shock scenarios. Specifically:

- ▶ the parallel  $\pm$  200 bps scenarios, for the determination of the risk index, given by the “interest rate risk exposure/own funds” ratio (regulatory limit 20%, CRD IV Art. 98 par. 5);
- ▶ the six interest rate shock scenarios required by the EBA Guidelines, used to calculate internal capital under stress and to determine the operating limit defined by the “interest rate risk exposure/Tier 1” ratio. To respect the limit, the scenario with the worst result is considered (threshold 15%, Circular 285 and EBA Guidelines).

## EXCHANGE RISK

Exchange rate risk is represented by the Banking Group’s exposure to fluctuations in currency exchange rates, considering positions in foreign currency as well as those with indexation clauses linked to the exchange rate trends of a given currency.

The Group manages and monitors the risk of fluctuations in exchange rates. The Group has a specific internal regulation for the management of exchange risk referring to exposures arising from the management of assets, funding transactions, the purchase or sale of financial instruments in foreign currency, and any other type of transaction in a currency other than the reference currency. Specifically, the Group mitigates foreign exchange risk primarily by using derivative instruments. When possible, and in particular for less significant currencies for which transactions are limited, the Group operates through natural hedging.

Exposure to currency risk – determined on the basis of the net foreign exchange position using a method based on the supervisory regulations – is monitored by the Finance and Administration Department and managed in compliance with the limits established by specific internal rules.

## LIQUIDITY RISK

Liquidity risk is represented by the possibility that the Group may not be able to fulfill its payment obligations due to the inability to access funding in the financial markets, or because of restrictions on the disposal of assets. This risk is also represented by the inability to raise new financial resources adequate, in terms of amount and cost, to meet operating needs, which would force the Group to slow or halt the development of activities or sustain excessive funding costs to meet its obligations, with significant adverse impacts on the profitability of its operations.

As required by the provisions of the prudential supervision regulation issued by the Bank of Italy, the Group adopted a Group Risk Management Policy and a Group Treasury and Finance Regulation, aimed at maintaining a high degree of diversification in order to reduce liquidity risk, and identifying the governance and control principles and the organizational units responsible for the operational and structural management of liquidity risk. To ensure the implementation of the liquidity risk management and control processes, the Group adopted a governance model based on the following principles:

- ▶ Separation of processes for the management of liquidity and processes for the control of liquidity risk;
- ▶ Development of processes to manage and control liquidity risk, consistent with the hierarchical structure and through a process for the delegation of powers;
- ▶ Sharing of decisions and clear responsibilities among management, control and operational bodies;
- ▶ Making liquidity risk management and monitoring processes consistent with prudential supervisory requirements.

Liquidity risk stress tests were performed for assessing the potential impact of stress scenarios on the Group's solvency conditions.

The documents governing the matter are the "Group Liquidity Risk Management Policy", approved by the Board of Directors, with the aim of defining the guidelines for liquidity management and the documents to be adopted in a state of liquidity crisis (Contingency Funding and Recovery Plan), transposing the latest regulatory updates (see Bank of Italy Circular 285/2013). As part of the Risk Appetite Framework specific liquidity metrics have been defined, both regulatory, Liquidity Coverage Ratio - LCR and Net Stable Funding Ratio - NSFR, and internal, "minimum cumulative balance on total assets", calculated as the lowest weekly value in the quarter of reference of the ratio of the minimum cumulative balance recorded in the time periods within one month to the total assets of the last available group, in order to better represent the Group's operational reality.

Liquidity risk also includes the intraday risk deriving from the temporal mismatch between outflows (settled at daily cut-offs or when orders are received from customers) and inflows (settled at different intraday cut-offs), which may render it impossible for the Bank to discharge its payment obligations when they are called in due to a temporary lack of funds. To hedge intraday liquidity risk, rules are defined for the maintenance of a minimum portfolio of eligible securities necessary to meet requirements for intraday and periodic refinancing from central banks.

The Group's liquidity position, which is healthy and constantly monitored, has always remained solid thanks to the extensive availability of liquid reserves deriving from funding, so that the liquidity indicators – Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) – show values as at December 31, 2022 of 220.058% and 162.372%, respectively, well above the regulatory limits.

## ENCUMBERED ASSET MANAGEMENT PROCESS

As the Parent Company, BFF has adopted a specific policy for the management of the BFF Banking Group's encumbered assets, for the measurement and relative controls to be performed on them, which governs activities intended to:

- ▶ Outline the liquidity risk governance policies deriving from a deterioration in the credit quality of encumbered assets;
- ▶ Include in its emergency plans (Contingency Funding and Recovery Plan) strategies geared towards managing any potential increase in the share of encumbered assets deriving from situations of significant tension, or plausible, albeit unlikely, shocks, with regard, inter alia, to a rating downgrade for the Bank, the impairment of pledged assets and an increase in margin requirements;

- ▶ Ensure that the corporate bodies receive prompt information, at least with regard to:
  - i) The level, evolution and nature of the encumbered assets and sources constituting the encumbrance;
  - ii) The amount, evolution and credit quality of unencumbered assets that may be encumbered, with an indication of the volume of assets that may potentially be encumbered;
  - iii) The amount, evolution and nature of the encumbered assets resulting from the materialization of stress scenarios (potential share of encumbered assets).

BFF Banking Group monitors the “Asset encumbrance ratio” (hereinafter also the “AE ratio”), in order to observe the risk exposure trend linked to the share of encumbered assets, which derives from the unavailability of assets that may be readily liquidated through sale, sale with repurchase agreement, collateral assignment or securitization, resulting in:

- ▶ A reduction in the share of assets available to creditors and depositors not guaranteed;
- ▶ An increase in funding and liquidity risk, as the share of encumbered assets reduces the possibility of obtaining new secured funding.

The AE ratio is defined as the ratio between the total carrying amount of encumbered assets and the reused guarantees received, and the total assets in the financial statements and collateral received.

Within the RAF document, a specific operating limit is established, which is monitored on an ongoing basis.

## OPERATIONAL RISK

Operational risk is the risk of incurring a loss due to inadequacy or failures of procedures, human resources and internal systems or as a result of external events. This category includes, amongst other items, losses caused by fraud, human error, business interruption, system failure, breach of contracts and natural disasters; operational risk includes legal risk but excludes strategic and reputational risks.

With regard to the Banking Group, exposure to this category of risk is generated predominantly by failure in work processes, in organization, governance - human errors, computer software malfunctions, inadequate organization and control measures - as well as by any loss of human resources in key corporate management positions. Exposure to operational risks deriving from external sources appears to be of negligible importance, partly due to the mitigation tools adopted to address such adverse events (such as, by way of example: the business continuity plan, data storage processes, back up tools, insurance policies, etc.).

The process adopted by the Group to manage and control operational risks is founded on the principle of promoting a corporate culture for managing risk and defining the appropriate standards and incentives with the aim of fostering the adoption of professional and responsible behavior at all operational levels, as well as designing, implementing and managing an integrated system for operational risk management that is adequate in relation to the nature, activities, size and risk profile.

The operational risk assessment model adopted is of the “mixed” type, meaning a model based both on qualitative assessments - linked to process mapping, at-risk activities and the corresponding controls adopted - and on quantitative assessment.

Lastly, to calculate the capital requirements against operational risk, the Banking Group uses the Basic Indicator Approach (BIA) whereby the capital requirement is determined by applying a 15% coefficient to the three-year average of the relevant indicator, calculated on the financial statement items of the last three years, in accordance with Regulation (EU) No. 575/2013. Moreover, for a better assessment of risk exposure, the Bank has implemented a quantitative operational risk assessment process (OpVaR) that monitors the Group's operational risk calculated to the 99.9<sup>th</sup> percentile.

The Group also assesses operational risks in connection with the introduction of relevant new products, activities, processes and systems, and mitigates the consequent operational risk that may arise through the preventive involvement of the Company Control Functions and the definition of specific policies and regulations on various subjects and topics.

In addition, in order to control the above mentioned risks, the Group adopts specific Organization Models for the management of the risks regarding money laundering, occupational health and safety, and information security.

## RISKS OF THE OTHER COMPANIES

The consolidated financial statements include the aggregated statement of financial position items of BFF Bank S.p.A., BFF Finance Iberia, BFF Polska Group, BFF Immobiliare Srl and BFF Techlab Srl (See Section 2 - **Template EU LI3**).

These companies do not show further and relevant risk factors other than those mentioned in the preceding paragraphs.

### Declaration of the management body, pursuant to Article 435(1)(e) and (f) of EU Regulation No. 575/2013

The Chief Executive Officer of BFF Bank S.p.A., Massimiliano Belingheri, based on the mandate of the Board of Directors, declares pursuant to Article 435(1)(e) and (f) of EU Regulation No. 575/2013 that:

- ▶ The risk management systems put into place in the BFF Banking Group, and described in the document "Pillar III - Disclosure to the public - Year 2022", are aligned with the entity's profile and strategy;
- ▶ In particular, this section, "Risk management objectives and policies", of the above-mentioned document describes in brief the overall risk profile of the Group.

### Information relating to governance arrangements (Art. 435(2) CRR)

#### 1. BOARD OF DIRECTORS

##### A) Engagement policy for the selection of members of the Board of Directors and limit on assignments

The Bylaws<sup>2</sup> establish that the Bank is managed by a Board of Directors consisting of a number of members established by the Shareholders' Meeting on appointment which, in any event, may be no lower than 5 (five) and no higher than 13 (thirteen). The members of the Board of Directors have a term of office for a period not to exceed 3 (three) years, established on appointment, ending on the date of the Shareholders' Meeting convened to approve the financial statements for the final year of their term, and they may be re-elected.

---

2) The Bank's Bylaws are available on its website (the "Website") at the following address: [Bylaws - Investors - BFF Banking Group](#) and address the composition of the Board of Directors in Articles 14 et seq.

The Board consists of Independent directors - which make up the majority of the Directors -, Executive directors and Non-executive directors.

The appointment of Directors of BFF takes place, as set forth in Article 15 of the Bylaws, with the list voting mechanism, on the basis of lists submitted by the outgoing Board of Directors (the "BoD List") and/or by the Shareholders.

Each list contains a number of candidates not exceeding the number of members to be elected, listed with a progressive number, and the composition of the Board of Directors ensures: (i) the fulfillment by all Directors of the requirements laid out by regulations in force<sup>3</sup>; (ii) the presence of Independent directors, at least in the minimum number established by regulations and legislation in force over time; (iii) the appointment of Directors belonging to the least represented gender, at least to the minimum extent set forth in Law No. 120/2011; (iv) the presence of one Director from the list that received the second highest number of votes.

In the Bank's "*Board of Directors' Regulations*" (the "**BoD Regulations**")<sup>4</sup>, the Board of Directors established the requirements that BFF Directors must meet in addition to those laid out by regulations in force, and expressed its orientation regarding the maximum number of offices they may hold in other companies, in keeping with the provisions of Article 17 of the Fit & Proper Decree.

In compliance with regulatory and legislative provisions in force, the Board of Directors, with the support of the Appointments Committee and in coordination with the Chairman of the Board of Directors, for the purposes of the appointment and co-opting of its members, defines, taking into account the results of the annual self-assessment process (the "**Self-Assessment Process**", described below), its qualitative and quantitative composition considered optimal for the effective performance of the duties and responsibilities assigned to the management body by law, Supervisory Provisions and the bylaws, identifying and justifying the theoretical profile of the candidates (including the characteristics of professionalism and independence, if applicable) deemed appropriate for these purposes.

Specifically, on renewal of the entire management body, the Board of Directors, on the basis of the results of the Self-Assessment Process, makes its guidance available to the Shareholders on the optimal qualitative/quantitative composition (in terms, inter alia, of skills, experience, age, gender and international background), with regard to the characteristics and goals of the Bank.

The Board of Directors, appointed by the Shareholders' Meeting (the "**Shareholders' Meeting**") on March 25, 2021 on the basis of the Guidelines to Shareholders on the qualitative/quantitative composition of the Board of Directors and for the preparation of the Board of Directors list (the "**Guidelines**")<sup>5</sup> prepared by the outgoing Board of Directors, as subsequently supplemented by the Shareholders' Meeting on March 31, 2022, will remain in office for three years, until the Shareholders' Meeting convened to approve the financial statements for the year 2023. In quantitative terms, the Shareholders' Meeting adopted the guidance expressed in the Guidelines to Shareholders, inter alia, by confirming the number of Directors at nine.

3) Reference is made to Articles 147-ter(4) and 148 of Legislative Decree No. 58/1998 (as amended; the "**TUF**"), as well as the provisions laid out in Article 26 of Legislative Decree No. 385/1993 (as amended; the "**TUB**"), Decree No. 169/20 "*Regulation on the requirements and criteria of suitability for the performance of the role of corporate officers of banks, financial intermediaries, credit guarantee consortia, electronic money institutions, payment institutions and depositary guarantee systems*", which entered into force on December 30, 2020 (the "**Fit & Proper Decree**"), applicable at the first renewal of the bodies subsequent to its entry into force), Article 36 of Decree-Law No. 201/2011 ("**Salva Italia Decree**" which establishes an interlocking prohibition) and the Corporate Governance Code for listed companies approved by the Corporate Governance Committee established by the business associations (ABI, ANIA, Assonime, Confindustria), Borsa Italiana S.p.A. and the association of professional investors (Assogestioni) in January 2020 (the "**Corporate Governance Code**").

4) The BoD Regulations are available on the Bank's website at the following address: [Board of Directors Regulation - Investors - BFF Banking Group](#).

5) Available on the Website at the address <https://investor.bff.com/documents/20152/0/BFF-Orientamenti+per+gli+Azionisti-ITA.pdf/7d2a0ae2-af65-73b5-0d49-24f19ceb7273>.

Please note that on March 31, 2022, the Shareholders' Meeting confirmed the appointment of Ms. Monica Magri and Ms. Anna Kunkl, co-opted on February 10, 2022 following the resignation from office of Ms. Barbara Poggiali, and on March 1, 2022, following the resignation from office of Ms. Amélie Scaramozzino, respectively.

The Board of Directors in office at December 31, 2022 consists of the Directors listed below.

<b>Mr. Salvatore Messina</b>	Chairman
<b>Mr. Federico Fornari Luswergh</b>	Deputy Chairman - Non-Executive Director
<b>Mr. Massimiliano Belingheri</b>	Chief Executive Officer
<b>Ms. Gabriele Michaela Aumann</b>	Non-Executive Independent Director
<b>Mr. Domenico Gammaldi</b>	Non-Executive Independent Director
<b>Ms. Monica Magri</b>	Non-Executive Independent Director
<b>Ms. Anna Kunkl</b>	Non-Executive Independent Director
<b>Mr. Piotr Henryk Stepniak</b>	Non-Executive Director
<b>Ms. Giovanna Villa *</b>	Non-Executive Independent Director

(\*) Director taken from the minority shareholders' list.

For the sake of comprehensiveness, several of the current members of the Board of Directors already held the role of Director of the Issuer prior to the above-mentioned appointment. In particular, the following were appointed for the first time: (i) Mr. Salvatore Messina, as Director and Chairman of the Board of Directors, on January 14, 2013; (ii) Mr. Massimiliano Belingheri, as Non-Executive Director, on December 19, 2006 and, as of December 24, 2013, as Chief Executive Officer; (iii) Mr. Federico Fornari Luswergh, as Director, on April 29, 2010; (iv) Ms. Gabriele Michaela Aumann, as Director, on December 21, 2015. Following the Shareholders' Meeting resolution of March 31, 2022, the Board of Directors will remain in office in its current composition until the approval of the financial statements at December 31, 2023.

As concerns the qualitative aspect, at the time of appointment, the candidates for member of the Board of Directors, taking into account the indications set forth in the Guidelines, inter alia:

- (i) Declared the non-existence of reasons for ineligibility and incompatibility, as well as the fulfillment of the requirements laid out by regulations and legislation in force;
- (ii) Provided an exhaustive disclosure on their personal and professional characteristics, as well as on the skills gained in the banking, financial and/or other relevant fields as specified in more detail in the Guidelines and/or the BoD Regulations;
- (iii) Indicated the management and control offices held in other companies;
- (iv) Declared that they could dedicate adequate time to the office in light of its complexity.

After its appointment by the Shareholders' Meeting, on April 23, 2021 and, when Ms. Magri and Ms. Kunkl were co-opted on March 1, 2022 and March 31, 2022, respectively, the Board of Directors verified the compliance between the qualitative/quantitative composition deemed optimal and that actually resulting from the appointment process. At those times, the Board of Directors also verified, for each of its members, compliance with the limit on the number of assignments set forth in Articles 17, 18 and 19 of the Fit & Proper Decree, the availability of adequate time for carrying out the duties of office, taking into account, inter alia, participation in the board committees set forth in Article 16 of the Fit & Proper Decree, the fulfillment of the requirements of professionalism and integrity, the fulfillment of criteria of fairness and skill, the absence of offices in competing companies or groups of companies (also for the purposes of the interlocking directorship prohibition pursuant to Article 36 of Decree-Law No. 201/2011), the existence of independent judgment, set forth in Article 15 of the Fit & Proper Decree, and the fulfillment of the independence requirements pursuant to Article 148 (3) of the TUF and as referred to in Art. 147-ter (4) of the TUF and/or Article 2, recommendation 7 of the Corporate Governance Code of listed companies, and Article 13 of the Fit & Proper Decree for five Directors.

It should be noted that Mr. Salvatore Messina was qualified as independent pursuant to Articles 147-ter and 148(3) of the TUF and, despite the verification that the Chairman met the independence requirements on appointment, he is not currently classified as an Independent director as he has been part of the Bank's Board of Directors for more than nine years (since he was appointed for the first time on January 14, 2013). Ms. Gabriele Michaela Aumann, Mr. Domenico Gammaldi, Ms. Anna Kunkl, Ms. Monica Magri and Ms. Giovanna Villa declared that they meet the independence requirements pursuant to Article 148 (3) of the TUF and as referred to in Article 147-ter (4) of the TUF and Article 2, recommendation 7 of the Corporate Governance Code of listed companies.

The composition of the Board of Directors appointed on March 25, 2021, as later supplemented following co-opting on February 10, 2022 and March 1, 2022, as confirmed by the Shareholders' Meeting on March 31, 2022 - also with regard to the statements provided during the candidacy phase - is therefore compliant with applicable legislative and regulatory provisions regarding gender balance and the independence requirement. Subsequent to appointment, the continuing fulfillment of the above-mentioned requirements is confirmed on an annual basis by the Board of Directors, also as part of the Self-Assessment Process performed in keeping with the Supervisory Provisions and the Corporate Governance Code, as incorporated within the "*Board of Directors self-assessment process regulation*" adopted by the Bank.

In more detail, the Self-Assessment Process concerns aspects related to the qualitative/quantitative composition and functioning of the Board of Directors and its internal Committees, taking into account, amongst other items, the size, degree of diversity in terms of age, gender, experience and professional expertise, etc., of its members, the presence of non-executive and independent members and the adequacy of the appointment process and selection criteria in order to identify any points of weakness and guarantee the most correct functioning over time and the consequent effectiveness of the body with strategic supervision function and the board committees, as well as to guarantee the effectiveness of governance that is duly based on the principles of sound and prudent management.

The Self-Assessment Process for the year 2022 (the "**2022 Self-Assessment**") brought to light an overall positive judgment, with several points for improvement.

The summary statement of the number of offices held in other companies by members of the Board of Directors in office at December 31, 2022 is provided below, which takes into account the mechanisms of aggregation and exemption of the offices set forth in the *Regulation on the requirements and criteria of suitability for the performance of the role of corporate officers of banks, financial intermediaries, credit guarantee consortia, electronic money institutions, payment institutions and depositary guarantee systems* (the “Fit & Proper Decree”):

Director	Total number of offices held in other companies
Salvatore Messina	0
Federico Fornari Luswergh	1 executive
Massimiliano Belingheri	2 non-executive
Gabriele Michaela Aumann	0
Anna Kunkl	0
Piotr Henryk Stepniak	3 non-executive
Domenico Gammaldi	1 non-executive
Monica Magri	0
Giovanna Villa	2 non-executive

## B) Succession plan of the Chief Executive Officer

On December 20, 2017, the Board of Directors approved the “*Succession plan of the Chief Executive Officer*” (the “**Succession Plan**”), consisting of: (i) the “Contingency Plan” identifying (a) the steps to be taken immediately following the occurrence of a definitive or temporary impediment, and (b) the party responsible for taking over the role of Chief Executive Officer on a temporary basis, for the period of time required to appoint a new Chief Executive Officer in cases of definitive impediment, or until the state of impediment is over, in cases of temporary impediment; (ii) the “Succession Planning” which establishes the actions to be taken to identify and appoint a new Chief Executive Officer if a definitive impediment is confirmed.

The Appointments Committee annually checks the need and/or opportunity to update the Succession Plan, providing pertinent information to the Board of Directors so it may pass the relative resolutions.

The Succession Plan was revised by the Board of Directors - after being reviewed by the Appointments Committee -, most recently on November 26, 2021 in order to incorporate in particular the provisions introduced by the Fit & Proper Decree.

For more information, refer to the Corporate Governance Report relating to the year 2022.

## C) Policy on diversity adopted with regard to selection of members of the management body, its objectives and any relevant targets set out in that policy, and the extent to which these objectives and targets have been achieved

On September 28, 2018, the Board of Directors approved, at the proposal of the Appointments Committee, the “*Board of Directors diversity policy*”, updated on December 22, 2020 in order to incorporate, inter alia, (i) the amendment of the provision on the gender composition of the Board of Directors, based on which two-fifths of the elected directors (rounding up to the next whole number) must belong to the least represented gender for at least six consecutive terms of office as of the first appointment of the Board of Directors subsequent to January 1, 2020, (ii) the results of the Self-Assessment, (iii) the reference to Sustainable Success, and which was most recently updated on July 29, 2021, in order to incorporate the provisions introduced by:

(a) the Fit & Proper Decree, (b) the “Supervisory provisions on the procedure for assessing the suitability of representatives of banks, financial intermediaries, electronic money institutions, payment institutions and depositor guarantee system” and (c) the 35th update, of July 2, 2021, of Bank of Italy circular No. 285 of December 17, 2013 (the “**BoD Diversity Policy**”).

Such Policy is subject to review and, if necessary, updated at least on an annual basis, including with the help of external professionals, based on the proposal of the Appointments Committee. Revisions comply with the outcome of the Self-Assessment Process and are designed to reflect and anticipate changes in the Company, so that the identification of the requirements for Board composition is consistent with the above-mentioned outcome.

The BoD Diversity Policy describes the optimal characteristics of the composition of the management body, so that it may exercise its duties in the most effective way, making decisions on the basis of a plurality of qualified and diverse points of view.

In particular, it is deemed that the optimal composition of the Board of Directors should be geared towards meeting at least the following criteria:

- (i) The presence of a consistent number of Non-executive and/or independent directors other than the Chairman of the Board of Directors. In any event, in compliance with regulations in force over time and, unless the Bylaws call for a higher number of Directors, the number of Independent directors must be equal at least to the majority of the members of the Board, and if the Bank decides to submit the BoD List, at least half of the candidates on it must meet the independence requirements set forth by law, the Bylaws and the Board of Directors Regulations. The number of Non-executive and/or independent directors must also guarantee a diverse composition of the Internal committees;
- (ii) The maintenance of at least a share of two-fifths, rounded up, of the members of the Board of Directors, at the time of appointment and during the term of office, belonging to the least represented gender;
- (iii) Diversity in terms of age, so as to allow for a plurality of perspectives and management and professional experiences;
- (iv) The balancing of different periods of seniority in office, in an attempt to strike a balance between continuity requirements and management renewal;
- (v) Considering the Group’s international scope, the presence of one-third of directors who have gained adequate experience in international contexts (preferably in the Group’s markets and particularly in Eastern Europe, i.e. Poland, Czech Republic, Slovakia and Croatia) in order, inter alia, to prevent the endorsement of opinions and the phenomenon of “group thinking”, and in the specific business of depositary bank, payment and accessory services.

In general, the Directors should have a management and/or professional and/or academic and/or institutional profile such so as to achieve a diverse and complementary mix of skills and experience, gained for at least three years.

Specifically with regard to the Chairman of the Board of Directors and the Chief Executive Officer, the BoD Diversity Policy lays out the requirements of professionalism that they must have respectively gained for at least five years in compliance, inter alia, with what is set forth in the Fit & Proper Decree.

As noted previously, aside from the requirements of professionalism set forth by regulations, the Directors must meet the further requirements set forth in the BoD Regulations available on the Bank’s website, which should be referred to for further details: <https://investor.bff.com/it/regolamento-consiglio-di-amministrazione>.

The BoD Diversity Policy is primarily implemented - in compliance with provisions of law and the bylaws on the appointment of the Board of Directors and its Chairman with the list voting mechanism, as well as the Succession Plan - during (i) the appointment of Board of Directors, through the formulation by the outgoing Board of Directors, with the contribution of the Appointments Committee and the Chairman, of the Guidelines for Shareholders, as well as any formation and presentation to the Shareholders of the BoD List; (ii) co-opting; (iii) early departure from office of the Chief Executive Officer, and (iv) the appointment of the Chairman of the Board of Directors. For the appointment of the Board of Directors and for the co-opting pursuant, respectively, to points (i) and (ii), the Self-assessment process is fundamental.

Considering the approval of the BoD Diversity Policy in the third quarter of 2018, the monitoring of the results of its implementation was carried out during the appointment of the new Board of Directors by the Shareholders' Meeting on March 25, 2021 and subsequently during the appointment of the co-opted Directors Ms. Monica Magri and Ms. Anna Kunkl, who meet all of the diversity criteria and objectives set forth in the BoD Diversity Policy. In this regard, it was found that in relation to the composition of the Board of Directors: (i) the number of Non-executive and/or independent directors has remained unchanged; (ii) the number of Directors belonging to the least represented gender has remained unchanged; (iii) the diversification of age brackets within the Board of Directors has basically remained the same and the range of management and professional experience has been maintained, with the profiles of Ms. Magri and Ms. Kunkl deemed in many respects analogous to those of the former Directors they replaced, also in terms of adequate international experience.

The results of the monitoring of the BoD Diversity Policy, in its most recent version, are disclosed in the Corporate Governance Report relating to the year 2022.

The Board of Directors in office at December 31, 2022, consisted of:

- (i) 5 (five) Independent Directors, constituting the majority of the Board of Directors;
- (ii) 4 (four) female Directors and 5 (five) male Directors;
- (iii) 3 (three) Directors resident abroad, of whom 2 (two) non-Italian Directors, representing one-third of the members of the Board of Directors.

On April 24, 2021, on March 1, 2022 with respect to the co-opted Director Ms. Monica Magri and on March 31, 2022 with respect to the co-opted Director Ms. Anna Kunkl, the Board of Directors verified that the Directors have at least one of the following skills:

- a) Adequate knowledge of the banking industry, trends and the economic and financial system, banking and financial regulation and, especially, risk management and control methodologies, acquired through long-term experience in administration, management and control roles in the financial sector;
- b) Experience in business management and company organization acquired through long-term activity in administration, management or control roles in companies, or groups of significant economic size or in the public administration;
- c) Capacity to read and interpret economic and financial data, acquired through long-term experience in administration and control roles in companies or the exercise of professional activity or university instruction;
- d) International experience and knowledge of foreign markets acquired by performing long-term business or professional activities at foreign institutions or internationally focused entities, businesses or groups.

The profiles of these candidates are reasonably complementary in terms of professional background and expertise, so as to guarantee the development of internal dialog, efficient functioning and the overall suitability of the Board and the Board Committees to fulfill their obligations.

## 2. CONTROL AND RISKS COMMITTEE

### A) Establishment of a separate risk committee and the number of times it has met

In compliance with the Supervisory Provisions, and in line with the provisions of the Corporate Governance Code, the Board of Directors has established a Control and Risks Committee (the "CR Committee").

Pursuant to the "Control and Risks Committee Regulation", the CR Committee consists of 3 (three) Board members, all non-executive and the majority independent pursuant to the Bylaws and the BoD Regulations (*i.e.* TUF and Corporate Governance Code). An Independent director chairs the CR Committee.

The CR Committee in office at December 31, 2022 consists of the Independent Directors Ms. Gabriele Michaela Aumann (Chairman), Mr. Domenico Gammaldi and Non-Executive Director Mr. Federico Fornari Luswergh. Ms. Aumann (Chairman) has adequate accounting, financial and risk management expertise, as confirmed when she was appointed by the Board of Directors.

The CR Committee performs recommendation and advisory functions for the Board of Directors, in order to support, with adequate investigation activity, the assessments and decisions of the Board of Directors with respect to the Internal control and risk management system (relating to all activities supporting the proper and effective determination and application of the Risk Appetite Framework and risk governance policies) and periodic financial reporting and topics concerning sustainability; the CR Committee is also responsible for the periodic review of updates on the performance of sustainability initiatives.

The following also have a standing invitation to CR Committee meetings:

- ▶ the Chairman of the Board of Directors and
- ▶ the Chairman of the Board of Statutory Auditors, to guarantee the presence of at least one member of the control body.

The Chairman of the CR Committee reports on each of its meetings at the next meeting of the Board of Directors.

In 2022, the CR Committee met 16 times; the average duration of these meetings was roughly 2 hour and 13 minutes.

In the course of 2023, 15 meetings are indicatively planned, of which 4 were held on January 25, February 8, March 6 and March 27. The information flow on risks sent to the CR Committee is identified by a specific internal regulation and consists primarily of the documents prepared by the Company Control Functions (*i.e.* by the Internal Audit Function, the Risk Management Function and the Compliance and AML Function) concerning the planning of activities and the related reporting (annual reports and quarterly *Tableau de Bord*, also submitted subsequently to the Board and transmitted to the Bank of Italy), as well as other verifications required by regulations in force (reporting on material risks assumed by the Bank and other Group companies, disclosure on controls concerning risk governance and management, report on outsourced important operating functions, report on the Internal Capital Adequacy Assessment Process, etc.).

## Description of the information flow on risk to the Board of Directors

The information flow on risk addressed to the Board of Directors after assessment by the CR Committee is set forth below:

### INFORMATION FLOWS

Owner	Information flows generated	Frequency
Risk Management Function	Activity Plan	annual
	Report on activities performed	annual
	ICAAP/ILAAP	annual
	Risk Report Management	by event
	<i>Contingency Funding Plan</i>	annual
	<i>Recovery Plan</i>	bi-annual
	Tableau de bord of the Risk Management Function (Risk Report)	quarterly
Compliance Function	Activity Plan	annual
	Compliance Report	by event
	Tableau de bord of the Compliance Function	quarterly
	Disclosure relating to the implementation of framework resolutions	quarterly
	Complaints Report	annual
	Annual Report on Compliance activity	annual
AML Function	Audit Report (*)	half-yearly
	Report on activities performed	annual
Internal Audit Function	Activity Plan	annual/multi-year
	Audit Report	by event
	Tableau de bord of the Internal Audit Function	quarterly
	ICAAP/ILAAP Audit Report	annual
	Audit Report on outsourced important functions/activities	annual
	Audit Report on the Incentive and remuneration system (**)	annual
	Annual Report of Internal Audit activities	annual
	Annual Whistleblowing Report	annual
Supervisory Body	Report on activities performed	half-yearly
Board of Statutory Auditors	Opinions of the Board of Statutory Auditors	by event
	Reporting on gaps identified	by event

(\*) This report is also sent to the Chairman of the Board of Directors in his capacity as party responsible for suspicious transactions.

(\*\*) The Shareholders' Meeting is the final recipient of the report.

## Section 2

### Scope of application (Art. 436 CRR)

#### Qualitative disclosure

The disclosure requirements pursuant to this document, as set forth pursuant to Article 436 of the CRR, refer to the BFF Bank Banking Group, enrolled in the Register of Banking Groups, of which BFF Bank is Parent Company.

BFF Banking Group is the largest specialized finance operator in Italy, as well as one of the leaders in Europe, in the management and non-recourse disposal of trade receivables due from Public Administrations, and in the area of securities services and payment services. The Group is active in Italy, Croatia, France, Greece and Portugal through BFF Bank, in Spain through BFF Finance Iberia and in Poland, the Czech Republic and Slovakia through BFF Polska and its associates (the "BFF Polska Group").

On January 19, 2022, the company BFF Immobiliare S.r.l., a wholly owned subsidiary of BFF Bank S.p.A., was established. This company was established with a view to finalizing the Casa BFF operation, which involved the purchase of a buildable area and the subsequent development of an office building which will become the new registered office of the BFF Group and will house all of the Bank's personnel present in the city of Milan, who are currently divided between three different buildings.

On October 3, 2022, BFF Bank finalized the acquisition of the IT company "MC3 Informatica S.r.l." which as of the same date changed its company name to BFF Techlab S.r.l. This transaction will allow for the vertical integration of all development activities linked to the management and evolution of the Group's information system, favoring cost synergies and boosting operational efficiency.

Subsidiaries are companies over which the Group exercises control. The Group controls a company when it is exposed to the variable returns generated by it and has the ability to affect such returns through its power over the company. Generally, control is deemed to exist when more than half of the voting rights are directly or indirectly held, taking also into account potentially exercisable or convertible voting rights.

All direct subsidiaries are consolidated on a line-by-line basis from the date on which control is transferred to the Group. Conversely, they are excluded from the scope of consolidation when such control ceases.

The financial statements and notes of the companies that are consolidated on a line-by-line basis are prepared in accordance with the IASs/IFRSs used for the consolidated financial statements.

The scope of consolidation relevant for the purposes of the financial statements reflects the aggregation of balance sheet and income statement items of BFF Bank S.p.A. (BFF), BFF Finance Iberia S.A. (wholly owned subsidiary of BFF Bank S.p.A.), the companies of the BFF Polska Group, BFF Immobiliare Srl and BFF Techlab Srl.

BFF Bank also offers deposit products to retail and corporate customers in Italy, Spain, Poland, Germany, Ireland and the Netherlands.

BFF Finance Iberia S.A. started operating in the *non-recourse factoring* sector of the Spanish market in 2010 and consolidated its leadership position thanks to the acquisition of IOS Finance in 2019, one of its main competitors (now merged by incorporation into BFF Finance Iberia). Credit management is also provided by BFF in Spain.

BFF Polska Group is an independent specialized operator, leader in the provision of financial services to companies operating in the healthcare sector in Poland, Slovakia and the Czech Republic.

BFF Polska Group mainly operates in three areas:

- ▶ Financing the working capital of suppliers to the Public Administration;
- ▶ Financing of current and future receivables;
- ▶ Financing investments in the public and healthcare sector.

Through BFF Polska Group, the Banking Group operates in a leadership position in the Polish alternative financing market (AFM) for hospitals, in which intermediaries offer forms of financing competing with traditional banking services to healthcare facilities. Other specialized operators and, to a much less significant extent, some traditional banks, are also active in this segment.

BFF Bank holds no unconsolidated subsidiaries.

## Section 3

### Own funds (Art. 437 CRR)

#### Qualitative disclosure

Own funds represent the first line of defense against risks associated with the complexity of financial activities and constitute the main reference parameter for the assessment of the Group's capital adequacy.

The purpose of prudential supervision regulations is to ensure that all credit intermediaries have a minimum mandatory capitalization in relation to the risks assumed.

The Group constantly assesses its capital structure by developing and employing techniques for monitoring and managing regulated risks, also through a Control and Risks Committee created within the Board of Directors.

Own funds are the sum of Common Equity Tier 1 (CET1), Additional Tier 1 (AT1) and Tier 2 (T2) capital, net of items to be deducted and IAS/IFRS prudential filters.

The main components of the Group's own funds are computed in Common Equity Tier 1 (CET1), and are the following:

- ▶ Paid-in share capital;
- ▶ Reserves (legal reserve, extraordinary reserve, retained earnings reserve, stock option reserve and financial instruments reserve);
- ▶ Any undistributed portion of profit for the period;
- ▶ Revaluation reserves (IASs/IFRS 9 transition reserve, reserve for actuarial gains/losses relating to defined benefit plans, and revaluation reserve for HTC&S securities);
- ▶ Any non-controlling interests eligible for inclusion in the computation of CET1.

Intangible assets, including any goodwill, as well as certain categories of tax assets should be deducted from these items in accordance with the requirements of CRR II and the effects of calendar provisioning.

Tier 1 (AT1) capital includes Tier 1 instruments issued.

In 2022 Own funds were influenced primarily by:

- ▶ the issuance in the first quarter of 2022 by the Parent, with a view to optimizing funding and the Group's capital structure, of a subordinated Additional Tier 1 Perpetual NC 2027 instrument with a nominal amount of €150 million, and the exercise of the call option for the redemption of the subordinated Tier2 10YNC5 instrument issued in March 2017 with a nominal amount of €100 million;
- ▶ the inclusion of the share of profit for the period referring primarily to the accrual accounting of the lump-sum indemnity for debt collection ("40 euros") and the increase in the percentage estimated recovery of late payment interest from 45% to 50% as well as the days expected for the relative collection from 1800 to 2100 days.

## Quantitative disclosure

## Section 4

### Capital requirements (Art. 438 CRR)

#### Qualitative disclosure

The Group constantly assesses its capital structure by developing and employing techniques for monitoring and managing regulated risks, in order to ensure that its capital is consistent with its risk appetite and regulatory requirements. To do this, the Group also relies on a Control and Risks Committee created within the Board of Directors.

Compliance with capital adequacy limits for the CET1 Capital Ratio, Tier 1 Capital Ratio, and Total Capital Ratio is constantly monitored by the relevant corporate bodies.

The CET1 Capital Ratio is the ratio of Common Equity Tier 1 capital to Risk-Weighted Assets.

The Tier 1 Capital Ratio is the ratio of Tier 1 Capital to Risk-Weighted Assets.

The Total Capital Ratio is the ratio of Total Own Funds to Risk-Weighted Assets.

In accordance with the provisions of Bank of Italy Circular No. 262 of December 22, 2005 "*Banks' financial statements: layout and preparation*", the amount of risk-weighted assets was determined as the product of the total of prudential capital requirements and 12.5 (inverse of the minimum obligatory ratio equal to 8%).

The total exposure to risks at December 31, 2022, in relation to its business, is adequate according to the level of capitalization and the risk profile identified.

With regard to the Banking Group, the CET1 Capital Ratio is 16.9% and the Tier 1 Capital Ratio and the Total Capital Ratio are 22.3%.

#### Pillar I - Capital adequacy to meet the typical risks associated with financial operations

From the standpoint of operations, the absorption of risks is calculated using various methods:

- ▶ "Standardized approach" for credit risk;
- ▶ "Original exposure approach" for counterparty risk;
- ▶ "Basic approach" for operational risk;
- ▶ "Standardized approach" for market risk.

#### Credit risk

The assessment of credit risk is part of an overall analysis of the capital adequacy of the Banking Group and the CRR Group, in relation to the risks connected with lending.

With this in mind, the "standardized" approach is used to measure credit risk, as governed by Regulation (EU) No. 575/2013 (CRR) and adopted by the Bank of Italy Circular No. 285 "*Supervisory provisions for banks*" and Circular No. 286 "*Instructions for the preparation of supervisory reporting by banks and securities intermediaries*," both dated December 17, 2013, and subsequent amendments. This approach involves the classification of exposures into different classes ("portfolios"), depending on the type of counterparty, and the application of diversified weighted ratios to each portfolio.

In particular, in relation to the Regulation cited above, BFF Banking Group applies the following main weighting factors:

- ▶ 0% for exposures to government agencies and central banks with offices in a European Union member state and financed in the local currency, as well as for exposure to other public administration agencies in compliance with specific requirements of relevant supervisory provisions. This category also includes exposures to Spanish public sector entities and other local authorities as provided for by EBA lists “*EU regional governments and local authorities treated as exposures to central governments in accordance with Article 115(2) of Regulation (EU) 575/2013*” and “*EU public-sector entities treated in exceptional circumstances as exposures to the central government, regional government or local authority in whose jurisdiction they are established in accordance with Article 116(4) of Regulation (EU) 575/2013*”;
- ▶ 20% for (i) exposures to regional government agencies and local authorities with offices in a European Union member state denominated and financed in the local currency, (ii) exposures to public sector entities of countries with Credit Quality Step 1 (including France), (iii) exposures to public sector entities and supervised intermediaries with an original duration of three months or less;
- ▶ 50% for exposures to the public administration agencies of countries with Credit Quality Step 2, which include the exposures to entities of the Polish and Slovakian public sector;
- ▶ 100% for (i) exposures to the public administration agencies of countries with Credit Quality Step 3, 4 and 5 (including Italy, Portugal and Greece)-please note that on May 3, 2019 DBRS upgraded Greece from BH to BBL, thus improving the credit quality step from 5 to 4, but leaving the capital absorption percentage unchanged at 100%) and (ii) exposures to the public administration agencies of countries where government agencies are not rated and no credit quality steps are available (including Czech Republic and Croatia);
- ▶ 50% or 100% for receivables due from supervised intermediaries, according to the credit quality step of the country in which they have their offices;
- ▶ 75% for loans to retail and SME counterparties;
- ▶ 100% for exposures to private debtors (i.e., businesses), Funds, and asset management companies; for rated private debtors, different weights are applied on the basis of the credit ratings issued by S&P Global Ratings;
- ▶ 100% for tangible assets, equity investments, collective investment undertakings and other;
- ▶ 150% for non-performing exposures, if the specific value adjustments are less than 20% of the non-collateralized portion, before any adjustments;
- ▶ 100% for non-performing exposures, if the specific adjustments are 20% or more than the non-collateralized portion, before any adjustments;
- ▶ 250% to deferred tax assets not deducted from own funds.

With the aim of adopting an increasingly prudent approach to the classification and coverage of NPEs, in April 2019 the European Commission approved an update of EU Regulation 575/2013 (CRR) regarding the minimum coverage of non-performing loans. For the purposes of evaluating prudential provisions, the legislation in question provides that loans disbursed and classified as impaired after April 26, 2019 are subject to “calendar provisioning”. Exposures disbursed earlier and subsequently classified as NPEs will not be subject to the provisions contained in the amendment to Regulation no. 575 (CRR). This update requires banks to maintain an adequate provision level, deducting from their CET 1 any positive difference between prudential provisions (identified by weighting the gross value of guaranteed and unsecured NPEs by certain percentages) and amending funds and other assets (provisions, prudent valuation, other deductions of CET1).

Thanks to the credit management processes established by the BFF Group, as of December 31, 2022 the impact on CET 1 deriving from the application of calendar provisioning was limited to roughly €389 thousand.

Regarding the classification to NPE, note that on June 27, 2019 the Bank of Italy introduced certain amendments to Circular No. 272 concerning credit quality and the rules on the new definition of default, and most recently on September 23, 2022 it updated its note containing the guidelines of the Supervisory Body on the application of Delegated Regulation (EU) No. 171/2018 on the materiality threshold of overdue credit obligations pursuant to art. 178, para. 2, letter d) CRR (RD), and more generally on the application of the RD regulations. Therefore, at consolidated level and starting from the reporting date of September 30, 2022, the Bank aligned its interpretation criteria on the basis of the clarifications published by the Bank of Italy.

Finally, note that BFF is also conducting the most careful assessments with respect to the opportunity to undertake the path of adopting the method based on internal ratings (IRB) for credit risk. This is a method that, especially with respect to exposures to the Public Administration, would allow i) a more adequate representation of the BFF Group's low actual risk profile, since, beyond the definition of default – and probability of default (PD) – that can be adopted, the BFF Group's recovery processes would show Loss Given Default (i.e. LGD), which is known to be substantially nil, as well as ii) to adopt approaches that are more representative of the actual risk in the context of credit activities arising from the purchase of trade receivables, such as the adoption of the Facility Level Approach (FLA), which to date has only been permitted for banks and groups using internal models.

BFF Banking Group constantly maintains, as a capital requirement for credit risk, an amount of regulatory capital equal to at least 8% of the weighted exposures for credit risk. The Risk Weighted Amount is determined by the sum of the risk weighted assets of the various classes. Based on the method described above, the capital requirement for credit and counterparty risk at December 31, 2022 is €160.2 million for BFF Banking Group.

Counterparty risk represents a particular type of credit risk, characterized by the fact that the exposure, owing to the financial nature of the contract executed between the parties, is uncertain and can change over time in relation to the evolution of the underlying market factors.

For BFF Bank, counterparty risk can be generated by repurchase agreements having as a counterparty Cassa di Compensazione e Garanzia. Counterparty risk is measured using the original exposure method.

### **Operational risk**

Operational risk is the risk of incurring a loss due to inadequacy or failure of procedures, human resources and internal systems or as a result of external events. This category includes, amongst other items, losses caused by fraud, human error, business interruption, system failure, breach of contracts and natural disasters; operational risk includes legal risk but excludes strategic and reputational risks.

Operational risk, therefore, refers to various types of events that would not be significant unless analyzed together and quantified for the entire risk category.

The Group measures operational risk using the "Basic" approach: the capital requirement is determined by applying a 15% coefficient to the three-year average of the relevant indicator, calculated on the financial statement items of the last three years, in accordance with Regulation (EU) No. 575/2013.

### **Market risk**

Market risk relates to positions held for trading, that is, positions intentionally held for sale in the short term, acquired in order to take advantage of purchase and sale price differences, or other changes in prices or interest rates.

The regulation identifies and regulates the treatment of the various types of market risk in reference to the regulatory trading portfolio. The Group measures market risk using the "Standardized" approach.

### **Pillar II - The ICAAP/ILAAP Report**

The supervisory regulations require intermediaries to adopt control strategies and processes for determining the adequacy of current and future capital. It is the Supervisory Authority's responsibility to verify the reliability and accuracy of the results generated and, where necessary, to take appropriate corrective action.

BFF Banking Group annually submits the "ICAAP/ILAAP Report" to the Bank of Italy, thus providing an update on the internal processes for determining adequacy of capital and of liquidity risk governance and management systems of the Group. In accordance with prudential supervisory provisions, the Group has prepared the "ICAAP/ILAAP Report" approved by the BFF Board of Directors on April 29, 2022. The Report has been prepared in compliance with the requirements established in 2018 by Circular No. 285.

In relation to the "Supervisory Review and Evaluation Process" (SREP), the Group must comply with a CET1 Ratio of 9.00%, a Tier 1 Ratio of 10.50% and a Total Capital Ratio of 12.50%.

## Section 5

### Exposure to counterparty credit risk (Art. 439 CRR)

#### Qualitative disclosure

Counterparty risk represents a particular type of credit risk, characterized by the fact that the exposure, owing to the financial nature of the contract executed between the parties, is uncertain and can change over time in relation to the evolution of the underlying market factors.

If the transactions with a certain counterparty have a positive value, this requirement is generated. If part of the exposure is collateralized, it will be attributed a weighting factor corresponding to the weighting factor assigned to the instrument used as collateral.

For BFF Bank, counterparty risk can be generated by repurchase agreements (SFTs, Securities Financing Transactions) and transactions in derivatives. Counterparty risk is measured using the original exposure method (governed by Art. 282 CRR) based on the calculation of the “current replacement cost” and the “future exposure”, as regards transactions in derivatives and the “Financial Collateral Comprehensive Method” (governed by CRR Articles 223-228) as regards repurchase transactions.

At December 31, 2022, there are payable repurchase transactions in place with Cassa Compensazione e Garanzia as the counterparty, receivable repurchase transactions with market counterparties and foreign currency swaps.

With respect to transactions in derivatives (at December 31 exclusively foreign currency swaps), BFF Bank also calculates the CVA (Credit Value Adjustment), which quantifies the risk of a value adjustment in the credit component relating to transactions in OTC derivatives. The calculation is performed based on the “Standardized Approach”, governed by Art. 384 CRR.

## Section 6

### Capital buffers (Art. 440 CRR)

#### Qualitative disclosure

Information is provided below relating to the “Countercyclical capital buffer”, prepared on the basis of the applicable ratios at December 31, 2022 and Delegated Regulation (EU) 2015/1555 of May 28, 2015, supplementing the CRR with regard to regulatory technical standards for the disclosure of information in relation to the compliance of institutions with the requirement for a countercyclical capital buffer in accordance with Article 440 of the CRR. As established by Article 140(1) of Directive 2013/36/EU (“CRD IV”), the institution-specific countercyclical capital buffer rate consists of the weighted average of the countercyclical buffer rates that apply in the jurisdictions where the relevant credit exposures of the institution are located.

The CRD IV requires designated national authorities to activate an operational framework for the definition of the countercyclical capital buffer (CCyB) rate starting from January 1, 2016.

The rate is subject to quarterly review. The European regulation was implemented in Italy with Bank of Italy Circular No. 285, containing dedicated rules on the CCyB. On the basis of the analysis of the reference indicators, the Bank of Italy has decided to set the countercyclical rate (relating to exposures to Italian counterparties) at 0% again for the first quarter of 2022.

The relevant credit exposures include all classes of exposures other than those pursuant to Article 112(a) to (f) of Regulation (EU) No. 575/2013. The following portfolios are excluded: exposures to central governments or central banks; exposures to regional governments or local authorities; exposures to public sector entities; exposures to multilateral development banks; exposures to international organizations; exposures to institutions.

#### Quantitative disclosure

With reference to December 31, 2022:

- ▶ The countercyclical capital rates at individual country level have generally been established, with the methods succinctly described above, as 0%. The countries with a rate other than zero for which the Group has exposures include: the Czech Republic (1.50%), Slovakia (1.00%) and the United Kingdom (1.00%).
- ▶ At consolidated level, the specific countercyclical rate of the CRR Banking Group is 0.0000301%.

## Section 7

### Credit risk adjustments (Art. 442 CRR)

#### Qualitative disclosure

##### Exposures subject to generic adjustments (“collective impairment”)

On the basis of IFRS 9, financial assets not measured at fair value must be subjected to the impairment model based on expected losses. The calculation of expected losses required by IFRS 9 indeed takes place based on the product of PD, LGD and EAD, taking into account the significant increase in credit risk or objective signs of impairment of the exposures/counterparties.

In detail, the impairment model is characterized by:

- ▶ The allocation of the transactions in the portfolio to different buckets, based on an assessment of the increase in the level of exposure/counterparty risk;
- ▶ The use of multi-period risk parameters (e.g., lifetime PD, LGD and EAD) to quantify expected credit losses (ECL) for financial instruments subject to a significant increase in credit risk since initial recognition.

For the purposes of calculating impairment, IFRS 9 sets out general requirements for calculating ECLs and designing stage allocation criteria, without providing specific guidelines on the modeling approach. Therefore, by analyzing the data provided as input, the assessment and design of the project for the conversion to IFRS 9 allowed to develop a methodological framework to accommodate the peculiarities of the Group's business consistently with the assets it owns as well as available information, in accordance with the guidelines in the standard.

The key concepts introduced by IFRS 9 and required for the purpose of calculating impairment compared to previous accounting standards are as follows:

- ▶ A forward-looking model, allowing the immediate recognition of all expected credit losses over the life of the exposure, thus replacing the “incurred loss” criterion. According to the latter, impairment losses were recognized only when there was evidence that they existed (based on the identification of a trigger event). According to IFRS 9, losses shall be recognized based on supportable information that is available without undue cost or effort and includes historical, current and forward-looking data;
- ▶ ECL recalculated at each reporting date to reflect changes in credit risk since initial recognition of the financial instrument;
- ▶ Use of forward-looking information and macroeconomic factors to determine ECL;
- ▶ Introduction of an additional status with respect to the binary classification of performing and non-performing counterparties, to take account of the increase in credit risk.

The ECL calculation model requires a quantitative assessment of future cash flows and assumes that they can be reliably estimated. This requires the identification of certain elements, namely:

- ▶ Probability of default (PD) models and assumptions about the forward distribution of default events, for the calculation of multi-period PDs used to determine the lifetime expected credit loss;
- ▶ LGD model;
- ▶ A deterministic and stochastic EAD model allowing to define a multi-period distribution as well as a 12-month horizon.

The risk parameters that should be modeled to comply with the rationale of considering the full life-time of the financial instrument are as follows:

- ▶ Multi-period PD;
- ▶ Multi-period LGD;
- ▶ Multi-period EAD.

Furthermore, in compliance with IFRS 9, the ECL calculation shall include Point-in-Time (PIT) adjustments and Forward-Looking Information (FLI).

### Receivables subject to specific adjustments (“specific impairment”)

As required by IFRS 9 and in line with current supervisory provisions, the Group carried out a review of the assets classified as impaired in order to identify any objective impairment of individual positions.

It should be noted that, with reference to past due exposures, although classified as impaired financial assets and therefore subject to specific impairment, the same assessments that apply for the performing exposures were carried out. This decision is supported by the fact that, in consideration of the Group’s core business, impaired past due positions, identified according to objective criteria, do not necessarily represent actual deterioration. However, this approach does not provide an exemption to the competent functions from performing a precise/analytical assessment (“case-by-case assessment”) of positions classified as past due if the value adjustment calculated is not adequate.

As regards the impairment policies adopted, BFF Polska Group and BFF Finance Iberia submit specific periodic reports to the Parent, so that the corresponding functions of the parent can report on the activities conducted in this area and check the correctness of the conclusions.

On July 24, 2014, the EBA published the “Final Draft Implementing Technical Standards on Supervisory reporting on forbearance and nonperforming exposures” (EBA/ITS /2013/03/rev1 24/7/2014): this document introduces new definitions concerning non-performing exposures and forbearance measures.

These definitions were adopted with the 7th update of Bank of Italy Circular No. 272 of January 20, 2015, and call for the breakdown of impaired assets into:

- ▶ Non-performing loans
- ▶ Unlikely-to-pay positions
- ▶ Past-due impaired exposures

BFF Banking Group's net impaired assets amounted to a total of €283,762 thousand. They include:

- ▶ Non-performing loans are exposures to parties that are in a state of insolvency or in basically similar situations, regardless of any loss projections made by the parent.

At December 31, 2022, the overall total of the Banking Group's non-performing loans, net of impairment, amounted to €86,372 thousand, of which €5,672 thousand purchased already impaired. Net non-performing loans concerning Italian municipalities and provincial government in financial distress amounted to €79,662 thousand, accounting for 92.2% of the total.

Gross non-performing loans amounted to €104,663 thousand. The related impairment totaled €18,290 thousand. The portion of the allowance for late payment interest relating to non-performing exposures, recognized at the time of the change in estimate in 2014, was equal to €997 thousand, entirely impaired. Taking account of this amount, too, gross non-performing loans amounted to €105,660 thousand and relevant adjustments totaled €19,287 thousand.

With reference to the parent, at December 31, 2022 total non-performing loans, net of any estimated impairment losses, amounted to €80,271 thousand, of which €79,662 thousand concerned Italian municipalities and provincial governments in financial distress; this case is classified as non-performing in accordance with the indications given by the Supervisory Authority, despite the fact that BFF Banking Group has the legal right to receive 100% of the capital and late payment interest at the end of the insolvency procedure.

Specifically, the amount of €5,672 thousand refers to loans and receivables due from local entities (municipalities, provinces) already in financial distress at the time of purchase and purchased at special conditions.

The remaining positions referring to BFF Bank are impaired based on subjective assessments arising from legal opinions. Gross non-performing loans relating to BFF Polska Group amounted to €21,151 thousand. After estimated impairment losses of €15,811 thousand they amounted to €5,340 thousand.

- ▶ BFF Banking Group's unlikely to pay exposures mainly refer to BFF Polska Group's positions. These exposures reflect the judgment made by the intermediary about the unlikelihood that – excluding such actions as the enforcement of guarantees – the debtor will fully fulfill (for principal and/or interest) its credit obligations. This assessment should be arrived at independently of the existence of any past due and unpaid amounts (or installments).

At December 31, 2022, gross exposures classified as unlikely to pay amounted to €16,374 thousand, of which €14,439 thousand attributable to BFF Polska Group, €1,593 to the bank and €342 thousand to BFF Finance Iberia. The total net value is €12,132 thousand, referring primarily to BFF Polska Group.

- ▶ Net past due exposures of BFF Banking Group amounted to €185,257 thousand. They refer to the parent for €170,890 thousand, to the Spanish subsidiary for €13,556 thousand and to BFF Polska Group for €811 thousand. 97.4% of these exposures relate to public counterparties. The figure remained aligned with what was recorded at September 30, 2022, the date on which the trade receivables classified as past due increased as a result of the more stringent interpretations on the new "Definition of Default" (or "New DoD", Guidelines on the application of the definition of default pursuant to Art. 178 of Regulation (EU) no. 575/2013) issued by the Bank of Italy on September 23, 2022. However, there was no increase in the actual risk profile of the loan portfolio.

## Amendments due to COVID-19

### *Assessment of the significant increase in credit risk (SICR)*

In light of the BFF Group's business model and the nature of its risk counterparties, the COVID-19 epidemic did not entail changes to the model of the significant increase in credit risk (SICR). However, also in line with the EBA guidelines of December 2, 2020 "Guidelines amending Guidelines EBA/GL/2020/02 on legislative and non legislative moratoria on loan repayments applied in the light of the COVID 19 crisis", the Group has granted some of its counterparties based in Poland moratoria of a strictly voluntary character. The amendments related solely to deferral of principal amounts, without any amendments to interest rates. Moreover, no reduction in the Group's credit exposures was foreseen in terms of either principal or interest. The amendments were considered non-substantial and therefore did not result in the derecognition from the balance sheet of the positions subject to moratoria.

For more details on the amount granted and the type of counterparties involved, refer to the COVID tables in this section.

### *Measuring expected credit losses*

The model for determining risk parameters was also unchanged following the spread of COVID-19.

However, the annual update of the risk parameters (PD and LGD) allows taking into account the evolution of the effects of COVID-19 within the estimates of expected losses.

To this end, as at June 30, 2022 the Bank updated the macroeconomic scenarios provided by the external infoprovder. These scenarios are constructed considering the evolution of the unemployment rate and the High Yield Spread in a geopolitical context characterized by both the ongoing effects of Covid-19 and the tensions of the Russia-Ukraine conflict, which has significantly changed the macroeconomic scenario since February 2022.

The Risk Management Function, as it does every year, performed a sensitivity analysis at December 31, 2022 between the macroeconomic scenarios for the fourth quarter of the year, provided by the external infoprovder, and the macroeconomic scenarios updated at June 30, 2022. The analysis shows that 2023 will be characterized by a decline in GDP growth and a strong inflationary drive generated by the Russia/Ukraine conflict, which reduces on one hand business investments and on the other the disposable income of consumers. However, the job market does not seem to be experiencing significant tensions, thanks to the recovery in hirings post-Covid-19. The economic slowdown will not be sufficient to cause widespread dismissals and the job market will continue to benefit from considerable excess demand. Therefore, job market stability will be one of the main factors that could prevent the economy from entering a recessive cycle. The comparative analysis of the scenarios shows that estimated GDP in December 2022 is worse than that currently in use in the model and therefore, the Risk Management Function is evaluating the impacts of that change on the model for estimating risk parameters in order to understand its magnitude, while also taking into consideration that the Group's Business Model and - in this specific area - the relative cost of risk are less sensitive to GDP trends than credit exposures concentrated in the corporate/retail area.

Moreover, the Risk Management Function compared the macroeconomic estimates released by the external infoprovder with those of the European Central Bank (ECB), observing, also in this case, a deterioration of GDP in 2023.

The same analyses will be performed at the end of the first quarter of 2023 as well in order to evaluate the possibility of updating the risk parameters early.

## Section 8

### Unencumbered assets (Art. 443 CRR)

#### Qualitative disclosure

Bank of Italy Circular No. 285 requires banks to publish information on encumbered and unencumbered assets, with the methods laid out in the European Banking Authority (EBA) guidelines.

Specifically, the required information is meant to evaluate recourse by institutions to forms of secured funding (for example, covered bank bonds, repurchase agreements, central bank credit lines).

Institutions publish information on encumbered and unencumbered assets at consolidated level by product, also taking into account the specific instructions in Annex XVII of European Union Commission Implementing Regulation 2015/79.

Prudential regulations define Asset Encumbrance as assets pledged to secure financial transactions (securitizations, secured funding, repos, etc.) or, otherwise, assets reserved to provide forms of hedging, guarantee or credit enhancement to financial transactions from which such assets cannot be freely withdrawn.

The Bank, as Parent Company, has adopted a specific Group encumbered assets management policy defining the areas of operation of the Bank and its Subsidiaries in the asset encumbrance process, describing the process for the identification, management and monitoring of encumbered assets and the correlated risks and defining the roles and responsibilities of the bodies and functions involved.

The degree of asset encumbrance is monitored in order to observe the risk exposure trend linked to the share of encumbered assets, which derives from the unavailability of assets that may be readily liquidated through sale, sale with repurchase agreement, collateral assignment or securitization, resulting in:

- ▶ A reduction in the share of assets available to creditors and depositors not guaranteed;
- ▶ An increase in funding and liquidity risk, as the share of encumbered assets reduces the possibility of obtaining new secured funding.

Specifically, the degree of asset encumbrance is monitored through the Asset Encumbrance ratio (or the "AE ratio"), calculated in line with regulatory requirements<sup>6</sup> as the ratio between the total carrying amount of encumbered assets and the reused guarantees received, and the total assets in the financial statements and collateral received. A specific operating limit is attributed to this ratio within the RAF, which is monitored on an ongoing basis.

The types of transaction that entailed asset encumbrance were:

- ▶ Government securities are pledged to secure transactions linked to various services (e.g., cashier's checks) and Repurchase Agreement transactions; with respect to the latter, several transactions were carried out using the securities deriving from receivable repurchase agreements as collateral.
- ▶ Amounts "Due from customers" are pledged to secure financing transactions with other financial intermediaries, particularly for the business of BFF Polska.

6) Implementing Regulation (EU) No. 2021/451 of December 17, 2020 - Annex XVII.

## Section 9

### Use of ECAIs (Art. 444 CRR)

#### Qualitative disclosure

The assessment of credit risk is part of an overall analysis of the adequacy of the Group's capital in relation to the risks connected with lending.

With this in mind, the Group uses the "standardized" approach to measure credit risk, as governed by Regulation (EU) No. 575/2013 (CRR) and adopted by the Bank of Italy Circular No. 285 "Supervisory provisions for banks" and Circular No. 286 "Instructions for the preparation of supervisory reporting by banks and securities intermediaries," both dated December 17, 2013, and subsequent amendments. This approach involves the classification of exposures into different classes ("portfolios"), depending on the type of counterparty, and the application of diversified weighted ratios to each portfolio.

In particular, for the "Governments and central banks" portfolio, weighting depends on the rating attributed by the ECAIs or the ECAs of the individual countries; for the "Supervised intermediaries" portfolio, weighting is based on the rating of the country where the supervised intermediary is located; for the "Public sector entities" portfolio, the weighting rules are the same as those established for supervised intermediaries.

BFF Bank has adopted Dominion Bond Rating Service (DBRS) as its reference ECAI for public counterparties. The unsolicited rating attributed to the Republic of Italy by DBRS was "BBB high".

Exposures to the Italian Public Administration, including receivables due from the National Healthcare Service and Local Healthcare Entities, fall within the Credit Quality Step 3 with a weighting of 100%.

A reconciliation between the credit rating classes and the ratings supplied by DBRS is provided below.

Credit quality class	ECAI <i>DBRS Ratings Limited</i>
1	from AAA to AAL
2	from AH to AL
3	from BBBH to BBBL
4	from BBH to BBL
5	from BH to BL
6	CCC

The Banking Group's exposures are represented primarily by exposures with counterparties belonging to the Public Administration or with healthcare companies of the countries in which the Group operates.

For easy reference, the rating classes relating to the countries in which the Banking Group companies operate at December 31, 2022 are provided below.

Class 1: France

Class 2: Spain, Poland and Slovakia

Class 3: Italy and Portugal

Class 4: Greece

With respect to the corporate portfolio, the Bank relies on the credit ratings issued by S&P Global Ratings. A reconciliation between the credit rating classes and the ratings supplied by DBRS is provided below.

Credit quality class	ECAI S&P Global Ratings
1	≥ AA-
2	between A+ and A-
3	between BBB+ and BBB-
4	between BB+ and BB-
5	between B+ and B-
6	≤ CCC+

## Section 10

### Exposure to market risk (Art. 445 CRR)

#### MARKET RISKS

##### Qualitative disclosure

Market risk is the risk relating to positions held for trading, that is, positions intentionally held for sale in the short term, acquired in order to take advantage of purchase and sale price differences, or other changes in prices or interest rates.

The regulation identifies and regulates the treatment of the various types of market risk in reference to the regulatory trading portfolio. The Group measures market risk using the "Standardized" approach.

##### Quantitative disclosure

At December 31, 2022, there were no positions generating requirements relating to market risks.

#### EXCHANGE RISK

##### Qualitative disclosure

Exchange rate risk is represented by the Banking Group's exposure to fluctuations in currency exchange rates, considering positions in foreign currency as well as those with indexation clauses linked to the exchange rate trends of a given currency.

The Group thus manages and monitors the risk of fluctuations in such exchange rates. The Group has a specific internal regulation for the management of exchange risk referring to exposures arising from the management of assets, funding transactions, the purchase or sale of financial instruments in foreign currency, and any other type of transaction in a currency other than the reference currency.

Specifically, the Group mitigates foreign exchange risk primarily by using derivative instruments, forex swaps. When possible, and in particular for less significant currencies for which transactions are limited, the Group operates through natural hedging.

Exposure to exchange rate risk – determined on the basis of the net foreign exchange position using a method based on the supervisory regulations, and permitted exclusively within very restricted total maximum exposure and VaR limits – is monitored in real time by the Finance and Administration Department and managed in compliance with the limits established by specific internal rules.

Currency risk is mitigated by making recourse to linear derivative instruments lacking optional components, such as currency swaps, which allow the Group to perform optimized management of its funding and loans provided in currencies other than the euro in which the Group operates, also through its Subsidiaries, financed by intra-group finance solutions in currencies such as Zloty and Czech koruna.

## Quantitative disclosure

The portfolio of Group assets is also expressed in currencies other than the euro; as a result a methodology for the measurement and management of this risk has been adopted. Exchange risk is monitored by the Risk Management Function, in line with the requirements of European regulations (EU Regulation No. 575/2013 - CRR).

## Section 11

### Operational risk (Art. 446 CRR)

#### Qualitative disclosure

Operational risk is the risk of incurring a loss due to inadequacy or failure of procedures, human resources and internal systems or as a result of external events. This category includes, amongst other items, losses caused by fraud, human error, business interruption, system failure, breach of contracts and natural disasters; operational risk includes legal risk but excludes strategic and reputational risks.

Operational risk, therefore, refers to various types of events that would not be significant unless analyzed together and quantified for the entire risk category.

In BFF Banking Group, exposure to this category of risk is generated predominantly by failure in work processes, in organization, governance - human errors, computer software malfunctions, inadequate organization and control measures - as well as by any loss of human resources in key corporate management positions. Exposure to operational risks deriving from external sources appears to be of negligible importance, partly due to the mitigation tools adopted to address such adverse events (such as, by way of example: the business continuity plan, data storage processes, back up tools, insurance policies, etc.).

The process adopted by the Group to manage and control operational risks is founded on the principle of promoting a corporate culture for managing risk and defining the appropriate standards and incentives with the aim of fostering the adoption of professional and responsible behavior at all operational levels, as well as designing, implementing and managing an integrated system for operational risk management that is adequate in relation to the nature, activities, size and risk profile.

The operational risk assessment model adopted is of the "mixed" type, meaning a model based both on qualitative assessments - linked to process mapping, at-risk activities and the corresponding controls adopted - and on quantitative assessment, using the methodologies established by banking regulations and sector best practices.

With reference to the quantitative assessment/measurement of operational risk, BFF Banking Group adopts a risk management framework founded on two main processes: the Risk Self Assessment ("RSA") and Loss Data Collection ("LDC").

With respect to the RSA process, with reference to the Group scope, the Group performs an annual overall assessment of the level of exposure to Operational Risks using the RSA process. The Risk Self Assessment (RSA) is an annual self-assessment of the prospective exposure to the operational risk inherent in business processes, aimed at enhancing the perception of risk by the key figures (Business Experts) who govern the execution of these processes, taking into account the expected evolution of the business and the organizational and control measures already in place.

The Risk Self Assessment approach is particularly relevant with reference to the numerical assessment of the components of frequency and impact of forward-looking risk. In particular, these components are:

- ▶ Expected frequency of occurrence of events potentially generating operational losses;
- ▶ “Typical” impact of the loss, representing an estimate of the potential losses deriving from the occurrence of the individual risk event in normal operating conditions;
- ▶ “Worst-case” impact, representing the economic impact resulting from the occurrence of the individual loss event, assuming a scenario of extreme but plausible severity in light of operating context factors and the effectiveness of the internal control system.

Operational risks are identified on the basis of company processes, considering the classification of the loss events (“Event Type” or “ET”) defined by supervisory provisions. In particular, to identify operational risks, reference is made to the specific taxonomies adopted by the Group relating to:

- ▶ The types of risk events that may generate operational losses;
- ▶ The organizational processes exposed to operational risk events;
- ▶ Risk factors inside or outside the Group, at the origin of the occurrence of the harmful event, direct or indirect;
- ▶ The business lines defined by the Supervisory Authority in which the operational loss event may take place.

Both the catalog of operational risk events and that of organizational processes were defined at Group level in compliance with supervisory provisions.

Following the identification of the main risks within company processes, the process owner analyses and evaluates them through a quantitative estimate of the frequency and relative economic loss (typical and worst-case), taking a potential approach.

The formulation of estimates for each scenario evaluated by the assessors is supported by numerical scales provided by the Risk Management Function and built on the basis of benchmark data. In particular, the following have been provided:

- ▶ A scale supporting the estimate of expected frequency values, expressed in “number of annual events”;
- ▶ “Custom” economic scales based on second-level Event Types supporting typical and worst-case potential loss estimates.

The estimates take into account internal context factors, particularly the potential causes triggering the risk (“Risk Factors”), the reference company processes and the internal control system and the relative developments already planned. In this sense, the process leads to an estimate of “residual risk”.

The operational risk results obtained from the forward-looking assessment process have also been used for quantifying internal capital against operational risk by developing a scenario-based Loss Distribution Approach (“LDA”). This approach, inspired by sector best practices, taking into consideration the expected frequency and typical and worst-case impact estimates, models the statistical characteristics of the frequency and scenario components.

Loss Data Collection represents the activity of collecting operational losses or the amount of the economic effect generated by an operating event, caused by one or more risk factors. The information collected is part of a relationship between different entities, or risk event, risk factor and economic effect. Each operating loss is therefore classified based on event type, underlying risk factor(s) and the resulting economic effect.

Furthermore, within the framework of the measures adopted regarding the exposure to operational risk, the Group also monitors the following specific risks, considered to be operational risks or pillar II risks.

- ▶ The risk of money laundering and terrorist financing, or the current or forward-looking risk of losses deriving from the repercussions, including reputational, of money laundering and terrorist financing activities. For the Group, this means primarily the risk that the Bank's financial and commercial counterparties, suppliers, partners, associates and consultants may be parties to transactions that might potentially facilitate the laundering of money coming from illegal or criminal activities.
- ▶ Compliance risk, concerning the risk of legal and administrative penalties, significant financial losses or reputational damage due to failure to comply not only with laws and regulations but also with internal and conduct standards applicable to corporate activities. For this type of risk, a periodic update of the relevant assessment methodology is performed. Such methodology is developed for all activities falling within the parent's regulatory framework, in accordance with a risk-based approach. More specifically, as for the relevant provisions that do not envisage the establishment of specialized control measures (i.e., privacy and occupational health and safety), the Compliance Function provides consulting support to the Bank's functions (ex ante) and assesses the adequacy of the organizational measures and control activities adopted (ex post). As for laws and regulations monitored by specialized functions, the Compliance Function carries out an indirect control by cooperating with the specialized functions in defining compliance risk assessment methods in addition to mapping risks and the corresponding control measures (Compliance Risk Control Matrix).
- ▶ Conduct risk, or the current or forward-looking risk of losses due to the inappropriate offer of financial services and the ensuing procedural costs, including cases of intentionally inappropriate or negligent conduct (e.g. internal fraud).  
Within the operational risk management framework, the Group monitors and oversees conduct risk, evaluating it as part of the RSA process.  
The Group's processes and internal regulations are drafted to discourage, *inter alia*, improper business practices, avoid market abuse and insider trading or internal offenses by employees.  
The design of new products or entry into new markets is overseen within the RAF by a dedicated process involving the company control functions.

In addition, in order to control the above mentioned risks, the Group adopts specific Organization Models for the management of the risks regarding money laundering, occupational health and safety and information and payment service security.

For computing capital requirements for operational risk, the Banking Group uses the Basic Indicator Approach (BIA), according to which capital requirements are computed by applying a regulatory coefficient to an indicator of the volume of business activity (Relevant Indicator).

## Quantitative disclosure

### Template EU OR1: Operational risk own funds requirements and risk-weighted exposure amounts

Banking activities	a	b	c	d	e
	Relevant indicator		Last year	Own funds requirements	Risk weighted exposure amount
	T-3	T-2			
1 Banking activities subject to basic indicator approach (BIA)	338,983	310,471	529,214	58,933	736,668
2 Banking activities subject to standardized (TSA) / alternative standardized (ASA) approaches					
3 <i>Subject to TSA</i>					
4 <i>Subject to ASA</i>					
5 Banking activities subject to advanced measurement approaches AMA					

Based on the method described above, the capital requirement for operational risk at December 31, 2022 is €58,933 thousand for the Group.

## Section 12

### Exposures in equities not included in the trading book (Art. 447 CRR)

#### Qualitative information

At December 31, 2021, BFF Bank holds equity exposures in the following portfolios:

#### Financial assets subject to obligatory measurement at fair value through other comprehensive income

Financial assets with obligatory fair value measurement are represented by the financial assets that do not meet the requirements for measurement at amortized cost or fair value through other comprehensive income. These are financial assets whose contractual terms do not exclusively provide for capital repayments and interest payments on the amount of capital to be repaid, or which are not held in connection with a “Hold-to-Collect” business model, or whose objective is a “Held-to-Collect-and-Sell” business model.

Financial assets subject to obligatory measurement at fair value through profit or loss are initially recorded at fair value, normally represented by the price of the transaction, without considering the costs or income of the transaction directly attributable to the instrument itself.

Subsequent to initial recognition, they are always measured at fair value. The effects of applying this measurement criterion are charged to the income statement.

Lastly, they are derecognized if and only if disposal entails the substantial transfer of all the related risks and benefits.

This portfolio includes €90.2 million in closed UCI units reserved to professional investors. The value of these shares has been updated to the latest available NAV made available to these funds.

#### Financial assets measured at fair value through other comprehensive income

According to IFRS 9, a financial asset is included in the category if both of the following conditions are met:

- a) The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets (HTC&S business model); and
- b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (meeting the SPPI test).

In particular, this item includes:

- ▶ debt instruments that are included in a Hold to Collect and Sell Business Model and that pass the contractual characteristics test (SPPI test);
- ▶ equity instruments, which cannot be qualified as controlling, associated or connected and which are not held for trading, for which the option for designation at fair value through other comprehensive income has been exercised.

In addition, equity instruments for which the Bank has decided to use the FVOCI (Fair Value through Other Comprehensive Income) option are also measured at fair value through OCI. The FVOCI option provides for the recognition in OCI of all income components relating to these instruments, without any impact (even in the event of disposals) on profit or loss.

The initial recognition of these financial assets takes place on the date of settlement for debt and equity instruments.

On initial recognition, the assets are measured at fair value, including transaction costs or income directly attributable to the instrument.

With regard to debt securities, these assets are subsequently measured at fair value, with the interest recognized at amortized cost in the income statement under item 10 "Interest and similar income". Gains and losses arising from changes in fair value are recognized in equity under item 120 "Revaluation reserves" except for impairment, which is recognized under item 130 "Net adjustments to/reversals of impairment of: b) financial assets measured at fair value through OCI".

Gains and losses are recognized in Revaluation reserves until the financial asset is disposed of, when the accumulated gains or losses are recognized in the income statement under item 100 "Gains (losses) on disposal or repurchase of: b) financial assets measured at fair value through OCI".

Fair value changes recognized under item 120 "Revaluation reserves" are also reported in the consolidated statement of comprehensive income.

Equity instruments (shares) not traded in an active market, whose fair value cannot be determined reliably due to the lack or unreliability of the information needed for fair value measurement, are measured at their last reliably measured fair value.

Equity instruments that were classified in this category are valued at fair value and the amounts recognized as a contra-entry of net equity (Statement of comprehensive income) must not then be transferred to the income statement, not even in the case of disposal. The only component referring to the equity instruments in question subject to recognition in the income statement is the relative dividends.

For the purposes of IFRS 9, the impairment of financial assets included in these categories is recognized in three different stages based on the relevant credit risk level.

If the fair value of a debt instrument increases and such increase can be objectively attributable to an event relating to the improvement in the debtor's creditworthiness, occurring in a period subsequent to the recognition of impairment in the income statement, the impairment is reversed and the amount of the reversal is recognized in the same income statement item. This does not apply to equity securities, which are not tested for impairment.

After the reinstatement, the carrying amount cannot in any case exceed measurement at amortized cost had the impairment loss not been recognized.

Adjustments/reversals of impairment are recognized according to the staging allocation criteria and the following risk parameters: probability of default (PD), loss given default (LGD), and exposure at default (EAD)—defined in accordance with the subsequent paragraph “Measurement of impairment losses on financial assets”.

Financial Assets measured at fair value through profit or loss are derecognized when the contractual rights expire and when, following disposal, substantially all of the risks and rewards relating to the financial asset sold are transferred. On the other hand, if a significant portion of the risks and rewards relating to the disposed financial assets has been retained, they continue to be recognized in the financial statements, even if legally their ownership has been effectively transferred.

Financial assets measured at fair value through other comprehensive income include:

- ▶ the stake in the Bank of Italy of €125 million acquired as it has all of the characteristics of solidity and profitability consistent with the bank’s long-term investment strategy;
- ▶ the shares relating to the Visa Class C security equal to €1,378 thousand, not listed, whose fair value is determined by the comparison with Visa Series A listed shares (according to the conversion plan defined in 2016 on the occasion of the integration with Visa Europe);
- ▶ other minor investments worth approximately €1,719 thousand.

Compared to last year, the item increased significantly, by €45 million, as a result of the acquisition of an additional investment in the Bank of Italy, bringing the parent’s equity investment from 1.07% to 1.67%.

With respect to minor investments in equity securities, please note that BFF Bank has sold a portion of “Visa” shares (for €1,183 thousand) and “Ausilia S.r.l.” shares (for €306 thousand) and, in the course of the final quarter of 2022, purchased a shareholding in the company “Istituto della Enciclopedia Italiana fondata da Giovanni Treccani S.p.A.” amounting to €1 million (1.17%).

## Equity investments

Investments in joint ventures and associates are recorded in the financial statements at cost, equal to the fair value of the consideration paid, adjusted for impairment.

This item includes interests in joint ventures and associates. Companies are considered joint ventures if control is shared between the Group and one or more other parties on a contractual basis or when the unanimous consent of all the parties who share control is necessary for decisions concerning significant activities. Companies in which the Bank holds 20% or more of the voting rights and companies for which the administrative, financial and management choices are considered to be subject to significant influence are considered to be associates due to the legal and factual links.

In establishing the existence of control over joint ventures and significant influence over associates, there are no situations to report where it was necessary to carry out particular assessments or make significant assumptions.

The Group uses the equity method to measure these investments, adjusting the initial value to reflect changes in the Group's significant net assets since the purchase date. At each balance sheet date or for interim financial statements, for equity investments the existence of objective evidence that the carrying amount of the assets may not be fully recoverable is verified. The impairment testing process requires checking for impairment indicators and determining the impairment loss, where applicable.

The presence of impairment indicators implies the recognition of a write-down to the extent that the recoverable value is less than the carrying amount. The recoverable value is the greater of the fair value net of costs to sell and the value in use.

Equity investments are derecognized when the contractual rights to the cash flows deriving from the assets expire, or when the investment is sold with a substantial transfer of all the related risks and benefits.

The equity investments include two law firms in which BFF Polska is a limited partner, as well as the equity investment in Unione Fiduciaria of 26.46% of its capital, deriving from the financial statements of the former DEPObank. Note that the aforementioned investments are consolidated using the equity method (and not in full).

## Quantitative information

## Section 13

### Exposure to interest rate risk on positions not included in the trading book (Art. 448 CRR)

#### Qualitative disclosure

##### General aspects, management procedures and measurement methods for interest rate and price risk

Banking portfolio interest rate risk is the risk of a decrease in the value of the portfolio due to potential changes in interest rates. The main source of this type of interest rate risk is repricing risk, i.e. the risk deriving from time mismatches between the maturity and repricing of assets and liabilities, the main aspects of which are:

- ▶ yield curve risk, the risk deriving from the exposure of the Group's positions to changes in the slopes and shape of the yield curve;
- ▶ basis risk, risk deriving from the imperfect correlation in changes in the rates payable and receivable on different instruments that may also have similar repricing characteristics.

Exposure to interest rate risk is expressed from two different perspectives: volatility of economic value and volatility of profits (and, in particular, net interest income).

Measurement from both of the above-mentioned perspectives is appropriate to comprehensively manage interest rate risk. Specifically:

- ▶ measurement in terms of economic value makes it possible to quantify the long-term effects of changes in interest rates. Indeed, this measurement fully expresses the effects of the above-mentioned change on items sensitive to shifts in interest rates and, therefore, provides indications functional to the strategic decisions and levels of capitalization deemed adequate over a long-term time horizon;
- ▶ measurement in terms of profits makes it possible to quantify the short-term effects on the bank's net interest income deriving from changes in interest rates and, as a result, on capital adequacy.

The Group performs the following measurements:

- a) *shift sensitivity* by classifying items sensitive to the changes in interest rates in time bands, on the basis of repricing dates for items at an index-linked rate and the maturity date for fixed-rate items. In order to quantify the exposure to interest rate risk, assets and liabilities are multiplied by weighting factors, obtained as the product of a hypothetical variation in rates and an approximation of the modified duration for each single period. This measurement is performed at least quarterly. Through shift sensitivity, an estimate is determined of the change in the present value of capital in simplified form, by adopting the methodology established by the supervisory regulations. In this regard, it is specified that this measurement is referred to for the monitoring of internal capital to be held to cover interest rate risk;
- b) The change in the interest rate over a time span equal to the subsequent 12 months and 3 years, respectively, following an assumed change in the interest rate curve (the shocks applied are the same as those used for the change in economic value). This measurement is performed at least quarterly, adopting the simplified methodology established by the provisions, with the exception of the treatment of on demand items, which are measured with a more complex methodology that takes into account the actual repricing of the individual items.

Exposure to interest rate risk expressed in terms of economic value sensitivity is measured with respect to the banking portfolio assets and liabilities (this therefore excludes positions in the trading portfolio - Other).

This method is applied based on the annual changes in interest rates on a daily basis, recorded during an observation period of six years, considering alternatively the 1st percentile (decrease) or the 99th percentile (increase), as laid out in Bank of Italy Circular 285/2013 as updated. Internal capital is determined by the worst-case result obtained between the two 1st/99th percentile scenarios.

The Group also measures the exposure to interest rate risk using additional interest rate shock scenarios. Specifically:

- ▶ the parallel  $\pm$  200 bps scenarios, with respect to which Bank of Italy Circ. 285 establishes a warning threshold equal to 20% of Own Funds, a percentage defined as the Interest Rate "Risk index";
- ▶ the six interest rate shock scenarios required by the EBA Guidelines, with respect to which Bank of Italy Circ. 285 establishes an "early warning" level equal to 15% of Tier 1 Capital. To respect this limit, the scenario with the worst-case result is considered. Interest rate risk exposure expressed in terms of net interest income sensitivity quantifies the impact of an interest rate shock on current profits with reference to a time horizon of twelve months and three years and is calculated using the same stress scenarios applied to the change in economic value.

In line with the provisions of Circular No. 285/2013, the Group therefore evaluates the potential impact of changes in interest rates according to the income dimension. In keeping with the main market practice, a Repricing Gap approach is used to quantify the impact on the net interest income.

In compliance with the "ongoing balance" principle, to measure the change in net interest income, maturing items are instead replaced with the same amounts, without envisaging any growth or negative growth in the asset and liability component. Furthermore, in the IRRBB measurement, non-interest bearing assets and liabilities included in the banking book are not included (including capital and reserves).

To measure interest rate risk, the Bank has developed an ad hoc methodology with respect to funding on demand deriving from Transaction Services activities, while as regards retail funding relating to free balances in deposit accounts, as it is not pegged to a specific parameter, the regulatory model is applied (therefore, 25% on demand and the remainder equally divided over up to five years).

With respect to receivable on demand items, what is set forth in regulations is instead applied (therefore, they are all classified in the "on demand" segment).

The behavioral models used take into account the identification of the core share of funding, or the amount that could represent a stable source of funding despite the short contractual duration, even in the presence of significant changes in the interest rate context.

The average repricing maturity of the on demand funding portfolio is 1.08 years, while the longest maturity is 5 years.

As concerns factoring activities, the Bank uses a collection forecast curve and incorporates the component of default interest sensitive to any changes in the interest rate.

## Fair value hedging activities

At December 31, 2022, BFF Banking Group has no forex swap contracts in place, as the Group mitigates interest rate risk through natural hedges.

## Cash flow hedging activity

At December 31, 2022, BFF Banking Group had no derivative contract intended to offset the potential losses associated with certain types of risks.

## Quantitative information

The table below shows the interest rate risk exposure of the BFF Group, considering the shocks defined by the EBA, at June 30 and December 31, 2022.

### Template EU IRRBB1 - Interest rate risks of non-trading book activities

Supervisory shock scenarios	a		b		c		d	
	Changes of the economic value of equity				Changes of the net interest income			
	12/31/2022		06/30/2022		12/31/2022		06/30/2022	
1 Parallel up	59,350	57,610	-36,598	-25,403				
2 Parallel down	-	-	20,739	-28,560				
3 Steepener	-	1,091						
4 Flattener	17,453	14,885						
5 Short rates up	33,966	31,023						
6 Short rates down	-	1,556						

At December 31, 2022 the greatest impact in relation to Tier 1 is obtained by applying the parallel up shock, with a value that reaches 9.70%, remaining basically stable with respect to the previous half-year period.

## Section 14

### Exposure to securitization positions (Art. 449 CRR)

In the course of 2022, BFF Banking Group had no exposures to securitizations.

## Section 15

### Remuneration policy (Art. 450 CRR)

#### Qualitative disclosure

##### Definition of the Remuneration policy

The remuneration and incentive policies of the BFF Banking Group in force in 2022 were approved by the Shareholders' Meeting on March 31, 2022.

The remuneration were defined with the ultimate goal of developing remuneration systems, in the interests of stakeholders, aligned with long-term business values, strategies and objectives, linked to the proper company results to take into account the risks assumed by the Group and, in particular, with the levels of capital and liquidity required for the activities undertaken, so as to avoid skewed incentives that could result in regulatory breaches or excessive risk assumption for the Group.

In defining its remuneration and incentive policies, the Bank relied on the support of the *Gattai, Minoli, Partners* Law Firm.

In this document, the definitions set forth in the remuneration and incentive policies approved by the Shareholders' Meeting on March 31, 2022 and available on the Bank's website shall apply.

The Group has developed a governance process concerning the definition, implementation and management of pay policies. This process calls for the involvement, at different levels and based on the applicable areas, of multiple control bodies and Company functions: every year, the Report on Remuneration Policy and Compensation Paid is approved by the Shareholders' Meeting, after being approved by the Board of Directors and consulting with the Remuneration Committee.

The details are set forth in Par. 1 of the Policy ("Governance of the remuneration and incentive system"), and there is also a specific reference in part II of the Report.

The shareholders' resolution approving the remuneration policies was adopted:

- a) in compliance with the qualified majorities provided for by the Remuneration Supervisory Provisions<sup>7</sup>;
  - b) following prior notification to the Supervisory Authority provided for by the regulations referred to in the Remuneration Supervisory Provisions<sup>8</sup>.
- i) the Board of Directors:
- i. prepares the Policy, submits it to the Shareholders' Meeting, reviews it at least once a year and is responsible for its implementation, ensuring that it is adequately documented and accessible to Personnel;
  - ii. approves, in line with the Policy, the remuneration and incentive systems for the BoD's Personnel. Furthermore, at the proposal of the Remuneration Committee, it approves the entire remuneration package of the CEO, including any allocation of stock options to said officer or other long-term incentive instruments;

7) The Remuneration Supervisory Provisions provide that Shareholders' Meeting approval requires the favorable vote of at least two thirds of the share capital represented at the meeting, when it is constituted with at least half of the share capital, or, when this does not happen, the favorable vote of at least three quarters of the share capital represented, whatever that may be.

8) The procedure provides for the transmission to the Bank of Italy or the European Central Bank, at least 60 days before the date on which the shareholders' vote is scheduled, of the proposal to be submitted to the Shareholders' Meeting, with the relative indications and evidence to demonstrate that the higher limit or limits, for the most important personnel or for some categories of them, do not affect compliance with prudential regulations, especially those concerning own-funds requirements.

- iii. is entrusted with the administration of stock option plans;
- iv. ensures that the remuneration and incentive systems are consistent with the Bank's overall choices in terms of risk-taking, strategies, long-term objectives, corporate governance structure and internal controls;

ii) the Remuneration Committee:

The Remuneration Committee provides instructions and advice and makes recommendations to the Board of Directors on matters concerning Personnel remuneration and incentives, as well as the monitoring of areas within its remit. It comprises three non-executive members of the Board of Directors, at least two of whom are independent.

For a detailed description of the functions assigned, please refer to paragraph 1.4 of the Remuneration Policy. For a detailed description of the functions carried out in the course of 2022 and the relative breakdown, please refer to paragraph 2.8 of the Report on compensation paid for 2022.

The Committee met 23 times in 2022.

iii) the Control and Risks Committee:

One of the functions of the Control and Risks Committee is to ensure that the incentives underlying the Group's remuneration system are consistent with the maximum levels of risk that the Group intends to assume.

In performing this function, it collaborates with the other committees within the Board of Directors, in particular with the Remuneration Committee. The Control and Risks Committee, in coordination with the Remuneration Committee, examines whether the incentives provided by the remuneration system are consistent with the RAF, also with the support of the Risk Management Function.

### Identification of the “most significant personnel”

The Policy is based on a system of classification of company roles consistent with the definition of Key Personnel established by the Group.

In particular, the Group identifies the Identified Staff through an at least annual assessment process - entrusted to the Board of Directors, with the support of the Human Resources and Organizational Development Function and the Rules and Processes O.U., and the Risk Management Function – carried out on the basis of the criteria provided for by the Supervisory Provisions. Therefore, taking into account the levels of autonomy between the different roles and their impact on the business, the Board of Directors identifies the Key Personnel by way of a specific resolution after evaluation by the Human Resources and Organizational Development Function with the support of the Risk Management and Compliance and AML Functions, having consulted with the Remuneration Committee.

In addition, whenever the Bank or one of the Subsidiaries establishes a new employment relationship and/or partnership, the Human Resources and Organizational Development Function carries out an assessment to check whether the person or entity in question belongs to the Risk Taker category.

### Remuneration components

Through adequate remuneration and incentive mechanisms, the BFF Group intends to favor business competitiveness, in compliance with the principle of sound and prudent management, and strengthen corporate governance, guaranteeing that decisions are taken in an independent, informed and prompt manner, at the appropriate level, so as to avoid conflicts of interest and guarantee proper reporting according to the provisions of the competent authorities.

The remuneration policies are differentiated by type of recipient, in order to take into account the specific characteristics of each party and specific regulatory provisions.

All Directors:

- i. receive the compensation set by the Shareholders' Meeting as well as a reimbursement of costs incurred during the performance of their duties;
- ii. who are Committee chairs or members may receive additional compensation determined by the Board of Directors pursuant to Article 2389, paragraph 3 of the Italian Civil Code;
- iii. have a civil liability insurance policy, the cost of which is paid by the Bank.

Except in the case of the Chief Executive Officer (and any executive directors), Directors are never entitled to Variable Remuneration.

The Chairman of the Board of Directors receives a Fixed Remuneration established by the Board of Directors in accordance with Article 2389, paragraph 3 of the Italian Civil Code determined ex ante and consistent with the role assigned, the size and organizational complexity of the Bank and market practices and benchmarks.

The pay mix relating to the Chief Executive Officer therefore consists of the following:

- ▶ a Fixed Remuneration, consisting of a salary pursuant to Article 2389, paragraph 3, and a Benefits package, established by the Board of Directors.
- ▶ an MBO whose maximum opportunity is equal to 100% of the Fixed Remuneration (excluding Benefits) (see par. (6.1 MBO)), linked in part to the punctual achievement or surpassing of the Target EBTDA Risk Adjusted defined from year to year and an additional set of objectives determined from year to year by the Board of Directors. The provision of variable remuneration is subject to the fulfillment of conditions in connection with meeting specific entry gates:
  - a) Liquidity Coverage Ratio LCR (LCR)  $\geq$  risk tolerance
  - b) Total Capital Ratio (TCR)  $\geq$  risk tolerance
  - c) EBTDA RA (risk- and cost-of-capital-adjusted return): Positive
  - d) EBTDA RA / Target EBTDA RA  $\geq$  100%

For the details, see Par. 6.1 of the Remuneration policy ("MBO").

- ▶ a medium/long-term incentive plan ("long-term incentive plan") (see par. 6.2 *Variable medium/long-term system (LTI)*). The maximum allocation to that plan is equal to the difference between (i) double the Fixed Remuneration and (ii) the annual value of the MBO received by the Chief Executive Officer, the maximum amount of which is equal to 100% of Fixed Remuneration.
- ▶ a golden parachute potentially payable to the CEO upon termination of office. The details in this regard are provided Par. 7.2.2.8 of the Remuneration Policy ("Golden Parachute"), a non-compete agreement.

Different and/or additional forms of Fixed Remuneration and Variable Remuneration may be provided upon the occurrence of certain requirements, which are periodically assessed, partly on the basis of the extent of the powers awarded. Any additional forms of Fixed Remuneration and Variable Remuneration may be awarded within the limits of applicable laws and regulations, and the provisions of the Policy.

The following apply to the above-mentioned variable component:

- ▶ the limits established in Circular No. 285 in terms of the ratio between the fixed component and the variable component and the balance between cash and financial instruments;
- ▶ the malus and clawback mechanisms.

### *Statutory Auditors:*

The Statutory Auditors:

- ▶ receive remuneration established by the Shareholders' Meeting;
- ▶ do not receive any variable remuneration component or pay linked to the results of the Bank or the Group;
- ▶ have a “civil liability” insurance policy, the cost of which is paid by the Bank.

Furthermore, the Chairman of the Board of Statutory Auditors receives a higher compensation than that paid to the Statutory Auditors, also established by the Shareholders' Meeting.

### *Supervisory Body:*

The members of the Supervisory Body who are not Employees receive a Fixed Remuneration established by the Board of Directors. The amount of the Fixed Remuneration is established on the basis of market conditions and responsibilities assumed, guaranteeing the independence and autonomy of the function, and the diligent performance of the task. These people cannot receive Variable Remuneration, but they receive D&O insurance coverage and a reimbursement of expenses incurred to carry out their official duties.

For the members of the Supervisory Body who are also Employees, however, there is no compensation for the position, but only D&O insurance coverage and a reimbursement of expenses incurred to carry out their official duties.

### *Remaining employees:*

The remuneration is established, depending on the case, by the Board of Directors (with reference to Senior Executives, Executives reporting directly to the CEO and the Heads of the Control Functions), the CEO or his or her delegates, in compliance with the *Group remuneration and incentive policy* and applicable contractual regulations (particularly on the basis of the collective labor agreement for middle management and for professional area employees of credit, financial and instrumental companies, and the collective labor agreement for executive employees of credit, financial and instrumental companies, and the analogous collective labor agreements abroad).

### **Fixed Remuneration**

Fixed Remuneration is related to the experience and professional skills of the people working in the company, and is also based on the roles held and includes, as per the definition, the Benefits as well.

- ▶ The fixed component of remuneration is determined on the basis of principles of equity, competitiveness, meritocracy and consistency over time.
- ▶ Variable remuneration.

### *General principles*

The recognition of Variable Remuneration and the correlation between risk and performance is achieved through a process that aims to remunerate Personnel in compliance with the risk profile defined by the Risk Appetite Framework (RAF), and with a view to business continuity and sustainability of long-term results.

In particular, Variable Remuneration is paid subject to the following conditions: (i) liquidity coverage ratio (LCR), (ii) total capital ratio, at least equal to the level of “risk tolerance” approved by the Board of Directors, and defined within the RAF in force at the end of the year to which the incentive system refers, and (iii) risk-adjusted and cost-of-capital-adjusted positive return (Risk-Adjusted EBTDA, or EBTDA RA).

Variable Remuneration is also linked to several parameters consistent with the function of the specific instrument used to pay the Variable Remuneration (e.g. individual and/or Bank performance, however measured, length of service, etc.). No forms of guaranteed Variable Remuneration are permitted except in exceptional cases, for the hiring of new Personnel and limited to the first year of employment or office (e.g. entry bonus).

The variable remuneration component is divided into various components, including:

### Management By Objective (“MBO”)

The MBO is a formalized incentive system that provides for the payment of an annual bonus based on annual gross remuneration, subject to company and individual qualitative and quantitative objectives being achieved. The mix of quantitative and qualitative objectives is appropriately balanced according to the roles and responsibilities of the eligible personnel.

As regards the determination of the MBO, there is an initial phase during which, based on the achievement of individual objectives, the base amount of the bonus is determined; subsequently, to confirm whether the MBO can actually be paid out, the gates are checked: financial, equity, liquidity and positive profitability, adjusted for risk and the cost of capital (Risk Adjusted EBTDA or RA EBTDA).

Once the 3 gates have been respected, the MBO of the Bank’s Employees is then also calculated on the basis of two different multiplier mechanisms.

The first multiplier is the RA EBITDA / Target RA EBITDA. This multiplier can increase the MBO by up to 40% for middle managers, Senior Executives, Executives and other senior managers of the Bank, and up to 30% for non-managerial staff. This multiplier can also be decremental and still allow the MBO to be paid out to the middle manager and non-managerial categories, even if the Target RA EBTDA has not been reached.

The objective and multiplier related to the RA EBTDA / Target RA EBTDA ratio do not apply to:

- a) Company Control Functions;
- b) the CFO;
- c) Human Resources and Organizational Development.

A second multiplier is linked to Customer Satisfaction. This business performance indicator is formulated on the basis of a survey conducted by the Commercial O.U., and can increase the MBO by up to 9%. This indicator applies as a multiplier only incrementally.

As a result of the update of the bank size criteria by the Bank of Italy and, therefore, considering the Bank’s classification as “not a small bank”, the payout schemes have been changed for the CEO and the other Risk Takers, significantly extending the time horizon and increasing the incidence of the equity component (See Par. 6 for the CEO and 7.2.1.2 for Risk Takers):

- i) the percentages of deferral were increased from 30% to 40% and to 60% in the case of particularly high Variable Remuneration, for the CEO and the remaining members of the Senior Management (see Paragraph 7.2.1.2. and 7.2.1.3.);
- ii) the deferral periods have been increased from 2 to 4 years (5 years for particularly high Variable Remuneration), linear pro-rata (i.e. 10% at one year from the payment of the up-front portion, 10% in the second year, 10% in the third year, 10% in the fourth year). For beneficiaries of particularly high amounts of Variable Remuneration, the deferral is 5 years, linear pro-rata (i.e. 12% at one year from the payment of the up-front portion, 12% in the second year, 12% in the third year, 12% in the fourth year, 12% in the fifth year).

When annual Variable Remuneration does not exceed €50,000 and does not represent more than one-third of the annual total Remuneration (limited remuneration), the bonus is subject to:

- iii. for Risk Takers and for Employees with a minimum classification of QD3 (Level 3 Manager), regardless of whether they are a Risk Taker, a deferral period of two years for 30% of the Variable Remuneration.
- iv. for Risk Takers, a share in financial instruments equal to 50% with a 6-month retention period.

For all matters not expressly addressed above, the same rules established for variable remuneration apply to limited Variable Remuneration, including the ex-post adjustment mechanisms (Malus and Clawback).

The disbursement of deferred amounts to Employees is subject to the beneficiary remaining on staff at the payment date, without prejudice to the fact that, after three years of deferral have passed, beneficiaries will accrue the right to the payment of the subsequent deferred amounts as well, irrespective of whether they still work for the bank.

### **Company bonus**

For Parent Company employees subject to the credit collective labor agreement applicable in Italy, with the exception of executives, a company bonus ("VAP") may be provided on the basis of the national collective labor agreement applied, which provides a financial recognition when specific Bank performance targets are achieved.

The company bonus may be provided in cash, through corporate welfare goods and services on the basis of relevant agreements or through financial instruments.

### **Stock Option Plan**

As part of its incentive policies, the Bank, in compliance with applicable legislation, adopts Financial Instrument Incentive Plans (including "phantom" plans based on Bank options and shares, and Stock Option Plans based on the allocation of options that entitle the beneficiary to receive ordinary shares of the Bank). These plans aim to:

- a) encourage the integration of employees and managers, making them share in the company's results;
- b) make employees more aware about creating value for the Group and for shareholders;
- c) increase the retention capacity by making valued staffers less likely to quit the Group;
- d) improve the Group's competitiveness in the labor market, making it more attractive to the best talents with the professionalism and skills that the Group needs;
- e) promote the sustainability of the Bank in the medium and long term, and ensure that Variable Remuneration is based on the results actually achieved.

### **Other components**

There are additional components of Variable Remuneration beyond the MBO bonuses, within the limits of the Policy and regulations in force over time, including Sales Bonuses.

Sales Bonuses provide compensation for the achievement of annual company and individual qualitative and quantitative objectives, which are intended to support the achievement of the Bank's commercial, results and asset-based objectives, taking into account customers' needs and in line with their risk profile.

### Golden parachutes

The golden parachutes are approved by the Board of Directors for Personnel for whom the BoD is responsible, and by the Chief Executive Officer for the rest of the Personnel. The following are golden parachutes<sup>9</sup>:

- ▶ the amounts recognized under a non-competition agreement;
- ▶ the amounts recognized under an agreement for the settlement of an existing or potential dispute relating (or with a view) to termination of the employment relationship or office, regardless of the location in which it is reached;
- ▶ the indemnity for failure to give notice, in excess of the amount established by law.

### Discretionary pension benefits

To date, there are no discretionary pension benefits for Personnel. However, the Group companies, subject to the approval of the Board of Directors for the Personnel for whom the BoD is responsible, and the Chief Executive Officer for the rest of the Personnel, have the right to grant discretionary pension benefits, as defined and provided for in the Remuneration Supervisory Provisions. For the details, see Par. 7.2, 2.7 of the Remuneration Policy.

### Early termination of the relationship

The course of action to be taken in the event of the employment relationship being terminated is the one indicated by the relevant industry contracts. The Parent Company's Board of Directors may determine golden parachutes for Key Personnel in the event of early termination of employment or departure from office, in compliance with the conditions provided for by applicable regulations and the criteria approved by the Shareholders' Meeting. To determine these fees, qualitative and quantitative indicators are applied which reflect the performance achieved and the risks assumed by the individual and the Bank, and *ex post* correction mechanisms (*Malus* and *Claw Back*), within the limits allowed by collective agreements applicable to the employment relationship, as provided for in the Supervisory Provisions for Banks and, in any case, in compliance with the limits and requirements of the relevant legislation.

### Non-compete agreements

If the employee signs a "non-compete agreement" which requires him or her not to professionally engage with specific companies for a specific period of time starting from the date of termination of the employment relationship, the applicable Group company will pay him or her a sum to be determined based on the gross annual fixed remuneration received in the last year.

The non-compete agreement fee is subject to *ex post* correction mechanisms (*Malus* and *Claw Back*), within the limits allowed by collective agreements applicable to the employment relationship, as provided for in regulatory provisions and, in any case, in compliance with the limits and requirements of the relevant legislation.

The payment for the non-competition agreement is made after the termination of the relationship. For Risk Takers, this fee is included in the calculation of the Variable Remuneration to Fixed Remuneration ratio limit.

---

9) Note 16, of the Supervisory Provisions on Remuneration, Section III specifies that, for the purposes of the same, "golden parachutes" are not only the golden parachutes commonly intended (i.e. amounts recognized under an agreement for the settlement of a current or potential dispute, whatever the forum in which it is achieved) but also the payments under non-competition clauses and the indemnity of non-notice to the extent that this may exceed the amount established by law.

### **Ex-post adjustment mechanisms (Malus and Clawback)**

Variable Remuneration, including golden parachutes, is subject to ex-post adjustment mechanisms (Malus and Clawback), which can result in the Variable Remuneration being reduced, significantly reduced or even eliminated. The correction mechanisms must be identified within the limits allowed by law and by collective agreements applicable to employment relationships. They must reflect performance levels net of the risks actually assumed or achieved and capital levels, as well as take into account individual conduct.

Using the company functions, the Parent Company's Board of Directors ascertains the assumptions that determine the activation of the ex-post adjustment mechanisms with reference to the Personnel for whom the BoD is responsible, and resolves to apply them in accordance with the procedures provided for in the Policy. For the remaining Personnel, the CEO is responsible, relying on the support of the competent company functions and, where necessary, the corporate bodies of the Subsidiaries.

For the details, see Par. 7.2.3 of the Remuneration Policy ("Ex-post adjustment mechanisms (Malus and Clawback)").

The "Report on Remuneration" includes all information required by Article 450 of the CRR concerning remuneration policies and practices, relating to the categories of personnel whose professional activity has a significant impact on the bank's risk profile.

## Section 16

### Leverage (Art. 451 CRR)

#### Qualitative disclosure

The Leverage ratio - introduced by Bank of Italy Circulars No. 285 "Supervisory provisions for banks" and No. 286 "Instructions for the preparation of supervisory reporting by banks and securities intermediaries", both dated December 17, 2013, which adopted Regulation (EU) No. 575/2013 (CRR - Capital Requirement Regulation) as amended, relating to the new harmonized regulations for banks and investment companies, became an integral part of the Disclosure that Institutions are required to provide pursuant to Article 451 of the CRR.

The European Implementing Regulation No. 200/2016 defined the implementing technical standards of Article 451, making it applicable as of January 1, 2015 and providing the relative specifications.

#### Description of the processes used to manage the risk of over-leverage

Over-leverage risk is defined as the "risk that a particularly high level of debt with respect to own funds may make the bank vulnerable, making the adoption of corrective measures to the business plan necessary, including the sale of assets with the recognition of losses that could entail value adjustments, including on the remaining assets".

As concerns over-leverage risk, the Group proceeds with the periodic calculation of the leverage ratio, defined as the ratio between Tier 1 capital and total financial statement assets and off-balance sheet items, the latter weighted according to specific factors defined by Supervisory Provisions.

Current and forward-looking first-level monitoring of the leverage ratio is the responsibility of the Finance and Administration Department, with the support of the Company Structures directly reporting to it.

The Risk Management Function, as the second-level Company Control Function, performs an evaluation of the leverage ratio as part of the overall forward-looking capital adequacy assessment. As part of the ICAAP and in strategic planning processes, the Risk Management Function verifies the level of the forward-looking and stressed leverage ratio indicator, as calculated by the Finance and Administration Department.

The leverage ratio is also monitored in the RAF.

#### Description of the factors impacting the leverage ratio during the period to which the published leverage ratio refers

In order to respect the regulatory financial leverage limits in force on an ongoing basis, and in keeping with what is set forth in the Group Funding Plan, the following actions were successfully completed:

- ▶ the issue of an AT1 instrument for €150 million in January 2022, which significantly contributes to the increase in the Financial Leverage indicator as it leads to an equal increase in Tier 1 Capital, which is in the numerator of that indicator.
- ▶ the inclusion of the share of profit for the period referring primarily to the accrual accounting of the lump-sum indemnity for debt collection ("40 euros") and the increase in the percentage estimated recovery of late payment interest from 45% to 50% as well as the days expected for the relative collection from 1800 to 2100 days.

## Section 17

### Use of credit risk mitigation techniques (Art. 453 CRR)

BFF Banking Group has a Credit Risk Mitigation framework. The goal of the framework is in the first place to guarantee a better process for the management of the collateral held by the Group to mitigate the risk positions assumed, and in the second place to evaluate the possible effects and benefits in terms of capital requirements.

The exposure to this type of risk is broken down into two main evaluation and oversight areas:

- ▶ Verification of the enforceability and effectiveness of collateral in terms of recovery of the problematic exposure, which requires an analysis of the main characteristics of the attenuation and control tools, with reference primarily to the collateral acquisition and administrative management process, according to what is set forth in the internal regulations of the Group and the individual Group companies in that regard;
- ▶ Measurement of exposure to risk for which credit risk mitigation techniques are found to be less effective or may not have the expected benefit in terms of reducing RWAs; this measurement is performed by the Risk Management Function as part of the ICAAP.

In particular the adequacy of collateral is evaluated according to different criteria based on collateral type:

- ▶ mortgage collateral: the value of the asset is estimated based on a dedicated appraisal performed by an expert/appraisal firm which respects the independence and professional requirements established by regulations in force;
- ▶ personal guarantee: the value of the surety is determined based on the estimated assets of the guarantor (overall amount of enforceable assets), highlighting any encumbrances/restrictions in place on such assets;
- ▶ insurance guarantee: issued by a leading insurance company and aimed at guaranteeing private debtor solvency;
- ▶ financial guarantee: the value of the financial asset/instrument subject to the guarantee is estimated based on the value expressed by the reference market in which the asset subject to the guarantee is traded.

The Group verifies the quantitative and qualitative adequacy of the guarantees given by the various counterparties and, in the case of confirmed total or partial deficiency, it promptly requests that the guarantee be supplemented. Lacking such adjustment, the risk position is immediately reviewed, in order to pass the proper resolution in line with the emerging risks. The guarantees acquired should not present particular encumbrances that may undermine their legal validity. Furthermore, in order to mitigate credit risk, BFF enters into netting (ISDA) and collateral management (CSA) agreements consistent with EMIR regulations, with counterparties to which treasury and security services are offered.

For repurchase agreements for which the Bank has signed specific GMRA contracts, credit risk is transferred from the counterparty to the issuer of the underlying security.

Please note that in December 2023, at consolidated level, the Bank decided to rely on the use of ratings issued by the ECAI S&P in order to calculate RWAs with companies, instead of weighting exposures to companies, consistent with the options provided by the CRR, with a coefficient of 100%. This modification was made to benefit from favorable weighting with an insurance company (20%) used to mitigate actual credit risk to companies, and will allow for a more specific calculation of capital requirements ("Capital Relief" policy<sup>10</sup>).

10) The Capital relief project calls for the non-recourse purchase of receivables due to assignors from private debtors, through factoring and reverse factoring transactions, backed by an insurance guarantee issued by leading insurance companies.

## Section 18

### Liquidity risk

#### Qualitative disclosure

Liquidity risk is defined as the risk that the Group will be unable to meet its obligations at maturity and/or that it will have to bear non-market financing costs in relation to an unbalanced net financial position due to the inability to raise funds (funding liquidity risk) or due to the presence of limits on the disposal of assets (market liquidity risk), forcing the Group to slow or halt the development of its business, or sustain excessive funding costs to meet its obligations, with significant negative impacts on the profitability of its activities.

In defining liquidity risk, a distinction is drawn between short-term (“liquidity risk”) and long-term (“funding risk” or “structural liquidity risk”) risks:

- ▶ “liquidity risk”, the current or potential risk that the entity is incapable of effectively managing its liquidity requirements in the short term;
- ▶ “funding risk”, the risk that the entity does not have stable sources of funds in the medium and long term, with the resulting current or potential risk of not being able to meet its financial obligations, without an excessive increase in funding costs.

Operational and funding liquidity risks may be generated by a number of factors, at times simultaneous and correlated with each other:

- ▶ “internal”, deriving from specific negative events of the Group, such as a downgrade of creditworthiness, entailing a loss of trust by the market. In turn, these sources of risk may translate into a reduction in market access and an increase in procurement costs, a reduction or cancellation of credit lines, the loss of customers and/or a reduction or withdrawal of deposits;
- ▶ “external”, deriving from negative events caused by market shocks not directly controllable by the Bank. The main sources of risk originate from political or financial crises, catastrophic events, market crises which result in difficulties in the renewal of loans in the market and difficulties in accessing certain markets or sudden withdrawals by depositors.

The main sources of funding of BFF Banking Group include:

- ▶ funding in euros or in other currencies from Transaction Services, still representing, albeit with a lower contribution in 2022 than in previous years, the main source of the Group’s structural funding, thanks to its stability in relation to the “operational” nature of nearly all of it;
- ▶ funding through Deposit Account activities in the markets in which the Group is present (directly or under the freedom to provide services);
- ▶ bond issues;
- ▶ refinancing transactions via securities (repos);
- ▶ any recourse to wholesale banking/financial lines.

In particular, relating to direct funding via Deposit Accounts, the contribution was up significantly in the course of 2022. The Group maintained its entire infrastructure, offering an online deposit account on the Italian market (Conto Facto), aimed at retail and corporate customers and guaranteed by the FITD. Furthermore, BFF's Spanish and Polish branches continue to offer a similar online deposit account in their respective markets (Cuenta Facto and Lokata Facto, respectively). The collection of deposits issued by the Spanish branch of BFF, reserved exclusively for retail savers through the online Weltsparen platform is also active in Germany, the Netherlands and Ireland, in compliance with regulations on the freedom to provide services.

As required by the provisions of the prudential supervision regulation issued by the Bank of Italy, the Group adopted a Group Risk Management Policy and a Group Finance and Treasury Regulation, with a view to monitoring liquidity risk, and identifying the governance and control principles and the organizational units responsible for the operational and structural management of liquidity risk.

The governance policy, described in the Group Liquidity risk management policy, is defined by the Board of Directors, in line with the risk/return objectives defined in the Risk Appetite Framework and the Group's strategic objectives. What is set forth in the above-mentioned Policy is consistent with what is laid out in the Group risk management policy, in which the scopes and responsibilities of the company structures are set forth in detail at global level for all risks, including liquidity risk.

To ensure the implementation of the liquidity risk management and control processes, the Group adopted a governance model based on the following principles:

- ▶ Separation of processes for the management of liquidity and processes for the control of liquidity risk;
- ▶ Development of processes to manage and control liquidity risk, consistent with the hierarchical structure and through a process for the delegation of powers;
- ▶ Sharing of decisions and clear responsibilities among management, control and operational bodies;
- ▶ Making liquidity risk management and monitoring processes consistent with prudential supervisory requirements.

The liquidity management process (liquidity management and control of the relevant risks) of the BFF Group is centralized in the Parent Company. In this governance model, the Parent defines the Group strategy and the guidelines that must be applied to the subsidiaries, at the same time ensuring the management and control of the liquidity position at consolidated level. The subsidiaries participate in liquidity management and risk control with the local functions, each taking into account the specific nature of its core business, but always in compliance with the guidelines defined by the Parent. The operational and structural liquidity risk governance and management system is based on the general principles that all Group companies must pursue, and is aligned with the indications of the Supervisory Authority, such as:

- ▶ the strategic policies and liquidity risk governance policies, defined and approved by the Board of Directors, which represent, at Group level, the reference framework and restrictions for the operations of the structures responsible for operational and structural liquidity risk management;
- ▶ the policies, updated in relation to the evolution of company activities, the risk profile and the external context, and clearly documented and communicated within the Group;
- ▶ the roles and responsibilities of the units and functions operating within the liquidity management and governance process, clearly defined and documented;
- ▶ the operating structures governing liquidity, which act within well established and documented limits, and the control structure which operates autonomously and independently with respect to the former;
- ▶ the liquidity risk management and control process, set up in a manner consistent with the Group's organizational structure, which includes a periodic review process in order to ensure its effectiveness over time;

- ▶ the metrics used: regulatory and operational. Regulatory metrics are updated punctually with respect to regulatory developments and also used for operational purposes for risk governance, while operational ones are based on the projection of cash inflows and outflows for all of the various financial statement items using a prudential approach;
- ▶ risk management, performed from a current and forward-looking perspective, with the application of different scenarios;
- ▶ the maintenance of a sufficient amount of liquid instruments over time, consistent with the liquidity risk tolerance threshold defined at Group level, and which cannot ever be lower than the minimum level imposed at regulatory level;
- ▶ the clear and precise definition of an action plan containing intervention strategies in the event of liquidity tensions in order to obtain sources of funds (the Contingency Funding Plan). To this end, the Contingency Funding Plan defines the liquidity tension statuses, identifies the responsibilities and duties of the Company Bodies and Structures in emergency situations, identifies the pre-alarm indicators of the individual states of crisis identified, governs the indicator monitoring process, defines the process of declaring the state of emergency and its management, establishing the responsibilities and powers of the Corporate Bodies, Committees and Company structures which must be authorized to take prompt actions to resolve the state of emergency, and the main corrective actions that make it possible to obtain, over a brief period of time, sources of liquidity and the activation of periodic processes for their quantification;
- ▶ commercial, credit and financial policies, coordinated in order to maintain a balanced Group structural liquidity profile and take into account multiple risk elements;
- ▶ information flows within the individual companies and within the Group, adapted from a qualitative, quantitative and frequency perspective so as to allow for an adequate liquidity risk measurement and monitoring process in light of the Group's complexity.

Liquidity risk also includes the intraday risk deriving from the temporal mismatch between outflows (settled at daily cut-offs or when orders are received from customers) and inflows (settled at different intraday cut-offs), which may render it impossible for the Group to discharge its payment obligations when they are called in due to a temporary lack of funds. To hedge intraday liquidity risk, rules are defined for the maintenance of a minimum portfolio of eligible securities necessary to meet requirements for intraday and periodic refinancing from central banks.

The Bank has internal regulatory references governing liquidity risk management:

- ▶ RiskAppetite Framework, which is a set of metrics, processes and systems supporting the proper management of the level and type of risk, which the BFF Group is willing to assume consistent with its strategic objectives;
- ▶ "Group encumbered asset management policy", which defines the governance of Asset Encumbrance, or assets pledged to secure financial transactions (securitizations, repos, etc.) or, otherwise, assets reserved to provide forms of hedging, guarantee or credit enhancement to financial transactions from which such assets cannot be freely withdrawn;
- ▶ Funding Plan, which aims to represent the Financial Plan of the BFF Group, highlighting the liquidity position and currency exposure;
- ▶ Contingency Funding Plan, which sets forth objectives and describes the intervention processes and strategies included in the emergency plan of the BFF Group against adverse situations in obtaining funds.

As regards external regulatory references, the provisions introduced on liquidity by the European Union since June 2013 and subsequently updated establish that banks should: (i) respect the minimum short-term liquidity coverage requirement (Liquidity Coverage Ratio - LCR), as set forth in Art. 38 of Delegated Regulation (EU) 2015/61 as amended (minimum regulatory level of 100%), equal to the ratio between the liquidity buffer and the net weighted cash outflows identified over a stress period of 30 days, through the application of a financial stress scenario pre-established by the supervisory authority; (ii) respect the minimum structural liquidity requirement (Net Stable Funding Ratio - NSFR) of 100%, the last update of which entered into force on June 2021, following the final approval and subsequent publication in the Official Gazette, in May 2019, of the package of banking reforms containing Directive (EU) 2019/878 (CRD V) and Regulation 2019/876 (CRR II). This indicator measures the Group's capacity to hold qualitatively and quantitatively sufficient funding to cover lending exposures over a time horizon in excess of one year, and under specific stress conditions required by regulations. The indicator is calculated as the ratio between ASF (Available Stable Funding), represented by liabilities weighted on the basis of the stability deriving from counterparty/maturity/product type, and RSF (Required Stable Funding), represented by assets and off-balance sheet items weighted on the basis of the quantity of stable liabilities required for the renewal of the transactions; (iii) monitor the additional liquidity metrics (Additional Liquidity Monitoring Metrics – ALMM), introduced by circular No. 286/2013, published in March 2016, in implementation of the EBA's Implementing Technical Standards (ITS). These metrics were introduced in order to provide the Supervisory Authority with an exhaustive view of the liquidity risk profile of banks, through additional informational details different from those provided by the LCR and NSFR indicators. Liquidity risk stress tests are performed to assess the potential impact of stress scenarios on the Group's solvency conditions.

The Risk Management Function identifies the scenarios that may impact the Group's current or forward-looking liquidity risk profile. By way of example, the following different drivers are described, which are taken into consideration in the definition of stress scenarios.

- ▶ market/systemic scenarios (market driven), with reference to stress events outside the Group, such as situations of uncertainty in the financial markets and/or political uncertainty which result in market access difficulties, such as: slowdown in factoring collections (extension of average payment times), reduction in the market value of specific securities or increase in the haircuts applied to them, reduction in the availability of institutional funding (especially unsecured), unexpected outflows by retail customers (when contractually possible), non-renewal of deposits for 6 months and absence of new customers, outflows of liquidity from current accounts, operational and non-operational, increased use of the credit lines granted, reduced access to the interbank market and impossibility of renewing funding transactions at all or under the same conditions;
- ▶ idiosyncratic scenarios (bank specific), which regard stress events internal to the Group, typically connected to reputational damage with a possible deterioration of creditworthiness, which generates: an increase in the cost of funding, with an impact on the Group's results, increase in the haircuts applied to their issues used in "collateralized" funding transactions, outflows of liquidity from current accounts, operational and non-operational, activation of contractual clauses which require additional expenses in the case of a rating reduction ("downgrade triggers");
- ▶ combined scenarios, or the market and idiosyncratic scenarios developed in a single framework to evaluate the overall effect of stress on the Group.

In light of the business model, the COVID-19 epidemic and the Russia-Ukraine conflict did not entail a change to the objectives and management strategy or to the systems for measuring and controlling risks.

Please note that, in the course of 2022, the short (LCR) and long (NSFR) term ratios did not show any tensions, as they were well above regulatory levels on a monthly and quarterly basis, respectively.

With reference to short-term solvency, the lowest value was recorded in the report of October 31, coinciding with the exit of the customer Arca, which took place in early November. Despite the decline in liquidity relating to that event, the Bank in any event effectively managed the liquidity position using alternative funding sources. The liquidity buffer, nearly entirely in euros, essentially consists of excess reserves deposited at the Central Bank and unencumbered government securities. On average, in the course of 2022, they equaled roughly 41% and 59% of the buffer, respectively. The minimal remainder consists of cash.

BFF Bank also enters into derivative contracts with banking counterparties for the coverage of exchange rate risk, through currency swap instruments, in addition to forms of lending and funding in natural hedging, required for currencies other than the euro, in order to limit exposure to currency risks. These operations do not call for the provision of collateral in the form of cash or other liquid collateral.

The funding of the BFF Group is essentially in euros. At December 31, 2022, as well as for all of 2022, the relevant currency used for liquidity reporting at consolidated level is confirmed as exclusively euros (EUR) as, from the monthly monitoring performed, no other currency was equal to or greater than the threshold defined by regulations, or 5% of the total liabilities held by the entity.
