

# AI Advisory

Quickly deploy AI agents to cut complexity and accelerate action

Today’s supply chain teams are juggling more complexity than ever. They must navigate sudden disruptions, tight resources and constant pressure to keep operations running smoothly.

In this tough environment, AI agents are game-changers. They transform slow, manual processes into fast and data-driven action. But identifying and deploying agents effectively can be difficult without substantial expertise on your side.

Blue Yonder AI Advisory service works closely with customers to build and implement purpose-built agents within weeks, not months—unlocking efficiency, cost savings and productivity.

## Use our expertise to add AI agents to your team

The AI Advisory service builds and implements AI agents to suit your needs.

- Collaborative development: We work alongside your team to understand business needs and codevelop agents that support supply chain success.
- Tailored or custom agents: We can adapt one of our existing AI agents for your specific needs, or create a unique agent designed to address a particular challenge.
- Rapid deployment: Building on established and customizable agent architectures, our AI agents achieve significant business impact quickly, with measurable outcomes in weeks.

### Key Benefits

# 25B

AI/machine learning predictions daily

# 22 years

of delivering AI designed for supply chain

# 1.5TB

of customer data ingested weekly across solutions based on company data from January 1 to June 30, 2025

- **Trustworthy results:** We build our deep supply chain expertise into our AI agents. They understand real-world complexity and are rigorously tested for reliable recommendations and actions.

Blue Yonder's AI agents can monitor data 24/7, analyze emerging concerns, recommend actions, and even carry out decisions within guardrails to avoid disruptions and speed up actions. Agents provide end-to-end visibility and enhance collaboration across complex networks.

### A history of AI success

The AI Advisory service draws on Blue Yonder's substantial data, AI and cloud expertise. Our leadership in supply chain AI began with developing sophisticated machine learning algorithms over two decades ago. Today, we're breaking new ground in applying agentic and generative AI to revolutionize supply chains. Work with us to leverage these innovations and solve your organization's most pressing supply chain problems.

### Driving AI excellence with technology partners

Our unique partnerships ensure Blue Yonder AI agents are state-of-the-art and accurate:

- **Microsoft:** We have early access to the latest innovations in AI fueled by Microsoft's extensive R&D, especially through our use of Azure AI Foundry.
- **Snowflake:** As the data foundation for the Blue Yonder Platform, the Snowflake AI Data Cloud provides immense scale and native access to more AI capabilities.
- **RelationalAI:** Our supply chain knowledge graph is built within Snowflake on RelationalAI, providing a semantic layer that supports agents' reasoning.

### Transform your supply chain with AI agents

- **Eliminate data overwhelm:** AI agents identify patterns in massive amounts of data far faster and more accurately than humans can.
- **Maximize human expertise:** Reduce manual processes to free up humans for more strategic, high-level decision-making.
- **Increase productivity:** Execute multiple tasks simultaneously and effectively, with 24/7 availability.
- **Advance AI adoption for greater ROI:** Make everyday AI usage easy through our consistent, natural-language user interfaces across devices and locations.
- **Drive efficiency with integrations:** Connect AI agents to key software tools for automated actions.
- **Grow alongside AI agents:** Adapt agents to your business and a changing market with flexibility.
- **Trust in top-tier security:** Your data is protected with industry-leading security from Blue Yonder and our partners Microsoft and Snowflake.
