

Building smarter, synchronized warehousing with Blue Yonder

Yesterday's warehouses can't face tomorrow's challenges

LSPs juggle competing client demands with outdated tools. Disconnected systems can't handle multi-client complexity. When disruption hits one account, others suffer. Yard congestion delays operations, and SLA penalties erode margins.

This isn't sustainable, and it's not the future

<p>84%</p> <p>of companies report being underprepared for uncertainties.</p>	<p>51%</p> <p>of companies identify customer demands as a major challenge to their operations.</p>	<p>50%-70%</p> <p>of warehouse costs are labor-related.</p>	<p>Only 7%</p> <p>of supply chain leaders have real-time decision execution capabilities.</p>

Unified intelligence for every corner of the warehouse

Blue Yonder orchestrates labor, automation, planning, and execution to ensure your warehouse operates as a single, unified system across inbound, outbound, and returns even when competing commitments collide.

One platform. Unified decisioning. Machine speed and precision.

Intelligent forecasting and planning:

Forecasts labor, equipment, robotics, and dock needs using real-time signals, so every shift starts with the right resources.

Dynamic execution and orchestration:

Monitors conditions in real time and reallocates tasks and resources as client priorities shift, keeping all commitments, including returns SLAs on track.

Unified workforce and automation optimization:

Coordinates people, robots, and equipment as a single network to strengthen throughput across operations.

Flow control from gate to dock:

Synchronizes yard, dock, and inventory operations with client-specific demand to prevent congestion and maintain accuracy across all accounts.

Proven ROI for LSPs

60%–80%
reduction in warehouse overstaffing.

50%
increase in throughput.

50%
less detention fees.

10%–30%
reduction in pick travel time.

The future of warehousing is here

Move beyond fragmented systems that can't handle multi-client operations. We help LSPs predict client demand, allocate resources by priority, and execute with precision.

Win new business. Protect client relationships. Deliver profitable logistics. With Blue Yonder.
