

Security & Privacy Data Sheet

Security and Privacy by design. Quality and Trust as a result.

We Value Trust and Compliance

We Foster a Culture of Security & Privacy

We Build Secure Software Solutions

We Deliver Secure Cloud Services

We Invest in Cybersecurity

Blue Yonder's solutions exemplify **end-to-end security** and privacy-by-design. We enable transformative growth through an automated and orchestrated supply chain platform, permeated with an **optimized cybersecurity framework**. We deliver a risk-based security and privacy approach using simple and innovative solutions with customer-focused results.

We Value Trust and Compliance

Blue Yonder maintains multiple security and privacy certifications and attestations while undergoing regular independent third-party audits of the cloud services offerings and cybersecurity/privacy controls including but not limited to:

We Foster a Culture of Security & Privacy

Blue Yonder has robust cybersecurity and privacy awareness, education and training programs. Our core values of empathy, results, relentless and teamwork correlate to create a security and privacy focused mindset in all of our product offerings and customer engagements.

Regional and regulatory requirements are consistently monitored and are fundamental topics of our awareness, training and educational efforts to support each customer's specific needs and requirements.

We Build Secure Software Solutions

Our core consists of software solutions built with security and privacy by design:

- Static and dynamic application security testing
- Internal and Third-party penetration testing
- Vulnerability scanning and remediation
- Open-source validation and secure code testing
- Secure software development training

We Deliver Secure Cloud Services

Security and privacy is foundational in our cloud services:

- Secure SaaS delivery
- Industry standard encryption both in-transit and at rest
- Legal and regulatory compliant data transfers; learn more about our Privacy commitment [here](#)
- Customer backups and recovery for specific needs
- Region-specific storage for regulatory requirements
- Risk management and data governance
- 24/7 Incident response and disaster recovery

We Invest in Cybersecurity

Blue Yonder is committed to security throughout the organization and demonstrates investment in the growth and development of its cybersecurity program:

- Dedicated professionals passionate about Cybersecurity
- Organization-wide support with deliberate strategic planning
- Empowered teams spanning Compliance, Governance, Risk, Awareness, Architecture, Engineering, Operations, Threat and Vulnerability Management
- Fully supported by the Executive Team and Board of Directors
