ACCELERATE YOUR RETIREMENT SAVINGS!

CATCH-UP CONTRIBUTIONS INCREASE YOUR SAVINGS OPPORTUNITIES!

Catch-up contributions let employees add extra funds to their retirement accounts. If you're age 50 or older by December 31 and have already contributed the maximum amount, you may qualify to make additional contributions. This feature helps boost savings, especially for those who couldn't save as much earlier in their careers.

HOW DOES THE CATCH-UP CONTRIBUTION WORK?

- The IRS limits regular contributions into a retirement plan to $24,500 for the year 2026.
- The plan permits contributions of up to 100% of your compensation (regular wages including overtime and bonuses).
- Once you've reached the standard contribution limit for your retirement plan, you may be eligible to contribute additional funds through catch-up contributions. In 2026, individuals age 50 and older can contribute up to an extra $8,000. If you're between the ages of 60 and 63, you may qualify for a "super catch-up" contribution of up to $11,250, allowing you to boost your retirement savings even further.

HOW DO YOU ELECT TO MAKE A CATCH-UP CONTRIBUTION?

If you're eligible for catch-up contributions, there's no need to take any extra steps—your contributions will automatically continue until you reach the IRS limit of $32,500 for 2026 ($24,500 in regular contributions plus up to $8,000 or $34,750 ($11,250 in catch-up contribution), depending on your age).

To make the most of this opportunity, consider increasing your current salary deferral percentage.
