Brunel Energy, Inc.

Safety Responsibilities Policy Statement

Management Responsibilities:

- To determine and communicate safety policy to all employees,
- Establish company goals and evaluate performance, and
- Commit the resources necessary to accomplish these goals.

Supervisor Responsibilities:

- Become thoroughly familiar with the Brunel Energy, Inc., Safety Management Plan,
- Train and coach employees in safety skills, safety rules, and safe work practices,
- Require safe work activities of employees as a condition of employment,
- Inspect to assure safe work conditions, and record the results,
- Investigate injuries, accidents, and report safety issues; record the results of the investigation and assure corrective actions are completed, and
- Lead safety meetings and conduct or arrange safety training to address safety issues.

Employee Responsibilities:

- Become thoroughly familiar with the Brunel Energy, Inc., Safety Plan and specific safety rules that apply to their work,
- Perform all work to standards, comply with safety policies, procedures, and rules,
- Actively participate in safety activities and cooperate with safety programs,
- Identify, correct, or isolate, and report hazards in the workplace, including unsafe actions and unsafe conditions,
- Report all injuries as required by company policy and follow correct procedures for reporting both injuries and accidents,
- Be proactive in identifying the need for and using personal protective equipment.
