

## **TiVo Connect and Go – Video Transcription**

If you've got another TiVo DVR in the house, multi-room viewing lets you start a show or movie in one room and finish it in the other. And if you've got two, you can enjoy multiroom streaming which enables you to stream content in real time from one TiVo to another. Convenient, huh?

You can also download your favorite shows to your laptop and take the stuff you love on the road for free or download software that lets you transfer your favorite shows to a smartphone or tablet.
