

## **TiVo YouTube – Video Transcription**

Sure, watching the latest viral video is fun. But now YouTube comes to your big screen. Share that video everybody's talking about at work with everyone at home. You can even discover deeper content about the movies, shows and celebrities you love.

And if you've discovered the magic of podcasts, you're covered there too. Subscribe to your favorites and enjoy them on your home theater system. Trust me, a podcast never sounded so good. It's truly a world of endless content and possibilities, made personal on your HDTV.
