

TiVo Season Pass Recordings – Video Transcript

Recording a single show is easy enough. See something in the menu you want? Click the red *Record* button. In search results, select *Record This Episode* — couldn't be easier.

But what if you want to automatically record every episode of a whole season? Just go here and click *Select*. It's all very intuitive. Even if the broadcast time changes, with the *Season Pass* recording you're always covered.

You can record only new episodes and make sure each recording is kept until you delete it. You can also add extra time to your recordings to ensure you don't miss who wins in overtime, or those final envelopes on award shows that always run long.
