

TiVo Search and Browse – Video Transcription

With TiVo, finding what to watch is now as much fun as actually watching it. In *Search*, just start typing in what you're looking for — the name of a show, an actor, director, even a genre. And bam — choices galore. You'll see matches instantly based on popularity, so it just might take a letter or two to find what you're looking for.

And look — you can even see your options on where to get it. Cool, huh?
