

TiVo Remote Control – Video Transcription

When you go to most menus while watching a program, you'll see a Live TV window in the upper right-hand corner showing the movie or TV show that's currently playing. Want to pause the action? Just hit *Pause*, and when you're ready to continue, just press it again. See — it's easy.

If you want to return to the recorded show you were watching, just hit the *Zoom* button. If you want to jump to what's playing on Live TV right now, just hit the *Live TV* button.

One thing TiVo is famous for is the ability to get what you want, when you want it. Just click here to fast forward — hit it again and you'll zoom along. One more time and you're really flying. This button jumps you ahead 30 seconds, which is really nice.

How about rewinding? If you missed the last-second touchdown, hit this button to rewind eight seconds and see it again. Now you can hit *Play* or *Slow* for slow motion.
