

## TiVo Guide and Info Buttons – Video Transcript

I should take a moment to mention two buttons you'll definitely want to know about. The *Guide* button gives a simple look at your available channels and what's playing on each – as well as what's coming up. It's the quickest way to see what's on and makes recording a cinch.

Above that is the *Info* button, which will give you a quick rundown of the show you're watching.
