

## TiVo VOD and Web Features – Video Transcript

Now whatever you're looking for—whether it's from TV, the web, or on-demand—it's ready whenever you are.

That's the beauty of the TiVo experience—you're no longer limited to just what's on TV. TiVo makes these virtually endless options fun to use and simple to navigate. You can make any night movie night with great movie and TV apps. With access to on-demand, the best seat in the house is always on your couch. From just-released Hollywood hits to the old classics you love on a rainy afternoon. Whatever you're in the mood for is now playing on the world's most advanced and innovative DVR.

Are you sitting down? Because here's one of the coolest things about being a TiVo user: go to the search feature, type in the first few letters of what you're looking for, and your TiVo will find the show or movie you want and display all of your viewing options. You can decide what's best—it's integrated search as only TiVo can deliver. How's that for awesome?

Wanna rock out, mellow out, or show your kids how to do the electric slide? Look no further than your TiVo DVR. With Pandora, you can make your HDTV stand up and sing. Whether you're in the mood to play some air guitar or just want some background music when friends drop by, Pandora plays the music you love on the best speakers in the house. You can also access free music on Live 365 or even your computer's music library through your home network. So, no matter what kind of music moves you, that little TiVo guy is always ready to hook you up.

Sure, watching the latest viral video is fun, but now YouTube comes to your big screen. Share that video everybody's talking about at work with everybody at home. You can even discover deeper content about the movies, shows, and celebrities you love. And if you've discovered the magic of podcasts, you're covered there too—subscribe to your favorites and enjoy them on your home theater system. Trust me, a podcast never sounded so good.

It's truly a world of endless content and possibilities, made personal on your HDTV.

If you've got another TiVo DVR in the house, multi-room viewing lets you start a show or movie in one room and finish it in the other. And if you've got two, you can enjoy multi-room streaming, which enables you to stream content in real time from one TiVo to another—convenient, huh?

You can also download your favorite shows to your laptop and take the stuff you love on the road for free, or download software that lets you transfer your favorite shows to a smartphone or tablet.

The TiVo experience is cool enough on its own, but you can make it an even deeper and richer experience with totally free and incredibly convenient TiVo apps. Whether you have an iPad,

iPhone, Android phone, or Kindle Fire, you can transform it into the most amazing command center and take your TV watching experience to a whole new level.

When you're away from home, you can search, browse, and schedule from practically anywhere—it's like always having your TiVo with you. Forgot to record the game? Not a problem. Hear about a hot new show at the water cooler? Schedule it in seconds. No matter where life takes you, you can always stay in touch—from movies and shows to YouTube and your favorite music.

Thanks to simple, intuitive, easy-to-use navigation, you can learn a lot just by exploring—it's like second nature. And you can always visit [TiVo.com](http://TiVo.com) for much more. Check out the 'Find TV Show' section to discover new shows, manage recordings, or even schedule a new recording online. Go to the 'My TiVo' section for the latest news. It's also great for getting more in-depth product info and how-to's.

Thanks for watching, and congratulations on stepping up to the most advanced and innovative DVR ever built. Happy viewing!
