Life investment portfolio

Peter Schliebs

Chief Investment Officer, Life

Key points

Life investment portfolio

Well positioned for macro environment

No significant change expected to portfolio allocation

Attractive fixed income and unlisted equities investment opportunities

Cap rate expansion expected across Australian domestic property portfolio

Remains strongly capitalised with significant flexibility

Market themes

Well positioned for macro environment

Financial conditions tightening

- Well positioned to take advantage of funding gaps in the market
- Lender friendly credit terms

Economic growth slowing

- Diversified portfolio, looking at further diversification strategies
- Strongly capitalised

Continued volatility

- Investment portfolio hedged for interest rates and inflation
- Active management extremely important in current climate and will be a key driver of performance
- Strongly capitalised

Strong balance sheet positioned to take advantage of investment opportunities and drive further ROE expansion

Asset risk premium update

Attractive fixed income and unlisted equities investment opportunities

Asset risk premiums¹

Key observations

- Opportunities persist within fixed income and continue to be supportive for new business profitability
- Whilst equity risk premiums remain compressed, Challenger Life sees opportunity for top quartile managers to add value in unlisted equity strategies

Asset allocation

No significant change expected to portfolio allocation

Asset allocation

Key observations

- Further increase to fixed income given relative value outlook
- Asset backed finance markets and unlisted equity continue to provide compelling investment opportunities
- Looking to target small allocation to USD given procyclical nature of the Australian dollar as part of continued push to increase diversification and reduce portfolio volatility

Assumptions

- Flexibility to support growth with capital intensity expected to remain broadly stable
- Continue to target >75% investment grade within the fixed income portfolio
- No change to normalised growth assumptions

Fixed income

High quality portfolio performing in line with expectations

Fixed income portfolio (\$b)

Credit defaults (bps)

Credit key trends

- Challenger credit portfolio performing in line with expectations
- Households – resilient performance and strong labour market with significant credit enhancements
- Corporates – limited exposure to cyclical names

Alternatives

**Provides liquid capital and financial flexibility
with diversification to credit and equity exposures**

Alternatives portfolio (\$bn)

Life insurance

- Exposures linked to life insurance risk
- No appropriate index that can be used to track total returns

General insurance

- Includes insurance-linked securities, with a primary exposure to catastrophe bonds
- Broadly correlated to the Swiss Re Cat Bond Index (Bloomberg SRCATTRR)

Absolute return funds

- Includes global macro funds (systematic and discretionary) and market-neutral long/short funds
- Broadly correlated to the Société Générale CTA Index (Bloomberg NEIXCTA)

Property

Defensive property portfolio Higher interest rates driving cap rate expansion

Defensive property portfolio¹

- Actively reduced exposure with over \$0.5bn of sales in last 18 months
- Occupancy rate increased to over 94%
- Rental incomes increasing with positive leasing spreads in FY23
- Lease duration long – 58% beyond FY27

Challenger Life Company (CLC)
PCA ratio as at 30 April²

1.58x Target range
1.30x to 1.70x³

Additional flexibility

Bank excess capital to be returned⁴
~\$40m

1. Capital intensity ratio is calculated as CLC PCA divided by Life closing investment assets.

2. The PCA ratio represents total Tier 1 and Tier 2 regulatory capital base divided by the Prescribed Capital Amount. The PCA ratio of 1.58x has been adjusted to reflect the repayment in May of \$236m of Additional Tier 1 (actual reported PCA ratio was 1.66).

3. Challenger does not target a specific PCA ratio and the target PCA ratio range is a reflection of internal capital models, not an input to them and reflects asset allocation, business mix and economic circumstances. The target surplus produced by these internal capital models currently corresponds to a PCA ratio of between 1.30 times to 1.70 times. This range may change over time and different constraints can apply including CET1 requirements.

4. Excess capital of ~\$40m expected to be returned to Challenger prior to completion, subject to APRA approval. \$50m of excess capital was injected into CLC in April 2023.

Key points

AASB 17 and outlook

AASB 17 Insurance Contracts –
no impact to underlying
economics of the business

FY23 NPBT expected to be
slightly above midpoint of
guidance range

AASB 17 Insurance Contracts

Does not impact normalised profit, cash generation or dividend policy

- AASB 17 Insurance Contracts is a change of accounting standard for insurance contracts effective for financial years beginning on or after 1 January 2023
- The new standard does not change the economics of the underlying business but does affect timing of statutory profit recognition
- Accounting for investment contracts is not impacted by AASB 17
- Accounting of non-insurance businesses (Funds Management, Bank, JVs) not impacted by AASB 17
- No change to Challenger's normalised profit reporting framework

Business Strategy

No change to how business operates

APRA Capital

No material impact to regulatory capital calculations

Cash and Dividend

No impact to dividend policy or cash generation

Profits

No impact on normalised profits, but statutory profit may be more sensitive to interest rate changes¹ driving increased variability

AASB 17 transition impact

KPIs and line items impacted by AASB 17

Impacted by AASB 17

Life insurance liabilities

Increase in CLC's insurance policy liabilities resulting in a reduction in net assets

Statutory NPAT

Impact is to timing of profit/loss recognition and may be more sensitive to interest rate changes¹ driving increased variability

Normalised ROE

Small reduction in net assets from increase in insurance policy liabilities

Investment Experience

Movements in policy liabilities recognised in investment experience

Not impacted by AASB 17

- Life investment liabilities – AASB 17 applies to insurance contracts only
- Life Investment Assets
- Normalised COE

- CLC PCA Ratio – No change to regulatory capital base or PCA ratio
- Normalised NPBT
- Normalised COE Margin

FY23 business performance update

Normalised profit slightly above midpoint of guidance range

Normalised net profit before tax

Guidance considerations

- **Bank:** ~\$10m EBIT full year loss
- **Expenses:** 5% to 6% full year growth

Expect to be **slightly above midpoint** of FY23 guidance range
