

Children's Wisconsin in Your Community

Pediatric Hospitals

Children's Wisconsin is one of the nation's top pediatric facilities, ranked among the nation's best by *U.S. News & World Report*. Our hospitals, located in Milwaukee and Neenah, Wis., provide inpatient care, including transport of critically ill or injured children and intensive care services.

Specialty Care

We offer outpatient specialty care in more than 39 medical specialties. This care is available throughout Wisconsin at our hospitals, surgery center, at clinics and by virtual visit in order to provide care closer to home.

Specialty Service Collaborations

Our pediatric specialty providers offer services at other hospitals and clinics through Children's Specialty Group, a joint venture between Children's Wisconsin and the Medical College of Wisconsin. The collaboration with other health care organizations allows us to extend our expertise to more patients in all corners of Wisconsin.

Urgent Care

Our urgent care sites are Milwaukee, Appleton and Kenosha's only walk-in clinics just for kids. We also offer online urgent care video visits, providing pediatric urgent care through the convenience of a phone or mobile device.

Primary Care

We provide preventive and routine care to kids at 20 locations in Southeastern Wisconsin. Behavioral health consultants now work side by side with pediatricians in all primary care locations to create a holistic approach to patient care.

School Nurse Program

Full-time registered nurses provide care for kids in six Milwaukee Public Schools, including health screenings, care coordination, health literacy and chronic disease management.

School-Based Mental Health

Our child and family therapists work with kids in their school environment to:

- Provide individual counseling and group therapy
- Consult with parents and teachers to support a child's success
- Work with school staff to foster a healthy environment for students

Mental and Behavioral Health

Children's Wisconsin has expanded its mental and behavioral health services to include the Green Bay, Milwaukee and Kenosha Mental Health Walk-In Clinics, school-based mental health, therapy and counseling, early childhood mental health and much more.

Child Advocacy and Social Services

Children's Wisconsin has a long history of advocating for children's safety and well-being and has created a network of Advocacy Centers throughout the state. Wisconsin families are supported in many ways, including:

- Creating stable and loving homes through foster care and adoption when children need a temporary or permanent home
- Offering parent education and support through family resource centers and home visit programs, so parents can raise healthy and happy children
- Helping ensure the safety and well-being of children through intensive in-home and family case management work
- Protecting children from abuse and helping them heal through abuse assessment, referral to support services, and professional and community education

Chorus Community Health Plans

We offer an HMO health plan in 41 Wisconsin counties for families who are eligible for BadgerCare Plus.

Other Services

Research – The Children's Wisconsin Research Institute is the most powerful concentration of pediatric research in the region. Our doctors and surgeons are nationally known for their groundbreaking discoveries in the fields of premie and newborn care, heart care and cancer care.

Health education – We provide e-learning courses to children and their families on important topics, such as injury prevention, bullying prevention, mental and emotional health, nutrition and exercise.

Wisconsin Poison Center – The Wisconsin Poison Center provides 24-hour, toll-free poison information for anyone in Wisconsin and is certified by the American Association of Poison Control Centers. The Wisconsin Poison Center also offers poison prevention curriculum that meets state standards and is available to educators at no cost.

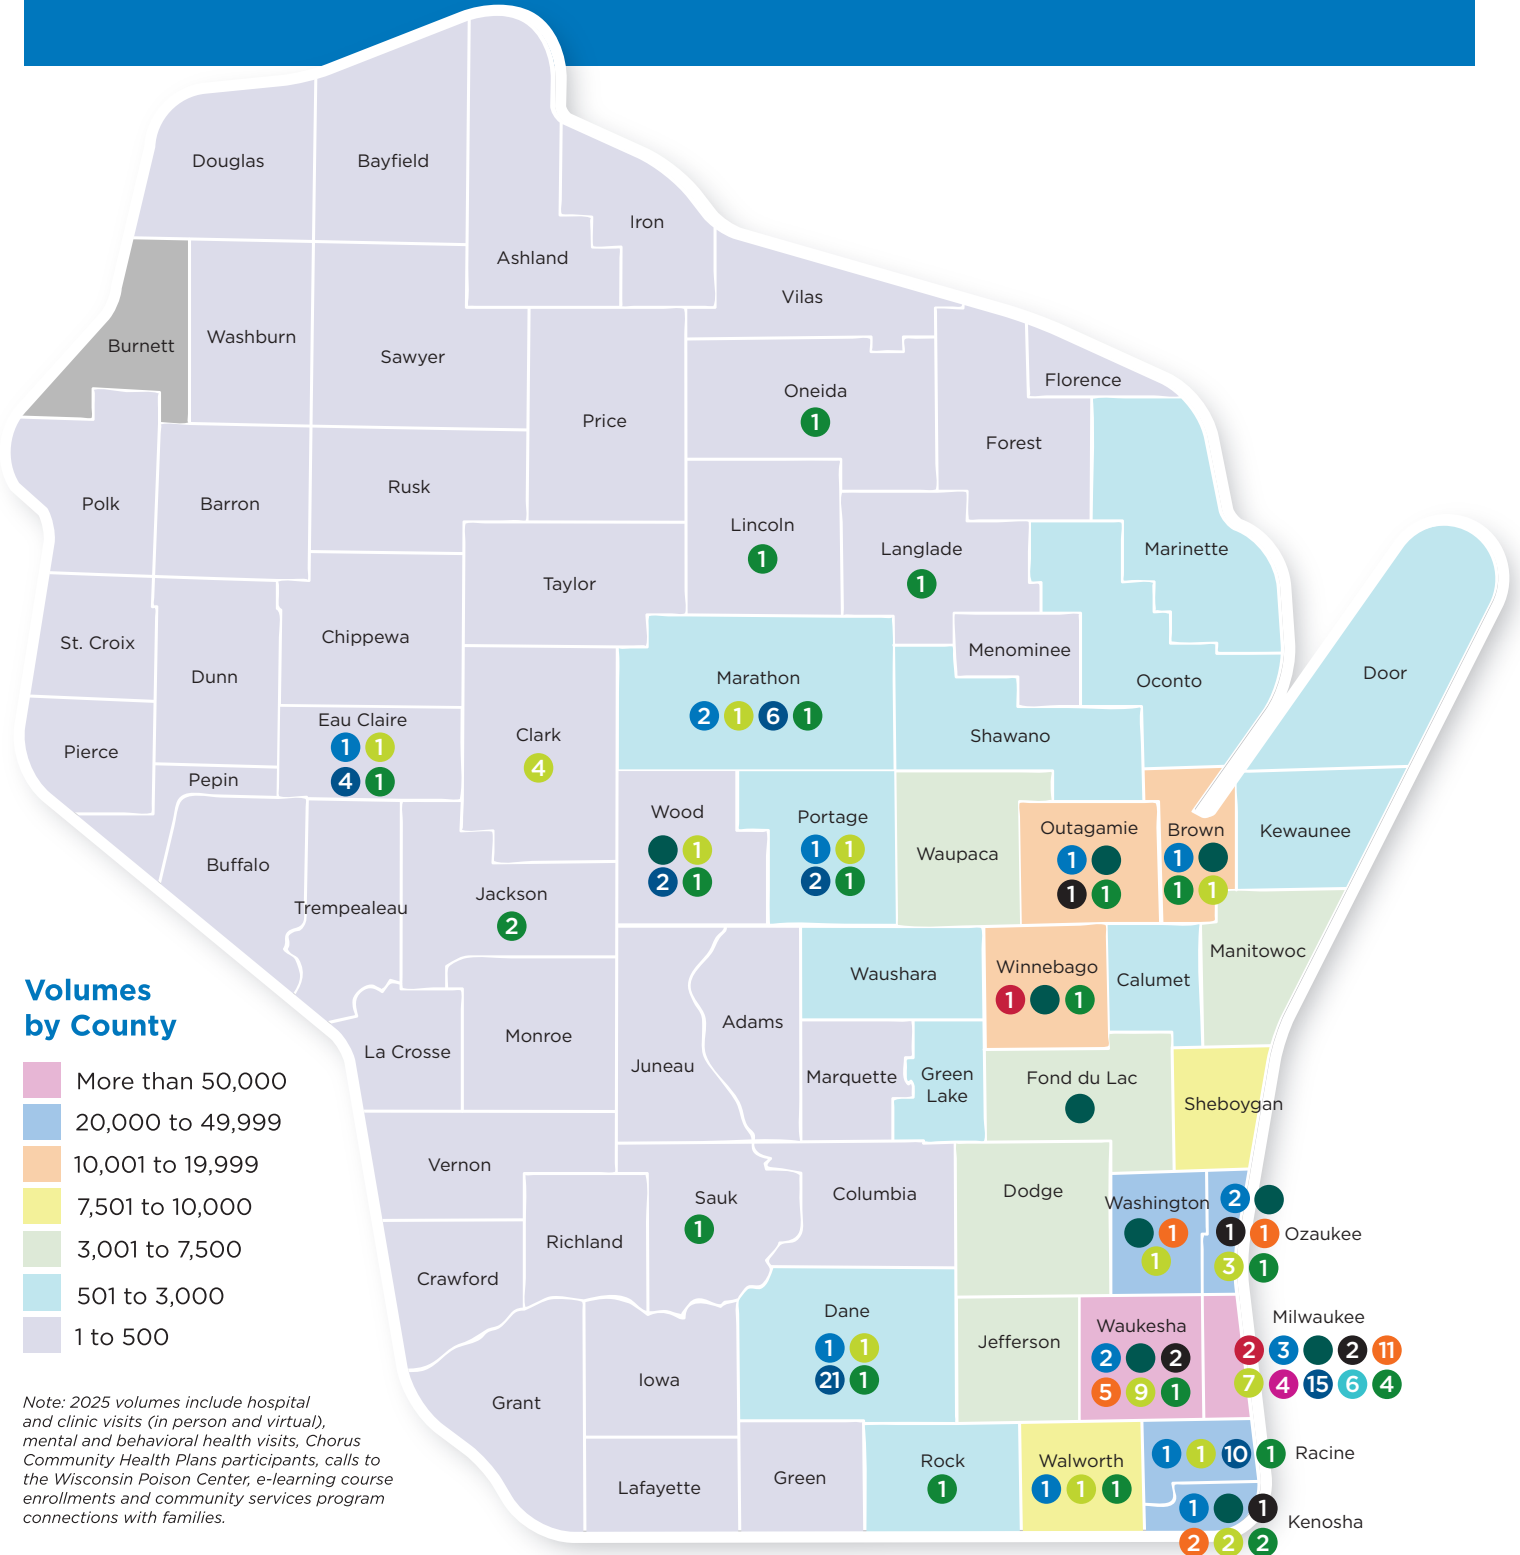

Kids deserve the best.
