

# “Healthy Minds” Song Lyrics

Lyrics by Deonta Griffin, Jeremy Bryan, and Doc Harrill  
Produced by Nate Willard  
Mixed and Mastered by Lee Harrill of Refresh Collective

Chorus:

Healthy Mind Healthy Vibes  
That's how we roll  
When I'm mad I talk it out with my people  
All my heroes got me focused on these big goals  
Focused on my health, yeah, physical and mental  
Told you I love you and I meant it because your special  
Destiny is calling to your heart come on let's go  
Healthy Mind Healthy Vibes that's how we roll

Verse 1:

Healthy Minds healthy vibes, I was born to thrive  
Feelin' so alive when I share what's inside  
No need to hide, no need to pretend  
I'm surrounded by good people mentors teachers and a few friends  
They treat me like family yeah they look out for me  
Who know me on the real yeah they know about my story  
My teacher said that I'm unique and that that's a really good thing  
When the bell rings I might ask what she means  
went up to her right after class she asked what was up  
I told her that I'm feelin' low and how I'm not sure what is what  
She nodded for a moment looked me in the face  
And said you're right on time  
You're entering a new phase  
And it can be confusing and it can feel strange  
So much change all at once, but these are growing pains  
Just make sure to keep talking about it with those that care  
And don't forget to have fun, run around, lots of fresh air  
Make sure you're sleeping well and eating three square meals a day  
A few snacks along the way, and not too much media play  
all in all you're doing great and I'm super proud of you  
Remember there's people around you that really love you

Chorus

Verse 2:

First I think. Then I act.

It's like lookin up directions, google the map to a peaceful track

If I'm thinkin about peace. Got a good nights' sleep

And I had something to eat, so I'm filled with energy

I can take a deep breath, you know, breathe

Then I tell a trusted friend, man I need to speak

And my friend said "chill baby chill"

It's gonna be alright, "Still baby still"

And I know he's right, I can calm my body down

I'm in control of my thoughts and my actions now

It's a cycle, healthy body, healthy brain

Healthy actions, healthy ways, healthy friends, help me change

I'm thinking how I'm loved, no matter how I feel

I'm a take that peaceful track I'm not a hot wheel

Slow down, cool down, think about solutions.

First I think, then I act, this is how I do it.

Chorus
