

# Tree Survey Form

A Tree Survey is undertaken to inform revegetation and the provision of replacement trees (Condition of Approval E13). The Tree Survey must identify any trees to be removed, except for trees that are offset under Condition E4. The Tree Survey must be submitted to Sydney Metro for information with the Place, Urban Design and Corridor Landscape Plan required under Condition E79.

The definition of tree is a long lived woody perennial plant greater than (or usually greater than) three (3) metres in height with one or relatively few main stems or trunks (AS4373-2007 Pruning of amenity trees).

**Work Pack Activity / Task** St Mary's site establishment  
**Site/ Location:** St Mary's

**Work Pack Reference:** Low Impact (Minor) Works Approval Form, Application #1  
**Inspection Date:** 20/07/2022

**Details of trees to be removed and the reasons for the removal:**

Site establishment at St Mary's

Assessment to be undertaken visually from the ground only and based upon the Visual Tree Assessment (VTA) method

<b>Conducted by:</b> [REDACTED]*	<b>Qualification <sup>1</sup>:</b>	Senior Ecologist
Has a clear site plan/map showing the location of the tree(s) you are applying to remove been attached?		<b>Yes</b> / No
<b>Comments:</b> *Western Sydney Airport Metro SBT Project –Pre-clearing Inspections of St Mary’s, Claremont Meadows, Bringelly and Aerotropolis Study Areas. Prepared by AMBS Ecology & Heritage Pty Ltd, June 2022		

<sup>1</sup> The form must be prepared by an arborist who holds training to [Australian Qualifications Framework](#) of Level 3 in Arboriculture, or above, or equivalent recognised and relevant experience that enables the person to perform the tasks required by AS 4373—2007 e.g. members of either the [Institute of Australian Consulting Arborists](#) or [Arboriculture Australia](#)

**ab Notes**

**SULE - Safe Useful Life Expectancy**

1. Long SULE
  - a. Structurally sound and can accommodate future growth
  - b. Long term potential with minor remedial treatment
  - c. Trees of special significance which warrant extra care
2. Medium SULE
  - a. Will live between 15-40 years
  - b. Will live for more than 40 years but would be removed for safety or nuisance reasons
  - c. May live for more than 40 years but will interfere with more suitable specimens and need removal eventually
  - d. More suitable for retention in the medium term with some remedial care
3. Short SULE
  - a. Trees that may only live between 5-15 more years
  - b. May live for more than 15 years but would need removal for safety or other reasons
  - c. Will live for more than 15 years but will interfere with more suitable specimens or provide space for replacement plantings
  - d. Require substantial remedial care but are only suitable for short term retention
4. Removals
  - a. Dead, dying or seriously diseased
  - b. Dangerous trees through instability or loss of adjacent trees
  - c. Structural defects such as cavities
  - d. Damaged that are clearly not safe to retain
  - e. May or are causing damage to structures
  - f. That will become dangerous
5. Moved or Replaced Trees, which can be reliably moved or replaced
  - a. Small trees less than 5 meters
  - b. Young trees between 5-15 years
  - c. Trees that have been regularly pruned to control growth

**CONDITION**

This is based on observations of their health and structure.

1. A dead tree.
2. A tree in severe decline. Major structural damage that cannot be repaired, dieback of trunk or scaffold branches and the majority of foliage consist of epicormic growth.
3. A tree in decline. Significant structural damage that cannot be repaired, dieback of medium to larger branches and epicormic growth.
4. A tree moderate vigor, dieback of smaller branches and twigs, thinning of crown, poor leaf colour and moderate structural defects that could be mitigated with regular care.
5. A tree in slight decline with only a small amount of twig dieback and minor structural damage that could be easily rectified.
6. A healthy vigorous tree that shows reasonably free signs of pest and diseases and good structural form.
