

## Drive-Thru Covid-19 Testing

Today I am going to see a new doctor. They are nice and want to help me.

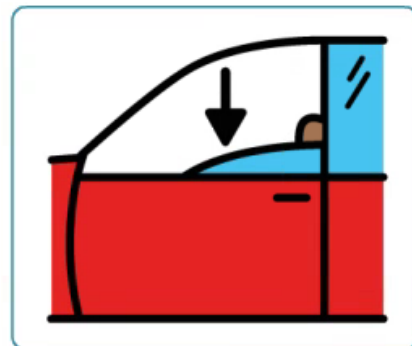

I will drive with my family to the site. They have big tents set up to take care of people.

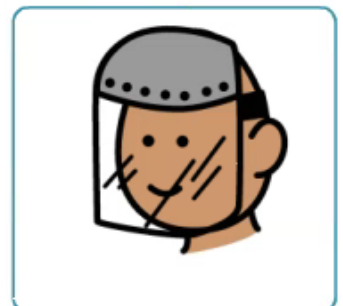

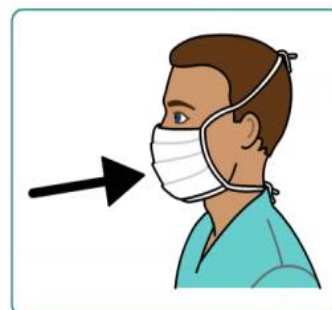

I sit in the car and wait for my turn.

When it is my turn, my parent will roll down the car window.

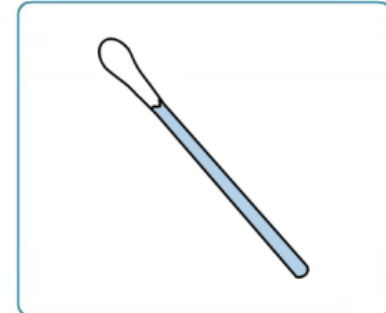

The doctor wears a mask and gloves to keep everyone safe.

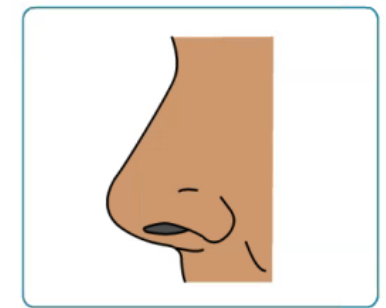

My parent will hold my hand or get in the back seat with me. I will hold very still to keep everyone safe.

The doctor will use a swab and put it in my nose.

It is important to hold very still. I can take deep breaths to help me stay calm.

My nose might run or I may sneeze when they are done. This is ok and normal.

I am safe and everyone is very proud of me. Now I can go home. If I am sick I have a lot of people who will take care of me. I did a great job.
