

# DIVISION OF COLORECTAL & PELVIC RECONSTRUCTION

Led by Marc Levitt, MD, our team provides innovative care in the diagnosis and treatment of all types of colorectal and pelvic disorders in infants, children and young adults. Dr. Levitt has performed more than 15,000 pediatric colorectal procedures; more surgeries covering the entire spectrum of problems involving the colon and rectum than any other pediatric surgeon in the world. His experience, along with our team of experts, can provide exceptional care for the most complex of disorders. Our multidisciplinary team includes specialists in a variety of fields, ensuring that each child receives comprehensive care, beyond just their colorectal care.

**As we work to improve the quality of life for patients, our team of surgeons has pioneered innovations to improve care including:**

## OUR TEAM'S CLINICAL EXPERTISE INCLUDES:

- ✓ Anorectal malformations
- ✓ Cloacal malformations
- ✓ Congenital gynecological problems
- ✓ **Functional constipation**
- ✓ Hirschsprung disease
- ✓ Motility disorders
- ✓ Perineal trauma
- ✓ Spinal anomalies

A new type of colostomy for newborns with anorectal malformations.

A novel approach to the newborn's operation for cloacal extrophy.

An original approach to repair rectovestibular fistula, which avoids a perineal body incision.

A new technique to repair a rectoperineal fistula, which avoids a urethral dissection.

A modification of the cloacal reconstruction, which improves cosmesis and the ability to catheterize when needed.

A groundbreaking procedure for sphincter reconstruction in Hirschsprung patients enabling fecal continence.

An increased ability to diagnose prenatal colorectal issues.

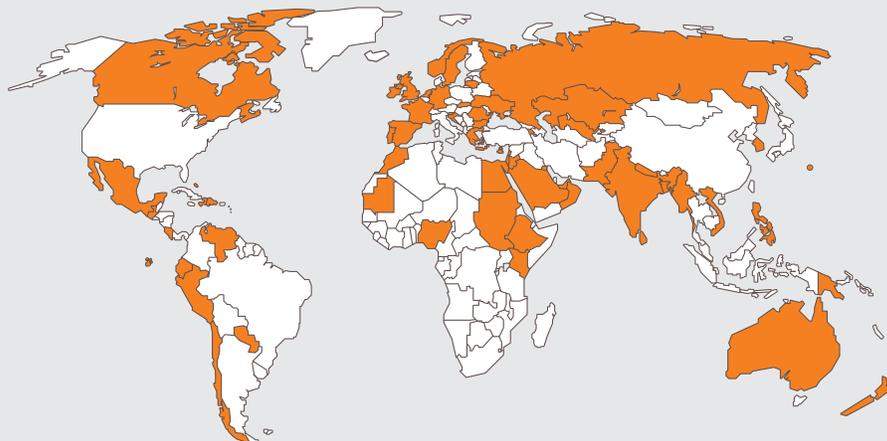

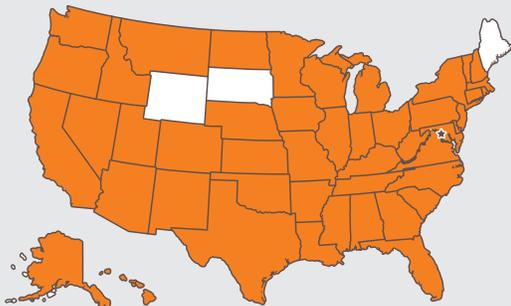

An advanced collaborative approach to evaluating patients with severe constipation.

Over 2000 patients have sought care with our team from .....

 **68** COUNTRIES

**48** STATES & DISTRICTS
