The Fog of More – displays the seemingly inexorable expansion of cybersecurity defenses that can be deployed

- Anti-malware
- Continuous monitoring
- SDL
- Standards
- Risk management framework
- Two-factor authentication
- Governance
- Audit logs
- Baseline configuration
- User awareness training
- Threat intelligence
- Security controls
- DLP
- SIEM
- Best practice
- Encryption
- Incident response
- Need-to-know
- Supply-chain security
- Penetration testing
- Threat feed
- Virtualization
- Compliance
- Certification
- Assessment
- Sandbox
- Security bulletins
- Browser isolation
- Maturity model
- whitelisting
