

DIFC Data Protection Talks

Talk #15: Regulation 10

Date: 10 October 2023

The future is here.

Overview and Impact of Regulation 10

Timeline:

April 2023 – Consultation published, and feedback received by end of May 2023.

July 2023 - Consultation revisions complete and approved by end of August 2023.

September 1, 2023 – Final regulations enacted and published.

What is “AI” and why regulate it?

Applying [Regulation 10](#) requirements may act as a further organisational measure to integrate into a robust data protection compliance program vis a vis the DIFC DP Law. Given the number of X-tech and Innovation Hub entities developing complex software using or itself being AI-based, the Commissioner’s objectives in issuing regulations, conducting use case testing in a sandbox environment and developing detailed guidance therefrom are to better protect the Personal Data that forms the core of most processing operations. Further, it protects the rights of data subjects to understand and, to the extent possible, control how their data is processed.

6.2

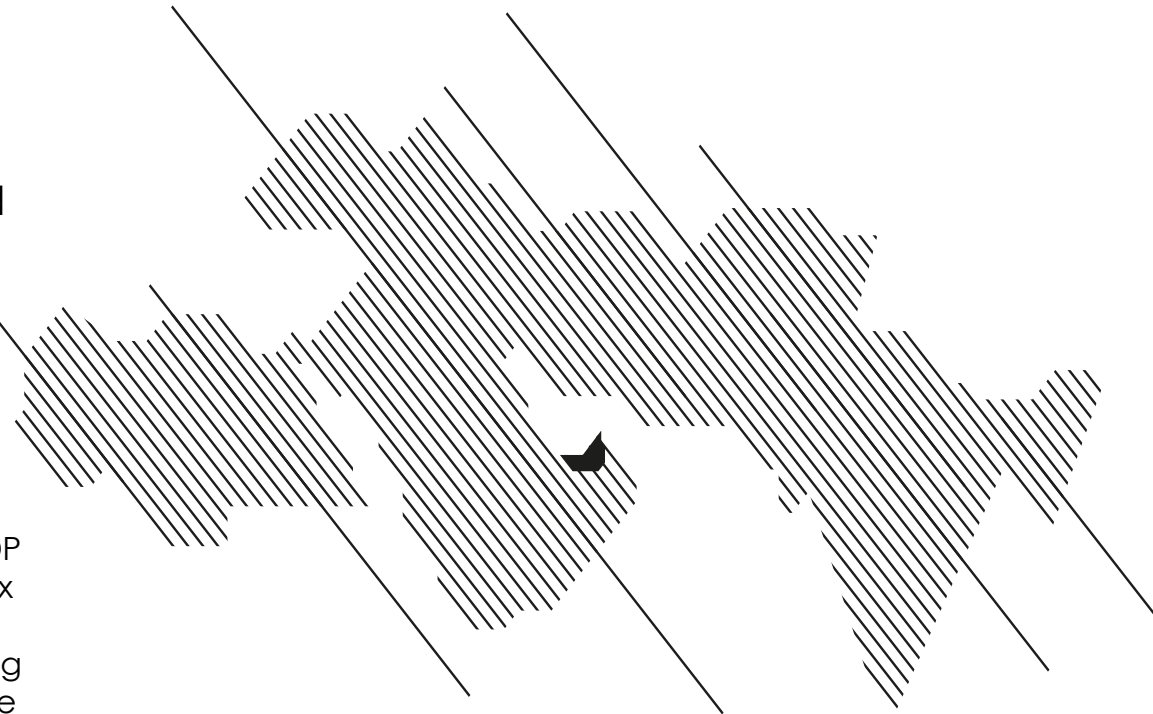

Regulation 6.2 should also be read with Regulation 10, regarding Unfair and Deceptive Practices.
